# THE ROYAL INSTITUTE OF NAVIGATION

## *Aims and Objects*

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

## *Membership*

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary ([membership@rin.org.uk](mailto:membership@rin.org.uk) Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 71, 2018, which includes print and electronic access, is £635 (USA, Canada and Mexico US \$1147) and includes delivery by air; single parts are available at £115 (USA, Canada and Mexico US \$208) plus postage. The electronic-only price available to institutional subscribers is £492 (USA, Canada and Mexico US \$897). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. *The Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

# THE JOURNAL OF NAVIGATION

VOLUME 71 NUMBER 2 MARCH 2018

## CONTENTS

- Generalised Theory on the Effects of Sampling Frequency on GNSS Code Tracking** 257  
*Vinh T. Tran, Nagaraj C. Shivaramaiah, Thuan D. Nguyen, Joon W. Cheong, Eamonn P. Glennon and Andrew G. Dempster*
- Teaching and Learning Celestial Navigation Using Google Maps** 281  
*Tom Bensky*
- A New Indoor Positioning System Using Artificial Encoded Magnetic Fields** 299  
*Falin Wu, Yuan Liang, Yong Fu and Chenghao Geng*
- A Robust and Efficient 3D LADAR Odometer with Outlier Detection** 317  
*Zhen Zhu and Maarten Uijt de Haag*
- An Enhanced Multi-GNSS Navigation Algorithm by Utilising a Priori Inter-System Biases** 339  
*Zhounan Dong, Changsheng Cai, Rock Santerre and Cuilin Kuang*
- Offline Calibration for MEMS Gyroscope G-sensitivity Error Coefficients Based on the Newton Iteration and Least Square Methods** 352  
*Li Xing, Zhi Xiong, Jian-ye Liu, Wei Luo and Ya-zhou Yue*
- A Cooperative Positioning Service for Multi-Modal Public Transit Situations** 371  
*G. Retscher and F. Obex*
- Performance Improvement for Mobile Robot Position Determination Using Cubature Kalman Filter** 389  
*Jafar Zarei and Abdolrahman Ramezani*
- Benefit of Sparse Reference Network in BDS Single Point Positioning with Single-Frequency Measurements** 403  
*Xiaomin Luo, Yidong Lou, Xiaopeng Gong, Shengfeng Gu and Biyan Chen*
- Analysis of Ship Accidents in the Istanbul Strait Using Neuro-Fuzzy and Genetically Optimised Fuzzy Classifiers** 419  
*Sercan Erol, Mengü Demir, Bayram Çetişli and Ekrem Eyüboğlu*
- Horizon Line Stability Observations over the Sea** 437  
*Vladimir A. Grishin and Igor A. Maslov*
- Astronomical position without observed altitude of the celestial body** 454  
*Zvonimir Lušić*
- Statistical Analysis of the Detection Probability of the TianTuo-3 Space-based AIS** 467  
*Shiyou Li, Lihu Chen, Xiaoqian Chen, Yong Zhao and Lei Yang*
- Task Assignment and Path Planning of a Multi-AUV System Based on a Gladius Bio-Inspired Self-Organising Map Algorithm** 482  
*Daqi Zhu, Yu Liu and Bing Sun*
- Approximation of a Great Circle by using a Circular Arc on a Mercator Chart** 497  
*Miljenko Lapaine and Tomislav Jogun*
- Scalar Characterization of Azimuthal Coverage Governing Geolocation Resolution** 509  
*Nicholas Sharpitor*
