Experimental Agriculture publishes the results of research on crops, herbage and forage, with the main emphasis on field experiments carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

Experimental Agriculture is published quarterly. Four parts form a volume.

Subscriptions may be sent to any bookseller or subscription agent or direct to Cambridge University Press, P.O. Box 92, London, N.W.1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £7.00 net (including postage) for an annual volume (\$23.00 in the U.S.A.), payable in advance; separate parts cost £2.00 net or \$6.50 each (plus postage).

Second class postage paid at New York, N.Y.

Back Volumes. Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of Cambridge University Press.

NOTES FOR CONTRIBUTORS

Contributions will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, The Spinney, Wrington, Bristol.

Conditions of acceptance. Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

General lay-out. Before having their manuscripts typed contributors are asked to look carefully at the lay-out of other papers published in this journal, to ensure that their own papers, as submitted, conform as closely as possible to

the accepted pattern. This very much facilitates the work of the Editor and may often result in a paper being published earlier than if it requires a great deal of detailed editorial attention. Numerical data, which should only be included if they are essential to the argument, can be presented either in the form of tables or diagrams, but should never be shown in both ways. It is not the normal custom of the Journal to publish notes shorter than about 2000 words (4 pages) or longer than about 6000 words (12 pages including illustrations).

Typescripts. A top copy and one carbon copy of the script should be submitted, typed with double spacing, on one side of the paper only and with margins of about 1½ inches at the left-hand side and head of each sheet. Quarto size is preferred to foolscap.

Title. The development of automatic bibliographic methods, based on single-word indexing of the significant words in the title, makes it essential that the title of each paper should contain the maximum of relevant informa-

JOURNAL OF THE BRITISH GRASSLAND SOCIETY

This Journal is a medium for the publication of the results of research and practical experience in the realm of grassland husbandry and forage production.

EDITOR: A. G. G. HILL

Contents of Volume 25, No. 4, December 1970

THE SIMULATION OF ANIMAL RETURNS IN GRASSLAND EXPERIMENTATION. *K. Margaret Wolton, J. S. Brockman and P. G. Shaw*

SOME ASPECTS OF THE NITROGEN : WATER INTERACTION ON GRASS SWARDS. *P. C. McFeely and R. S. Tayler*

PREDICTING THE BEST TIME TO APPLY NITROGEN TO GRASSLAND IN SPRING. *W. D. Jagtenberg*

EFFECT OF SOIL PARENT MATERIAL, ELEVATION, ASPECT AND FERTILIZER TREATMENT ON UPLAND GRASS YIELDS. *C. P. Burnham, M. N. Court, R. J. A. Jones and J. Tinsley*

SILAGE AND MILK PRODUCTION, A COMPARISON BETWEEN WILTED AND UNWILTED GRASS SILAGES MADE WITH AND WITHOUT FORMIC ACID. *M. E. Castle and J. N. Watson*

THE PRODUCTION OF CONTRASTING GENOTYPES OF PERENNIAL RYEGRASS (*LOLIUM PERENNE* L.) IN MONOCULTURES AND MIXED CULTURES OF VARYING COMPLEXITY. *I. Rhodes*

ERRORS IN MEASURING NITROGEN AND DRY-MATTER CONTENT OF PLANT AND FAECES MATERIAL. *M. J. Sharkey*

MINERALIZATION OF NITROGEN AND PHOSPHORUS FROM ORGANIC MATERIALS OF PLANT AND ANIMAL ORIGIN AND ITS SIGNIFICANCE IN THE NUTRIENT CYCLE IN GRAZED UPLAND AND HILL SOILS. *M. J. S. Floate*

THE EFFECT OF NITROGENOUS FERTILIZER ON THE RATE OF GROWTH OF ITALIAN RYEGRASS. 4. RESIDUAL EFFECTS. *D. Wilman*

ANALYSES OF YIELD FROM A COMPETITION TRIAL WITH PERENNIAL RYEGRASS. *A. J. Thomson*

BOOK REVIEWS

Published quarterly. Annual subscription £4, post free. Back numbers are still available, at the following prices; Volume 1, £1; volumes 2-17, £2 each; volumes 18-22, £3; subsequent volumes £4.

Orders to: The Secretary, British Grassland Society, Grassland Research Institute, Hurley, Berkshire, England.

ANIMAL PRODUCTION

Journal of the British Society of Animal Production

Contents of Volume 13, Part 1, February 1971 include the following:

- HILL, W. G. *Investment appraisal for national breeding programmes.*
 MORRISON, S. R. and MOUNT, L. E. Adaptation of growing pigs to changes in environmental temperature.
 FOWLER, V. R. and LIVINGSTONE, R. M. Some effects of alternating high and low levels of feed intake on the performance and composition of the growing pig.
 LOHSE, C. L., MOSS, F. P. and BUTTERFIELD, R. M. Growth patterns of muscles of Merino sheep from birth to 517 days.
 MARSH, R., CURRAN, M. K. and CAMPLING, R. C. The voluntary intake of roughages by pregnant and by lactating dairy cows.
 CRABTREE, J. R. and WILLIAMS, G. L. The voluntary intake and utilization of roughage concentrate diets by sheep. Parts I and II.
 HOLMES, C. W. Growth of pigs fed whey at two ambient temperatures.
 DAY, NORMAN, MCEWAN JENKINSON, D. and WALKER-LOVE, J. Freeze-branding of young beef animals.
 FAHMY, M. H., LALANDE, G. and HIDIROGLOU, M. Reproductive performance and growth of Shorthorn purebred and crossbred cows.
 KAY, M., MASSIE, R. and MACDEARMID, A. Intensive beef production. 12. Replacement of concentrates with chopped dried grass.
 HODGSON, J. The development of solid food intake in calves. Parts I and II.
 CHOPRA, S. C. and ACHARYA, R. M. Genetic and phenotypic parameters of body weights in Bikaneri sheep (Magra strain).
 TRAIL, J. C. M., SACKER, G. D. and FISHER, I. L. Crossbreeding beef cattle in Western Uganda. Parts I to V.
 CHAMBERLAIN, A. G. and COOKE, B. C. The nutritive value of separated milk for pigs. III. A note on the effects of supplementary lysine and methionine on performance to 55 kg live weight.
 JOUBERT, D. M. and UECKERMANN, L. A note on the effect of docking on fat deposition in fat-tailed sheep.
 LEDWARD, D. A. and SHORTHORSE, W. R. A note on the haem pigment concentration of lamb as influenced by age and sex.
 RATHORE, A. K. A note on the relations between scrotal wool cover, face cover, and cover on points in Merino rams.
 HASSAN, H. M. and MUKHTAR, A. M. S. A note on the utilization of urea by Sudan desert sheep.

LONGMAN GROUP LTD

RHODESIAN JOURNAL OF AGRICULTURAL RESEARCH

VOL. 8 No. 2

CONTENTS

1970

Animal Husbandry

- Effects of dietary-protein level and diethylstilboestrol implants on intensively-fed beef steers
- Replacement of maize with sugar in diets for laying pullets
- Effect of nutrition on development of the reproductive tract of indigenous gilts

Tobacco

- Effect of irrigation and topdressing on flue-cured tobacco:
Part 1. Yield, quality and chemical composition

Crops

- Some factors affecting flowering and maturation of maize

Forestry

- Pine pollen dispersal and seed orchard location in Zambia
- Wood quality of *Pinus patula* in central Africa

Wildlife

- Agricultural utilization of semi-domesticated eland:
Part 3. Horn and tooth development as indicators of age

Research Notes

- Testing the viability of pine pollen
- Storage of *Pinus kesiya* pollen

Book Reviews

Published twice annually

Annual subscription R\$3.00.

Single numbers R\$1.50.

Specimen copies available to libraries from:
