THE JOURNAL OF MENTAL SCIENCE

Communications on general editorial matters, including MSS. for publication, books for review and other printed matter, and communications regarding the *Epitome* section, including journals to be abstracted, should be sent to the **Editor-in-Chief, Barnwood House, Gloucester.**

Communications and enquiries regarding sales should be addressed to the Publishers, **Messrs. J. & A. CHURCHILL, Ltd., 104 Gloucester Place, Portman Square, London, W.1;** and those regarding Advertisements to the **Editor-in-Chief, Barnwood House, Gloucester.** Phone: Gloucester 66292.

Details of membership of the Royal Medico-Psychological Association are obtainable from the **Secretary, R.M.P.A., 11 Chandos Street, Cavendish Square, London, W.1.**

THE ROYAL MEDICO-PSYCHOLOGICAL ASSOCIATION PUBLICATIONS

From MESSRS. ADLARD & SON, LTD.,
Bartholomew Press, Dorking, Surrey.

Enquiry (History) Form, for use in Mental Hospitals. In three sizes. Prices and specimen forms on application.

From MESSRS. J. & A. CHURCHILL, LTD.,
104 Gloucester Place, W.1.

"The Journal of Mental Science." Published four times a year. Price 12/6. Postage extra.

From MESSRS. BAILLIÈRE, TINDALL & COX,
8 Henrietta Street, W.C.2.

"Handbook for Mental Nurses." 8th edn. In preparation.

"Manual for Mental Deficiency Nurses." 1931. Price 6/6 net.

"Occupational Therapy." Addendum to "Handbook". 1938. Price 6d.

From THE REGISTRAR, R.M.P.A., 11 Chandos Street, W.1.

"Nursing Examination Papers, 1928-38." Price 9d. each. Postage 1d.

"Regulations for the D.P.M. of the R.M.P.A."

From THE SECRETARY, 11 Chandos Street, W.1.

The Charter and By-Laws of the Association. Price 2/- . Postage 1½d.

'ECTONUS'

ELECTRO-CONVULSANT APPARATUS

(A.C. or D.C. Mains)

For a new improved ECT technique which reduces the need for muscle relaxants.

Also:

'ECTONUSTIM'

—combined ECT and Cerebral Stimulator

'ECTRON'

—ECT apparatus

'ECTRON'

—Rubber Mouth Gag

Write for full details to: **ECTRON LTD**

NEW portable direct-recording equipment

Electro Encephalography

Electro Cardiology

Electro Myography

This new, and versatile, group of portable units can be combined in various ways to provide direct-recording equipment for many physiological and physical applications where permanent records are required of variable activity at frequencies below 100 cycles per second.

Using conventional paper, this form of ink recording has a marked economical advantage over continuous film recording of intermittent phenomena, either D.C. or A.C. up to 90 c.p.s. The low recording cost is very important in the case of long recordings, often of one hour duration, when the cost of all other methods is quite prohibitive. The recordings are permanent and visible from the instant of occurrence.

The equipment consists of four units.

(1) **Recorder Unit EPR.** (1-4 pen) direct ink-writing pen oscillograph. This unit can be supplied with up to four pen motors as required. The equipment includes ink supply, three-speed paper device, internal load resistances for C.R.O. use and appropriate controls. A seconds time marker is also provided. The unit requires suitable amplifiers for operation as a critically damped high speed oscillograph recorder.

(2) **Amplifier Unit EPA.**—High gain—low noise A.C. coupled amplifier push-pull throughout, 5 stages specifically designed for operating the pen recorders as used in the Recorder Unit — EPR. Frequency response 0.35-500 c.p.s. — $1\frac{1}{2}$ db. Voltage gain 3×10^6 which corresponds to 10 millimetres for 10 microvolts peak to peak on the Pen Oscillograph.

(3) **Stabilised Power Supply Unit—EPP.**—designed to supply one or two amplifiers type EPA. It provides the H.T. supply for the later stages, the A.C. heater power for the latter valves, and a highly stabilised voltage supply for the early stage heaters.

(4) **Input Switch Unit—EPI.**—designed to work with the other units in this group. It consists of a Master-Switch for the selection of pre-wired master electrode patterns and also allows individual selection of any electrode to either side of any amplifier input. A Master Calibrator and Balance Switch is also incorporated. A small camera-tripod-type input stand, the head of which accepts up to eleven electrode leads and provides an earth connection, stows away inside the EPI. unit for carriage.

All the units are fully portable, fitted with carrying handles and quickly detachable covers for transport. Finish is grey Morocoid which is durable and relatively dust free.

THE MARCONI EIGHT-CHANNEL ELECTRO-ENCEPHALOGRAPH

The new 8-channel E.E.G. is functionally designed to provide every possible facility. The long, low, desk-type instrument allows the seated operator a clear view of both patient and record, over three feet of the paper being visible at one time.

Refinements include a master attenuator, in addition to individual channel attenuators, and an illuminated electrode-pattern indicator. Both the 10-20 and the National Hospital electrode systems are available.

INSTRUCTIONS TO AUTHORS

Strict observation of the following requirements will save intending authors considerable time and worry, and will facilitate the publication of papers submitted.

(1) Authors should consult a current issue to see how a paper should be presented. They should consult *General Notes on the Preparation of Scientific Papers*, published for the Royal Society by the Cambridge University Press, 200 Euston Road, London, N.W.1 (price 2s. 9d. post free).

(2) The title should be brief and contain no sub-heading. This should be followed by the author's name, his qualifications and his present appointment.

(3) Omit a summary of the literature when this has been adequately summarized elsewhere.

(4) For reasons of economy, case-histories of patients can be published only when they are of exceptional scientific interest.

(5) Diagrams and graphs must be drawn in black ink with properly printed lettering. If they have to be redrawn by the printer, the cost, which may amount to several pounds, will be charged to the author.

(6) Tables and graphs should be kept as few as possible. If they number more than a few, the author must be prepared to pay part of their cost.

(7) Any deviation or difference that might be due to random sampling must, if it is to be discussed in its general, scientific significance, be first shown, by calculation of the appropriate probability, to be significant statistically.

(8) All references should be given at the end of the paper, in alphabetical order, and in the following form:

SMITH, A. B., *J. Ment. Sci.*, 1950, 95, 493.

In the body of the paper they should appear as: Smith (1950).

(9) When the proof arrives from the printer it is for the correction of printer's mistakes only. Larger alterations can be made only with the Editor's permission and if the author is willing to defray the cost.

(10) The author will receive 10 reprints of his paper free of charge. If further reprints are required the order should be sent **direct** to Messrs. Headley Brothers, Ltd., The Invicta Press, Ashford, Kent.

(11) A paper sent to the Editor-in-Chief is, as a rule, sent to one of the panel of Referees set out on the cover of the Journal for his opinion. Papers are as a rule not rejected until a second or further opinion has been received.

NOEL G. HARRIS, M.D., F.R.C.P., D.P.M.
