INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

Journal of **GLACIOLOGY**

CONTENTS Vol 63 No 237 2017

- 1 **Kristin Poinar, Ian Joughin, Jan T. M. Lenaerts, Michiel R. van den Broeke**
Englacial latent-heat transfer has limited influence on seaward ice flux in western Greenland
- 17 **Wing S. Chan, Merlin L. Mah, Ryan C. Bay, Joseph J. Talghader**
Long-wavelength optical logging for high-resolution detection of ash layers in glacier ice
- 22 **Andreas Born**
Tracer transport in an isochronal ice-sheet model
- 39 **Marion Réveillet, Christian Vincent, Delphine Six, Antoine Rabatel**
Which empirical model is best suited to simulate glacier mass balances?
- 55 **Laura I. Thomson, Michael Zemp, Luke Copland, J. Graham Cogley, Miles A. Ecclestone**
Comparison of geodetic and glaciological mass budgets for White Glacier, Axel Heiberg Island, Canada
- 67 **Sergey Marchenko, Veijo A. Pohjola, Rickard Pettersson, Ward J. J. van Pelt, Carmen P. Vega, Horst MacHguth, Carl E. Bøggild, Elisabeth Isaksson**
A plot-scale study of firn stratigraphy at Lomonosovfonna, Svalbard, using ice cores, borehole video and GPR surveys in 2012–14
- 79 **Christoph Mayer, Julia Jaenicke, Astrid Lambrecht, Ludwig Braun, Christof Völksen, Christian Minet, Ulrich Münzer**
Local surface mass-balance reconstruction from a tephra layer – a case study on the northern slope of Mýrdalsjökull, Iceland
- 88 **Evan S. Miles, Ian C. Willis, Neil S. Arnold, Jakob Steiner, Francesca Pellicciotti**
Spatial, seasonal and interannual variability of supraglacial ponds in the Langtang Valley of Nepal, 1999–2013
- 106 **Yongmei Gong, Thomas Zwinger, Stephen Cornford, Rupert Gladstone, Martina Schäfer, John C. Moore**
Importance of basal boundary conditions in transient simulations: case study of a surging marine-terminating glacier on Austfonna, Svalbard
- 118 **S. McKenzie Skiles, Thomas Painter**
Daily evolution in dust and black carbon content, snow grain size, and snow albedo during snowmelt, Rocky Mountains, Colorado
- 133 **S. McKenzie Skiles, Thomas Painter, Gregory S. Okin**
A method to retrieve the spectral complex refractive index and single scattering optical properties of dust deposited in mountain snow
- 148 **Vibhor Agarwal, Tobias Bolch, Tajdarul H. Syed, Tino Pieczonka, Tazio Strozzi, Rishabh Nagaich**
Area and mass changes of Siachen Glacier (East Karakoram)
- 164 **G. Hilmar Gudmundsson, Jan de Rydt, Thomas Nagler**
Five decades of strong temporal variability in the flow of Brunt Ice Shelf, Antarctica
- 176 **David J. Wilton, Amy Jowett, Edward Hanna, Grant R. Bigg, Michiel R. van den Broeke, Xavier Fettweis, Philippe Huybrechts**
High resolution (1 km) positive degree-day modelling of Greenland ice sheet surface mass balance, 1870–2012 using reanalysis data
- Letter*
- 194 **Lide Tian, Tandong Yao, Yang Gao, Lonnie Thompson, Ellen Mosley-Thompson, Sher Muhammad, Jibiao Zong, Cheng Wang, Shengqiang Jin, Zhiguo Li**
Two glaciers collapse in western Tibet
