Bulletin of *Entomological Research*

journals.cambridge.org/ber

Aims and Scope

The aims of *Bulletin of Entomological Research* are to further our global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. *Bulletin* publishes high-quality and original research papers, 'critiques' and review articles concerning insects, mites, ticks or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. *Bulletin* does not publish the results of spray trials.

Bulletin of Entomological Research is published bimonthly by
Cambridge University Press

Editor-in-Chief

Professor Bill Symondson

School of Biosciences, Cardiff University, Cardiff CF10 3TL, UK

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Cover image: Female syrphid fly, *Toxomerus marginatus* (Say), feeding in pollinia of narrow-leaved or English plantain, *Plantago lanceolata* L. Like many other arthropod natural enemies, syrphids, whose larvae are predaceous, depend on plant-provided resources such as seeds, pollen, and nectar to supplement their animal diets.

Photographed by M. Greenstone, USDA Agricultural Research Service, Beltsville, Maryland USA.

Research Papers

D.L. Whitehead

Haemocytes play a commensal rôle in the synthesis of the dihydroxybenzoate required as a precursor for sclerotization of the egg case (ootheca) in the cockroach *Periplaneta americana* (L) 251

T. Tchuinkam, M. Mpoame, B. Make-Mveinnya, F. Simard, E. Lélé-Defo, S. Zébazé-Togouet, A. Tateng-Ngouateu, H.-P. Awono-Ambéné, C. Antonio-Nkondjio, T. Njiné and D. Fontenille

Optimization of breeding output for larval stage of *Anopheles gambiae* (Diptera: Culicidae): prospects for the creation and maintenance of laboratory colony from wild isolates 259

L. Pumariño, O. Alomar and N. Agustí

Development of specific ITS markers for plant DNA identification within herbivorous insects 271

D.R. Barnard, G.J. Knue, C.Z. Dickerson, U.R. Bernier and D.L. Kline

Relationship between mosquito (Diptera: Culicidae) landing rates on a human subject and numbers captured using CO₂-baited light traps 277

M. Eickermann, B. Ulber and S. Vidal

Resynthesized lines and cultivars of *Brassica napus* L. provide sources of resistance to the cabbage stem weevil (*Ceutorhynchus pallidactylus* (Mrsh.)) 287

S.L. Goldson, M.C. Barron, J.M. Kean and C. van Koten

Argentine stem weevil (*Listronotus bonariensis*, Coleoptera: Curculionidae) population dynamics in Canterbury, New Zealand dryland pasture 295

P.F. Falcão, S.R.R. Pinto, R. Wirth and I.R. Leal

Edge-induced narrowing of dietary diversity in leaf-cutting ants 305

T. Kobayashi, T. Sakurai, M. Sakakibara and T. Watanabe

Multiple origins of outbreak populations of a native insect pest in an agro-ecosystem 313

A. Sarikaya and A. Gülel

Effects of host species, stage and size on the sex ratio and clutch size of the parasitoid, *Dibrachys boarmiae* (Walker, 1863) (Hymenoptera: Pteromalidae) 325

M.A. Castalanelli, K.M. Mikac, A.M. Baker, K. Munyard, M. Grimm and D.M. Groth

Multiple incursions and putative species revealed using a mitochondrial and nuclear phylogenetic approach to the *Trogoderma variabile* (Coleoptera: Dermestidae) trapping program in Australia 333

T. Giannoulis, A.-M. Dutrillaux, Z. Mamuris, O. Montreuil, C. Stamatis and B. Dutrillaux

Evolution of European Cockchafers (Melolonthinae: Scarabaeidae: Coleoptera): a morphological, molecular and chromosomal study of intra- and inter-specific variations 345

A. Velonà, A. Luchetti, S. Ghesini, M. Marini and B. Mantovani

Mitochondrial and nuclear markers highlight the biodiversity of *Kaloterme flavicollis* (Fabricius, 1793) (Insecta, Isoptera, Kalotermitidae) in the Mediterranean area 353

A. Tena, A. Kapranas, G.P. Walker, F. Garcia-Marí and R.F. Luck

Larval morphology of *Metaphycus flavus* and its role in host attachment and larval cannibalism 365

Bulletin of Entomological Research is an international journal published bimonthly by Cambridge University Press in February, April, June, August, October and December.

Subscription information:

The subscription rates for Volume 101, 2011 (6 issues):
Print and electronic access: £862 (UK), (USA, Canada and Mexico US \$1669)
Electronic-only price: £672 (UK), (USA, Canada and Mexico US \$1307)
Print only: £808 (UK), (USA, Canada and Mexico US \$1557)
The online edition is available at www.journals.cambridge.org/ber with free table of contents alert (upon registration).

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back Volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Information for Authors

Manuscripts should be submitted online at <http://www.editorialmanager.com/ber>. New users should register before submitting a manuscript. Further information about submission is available from the publisher at the given address and is printed on the inside back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage. No page charges are levied by this journal.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organisations in the USA who are registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of USA copyright law) subject to payment to the CCC of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-4853/2011/\$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions. *For all other use*, permission must be sought from Cambridge or the American Branch of Cambridge University Press.
