

Index of Subjects

- Acute poliomyelitis, new antigens for complement fixation test in, 321
- Adenovirus vaccines, living attenuated preparations, 277
- Aerosol filters, measurement of foot-and-mouth disease virus penetration through, 409
- Aerosols, measurement, by light scatter method, of physical decay, 373
- Anthrax bacilli spore formation and germination, influence of temperature and humidity on, 177
- Antigenic activity of poliomyelitis vaccines used in the United Kingdom in 1958, 399
- Antigenicity of γ -irradiated vaccinia virus, 391
- Antigenic modulation of *Bordetella pertussis*, 57
- Antigens of *Trichomonas foetus* strains isolated from cows and pigs, 207
- Antirabic immunity in guinea-pigs induced by HEP Flury virus vaccine; influence of route of administration on resistance to cerebral and extraneural challenge, 187
- Bacillus anthracis*, effect of temperature and humidity on spore formation and germination, 177
- Bacteraemia following oral infection of mice with typhoid and paratyphoid bacilli, 307
- Bacterial antigens, detection of, by sensitized guinea-pig ileum, 291
- Bacterial growth in wounds, effect of sera, exudates and sloughs under varying conditions, 357
- Bacterial populations of hospital blankets, method of sampling, 157
- Bactericidal action of sera and exudates on wound bacteria, 357
- Bantu school children, incidence of salmonella and shigella infections, 109
- Bar-soap disinfectants, 159
- Blankets, an improved sampling method for estimation of bacterial populations, 157
- Bordetella pertussis*—antigenic modulation, 57
- Brucellosis in dairy herds, detection by application of the milk ring test, 473
- Calcutta canal waters, isolation of cholera vibrios throughout the year, 21
- Candida albicans*, apparent release of growth stimulant for, under conditions of tetracycline therapy, 95
- Cholera vibrios in Calcutta waters, persistence throughout the year, 21
- Culture medium for general bacteriology: a standard basic medium, 367
- Culture medium for salmonella differentiation, 331
- Dairy herds, application of milk ring test for detection of brucellosis, 473
- Dairy milk produced in central Europe during 1957–60, levels of Strontium 90, 261
- DDT insecticide-bait-boxes for control of sylvatic plague vectors, 119, 347
- Disinfectants for use in bar-soaps, 159
- Ducitol-sucrose-salicin-iron-urea agar: a new differential medium for salmonellae, 331
- Eclipse phase of vaccinia virus growing in chick embryo cell monolayers, 133
- Electrophoresis, zone, of poliovirus partially inactivated by formaldehyde, 419
- Electrophoretic and ultracentrifuge studies on proteinuria of the new-born calf, 247
- Ethylene oxide sterilization in hospital practice, 337
- Exudates from wounds, effect on bacterial growth, 357
- Fluoracetamide as a rodenticide, 125
- Fluorescein isothiocyanate conjugated with specific antibody for identification at an early stage, of slow growing bacteria, 147
- Flury HEP rabies virus vaccine in guinea-pigs. Influence of route of administration on resistance to cerebral and extra-neural challenge, 187
- Foot and mouth disease virus, aerosol sampling methods, 409
- Gamma-irradiation of vaccinia virus, effect on antigenicity, 391

- Growth stimulant for *Candida albicans* released during tetracycline therapy for infections by other bacteria, 95
- Haemophilus pertussis*—antigenic modulation of, 57
- Heredity, influence of, on incidence of rheumatic carditis, 263
- Hooghly river and canals, isolation of cholera vibrios from, 21
- Hospital cross-infection as a cause of a *Salmonella typhimurium* epidemic, 229
- Immunization of guinea-pigs against rabies with HEP Flury virus vaccine by intracerebral route, 187
- Ionizing radiation for sterilizing surgical rubber gloves and plastic tubing, 465
- Leptospiral antibodies in pig sera, 243
- Light scatter method for measurement of physical decay of aerosols, 373
- Milk ring test applied to detection of brucellosis in dairy herds, 473
- Modulation, antigenic, of *Bordetella pertussis*, 57
- Molluscum contagiosum, an electron microscope study, 45
- Mouse infection by oral route with typhoid and paratyphoid bacilli—the invasion of the blood stream from gut infections, 307
- Multiple phage-type carriers of *Salmonella paratyphi B*, 193, 201
- Mumps and Sendai viruses, antigenic relationship, 283
- Myxomatosis, virulence of viruses recovered from Australian wild rabbits during period 1951–59, 485
- Non-food-borne outbreak of *Salmonella typhimurium* infection in a general hospital, 229
- Operating theatres, ventilation of, 427, 449
- Paratyphoid carrier of multiple phage types, 193, 201
- Phage type 27, *Salmonella typhimurium*. Hospital outbreak due to cross-infection with, 229
- Pig-meal naturally contaminated with salmonellae and pig salmonellosis, 381
- Pig sera, leptospiral antibodies in, 243
- Plague vectors on rodents in Californian Sierra Nevada, 119, 347
- Poliomyelitis, new virus antigens for CFT for diagnosis of acute disease, 321
- Poliomyelitis vaccines, antigenic activity of preparations used in the United Kingdom in 1958, 399
- Poliovirus, zone electrophoresis of preparations partially inactivated by formaldehyde, 419
- Proteinuria of the new-born calf, ultracentrifuge and electrophoric studies, 247
- Rabbits, wild Australian, virulence of myxoma virus, 485
- Rabies, immunization of guinea pigs against, by intracerebral inoculation of the HEP Flury strain of the virus, 187
- Radio tracer method compared with light scatter method for measurement of aerosol decay, 373
- Rheumatic carditis in a communal settlement, an epidemiological study, 263
- Rodenticidal properties of fluoracetamide, 125
- Salmonella-contaminated pig food, 381
- Salmonella differential culture medium, ducitol-sucrose-salicin-iron-urea (DSSIU) agar, 331
- Salmonellas paratyphi B*, a carrier of multiple phage types, 193, 201
- Salmonella-shigella infections of Bantu school children, 109
- Salmonella typhimurium*, phage type 27. An outbreak due to cross-infection in a general hospital, 229
- Sendai and mumps viruses, antigenic relationship, 283
- Sensitized guinea pig ileum for the detection of bacterial antigens, 291
- Sloughs in wounds, effect on bacterial growth, 357

- Spore formation and germination of anthrax bacilli, effect of temperature and humidity on, 177
- Staphylococcal infections, epidemiology of, 1
- Staphylococcal infections, recurrent, duration of carrier state, 11
- Sterilization by ethylene oxide in hospital practice, 337
- Sterilization by means of ionizing radiation for surgical rubber gloves and plastic tubing, 465
- Strontium 90 in dairy milk produced in central Europe during 1957-60, 261
- Sylvatic plague, control of vectors on rodents in California, 119, 347
- Tetracycline therapy, possible release of a growth stimulant for *Candida albicans*, 95
- T-phages, the presence of heat labile and heat stable factors and also antibodies in both normal and anti-T-phage sera, 35
- Trachoma virus isolated from West African patients, 99
- Trichostrongylus axei* antigens in strains from cow and pig, 207
- Tuberculosis, variation in natural resistance in species and animal-strain, 215
- Typhoid and paratyphoid bacilli in mice infected experimentally by the oral route. Distribution of the bacteria in the organs, 307
- Ultracentrifuge and electrophoretic studies on proteinuria of the new-born calf, 247
- Vaccines, anti-rabies. Influence of route of administration in guinea-pigs of Flury HEP virus vaccine on resistance to cerebral and extraneural challenge, 187
- Vaccines, living adenovirus preparations attenuated by passage through pig cell tissue culture, 277
- Vaccinia virus, antigenicity after γ -irradiation, 391
- Vaccinia virus, eclipse phase, 133
- Ventilation, evaluation of, 297
- Ventilation of operating theatres, 427, 449
- Vibrio cholerae*, isolation from the Hooghly river and Calcutta canals, 21
- Viruses
- Adeno, 277
 - Foot and mouth disease, 409
 - Molluscum contagiosum, 45
 - Mumps, 283
 - Myxomatosis, 485
 - Poliomyelitis, 321, 399, 419
 - Rabies, 187
 - Sendai, 283
 - Trachoma, 99
 - Vaccinia, 133, 391
- Zone electrophoresis of partially inactivated poliovirus, 419
