

## Directions to Contributors - Concise Version

The *British Journal of Nutrition* publishes original papers, review articles, technical notes and short communications in English in all branches of nutrition. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of *The British Journal of Nutrition* (January or July), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax).

**Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.** Contributors of accepted articles will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

**Page format.** The *British Journal of Nutrition* is printed in single-column format (column width of 135mm) with a text area of 135 x 203 mm.

**Text.** Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

**Abstract.** Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head.

**Key Words.** Authors should supply two or three key words or phrases (each containing up to three words) on the title page of the typescripts.

**Tables.** Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single-column or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

**Illustrations.** Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

**References.** References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Bingham, S. A. & Cummings J. H. (1985). Urine nitrogen as an independent validatory measure of dietary intake: a study of nitrogen balance in individuals consuming their normal diet. *American Journal of Clinical Nutrition* 42, 1276-1289.

Haraldsdottir, J. (1989). Dietary history. In *Manual on Methodology for Food Consumption Studies*, pp. 88-92 (M. E. Cameron and W. A. van Staveren, editors). Oxford: Oxford University Press.

Underwood, E.J. (1977). *Trace Elements in Human and Animal Nutrition*, 5th ed. New York: Academic Press.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

**Proofs.** Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E.Sambrook, Executive Editor, The British Journal of Nutrition, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

**Manuscripts.** Four complete copies of the manuscript and artwork should be submitted to:

Dr Keith N Frayn  
Chairman of the Editorial Board  
The British Journal of Nutrition  
The Nutrition Society  
10 Cambridge Court  
210 Shepherds Bush Road

## Contents

### Guest Editorial

The early days of the *British Journal of Nutrition*.

*C. C. Balch*

493–496

### Human and Clinical Nutrition

Energy intakes, anthropometry and body composition of Nigerian adolescent girls: a case study of an institutionalized secondary school in Ibadan.

*Abiodun H. Cole, Omowumi O. Taiwo, Ngozi I. Nwagbara & Cornelia E. Cole*

497–509

Acute effects of exercise on energy intake and feeding behaviour.

*Pascal Imbeault, Sylvie Saint-Pierre, Natalie Alm eras & Angelo Tremblay*

511–521

Diurnal trends in responses of blood plasma concentrations of glucose, insulin, and C-peptide following high- and low-fat meals and their relation to fat metabolism in healthy middle-aged volunteers.

*David L. Frape, Norman R. Williams, A. J. Scriven, Christopher R. Palmer, Kathryn O'Sullivan & Reginald J. Fletcher*

523–535

Postprandial coagulation factor VII activity: the effect of monounsaturated fatty acids.

*Helen M. Roche & Michael J. Gibney*

537–549

Long-term supplementation with selenate and selenomethionine: urinary excretion by New Zealand women.

*Marion F. Robinson, Christine D. Thomson, Christopher P. Jenkinson, Gu Luzhen & Philip D. Whanger*

551–563

### Animal Nutrition

Protein utilization during energy undernutrition in sheep sustained by intragastric infusion: effects of protein infusion level, with or without sub-maintenance amounts of energy from volatile fatty acids, on energy and protein metabolism.

*S. A. Chowdhury, E. R. Ørskov, F. D. DeB. Hovell, J. R. Scaife & G. Mollison*

565–576

Excretion of benzoic acid derivatives in urine of sheep given intraruminal infusions of 3-phenylpropionic and cyclohexanecarboxylic acids.

*J. H. Pagella, X. B. Chen, N. A. MacLeod, E. R. Ørskov & P. J. S. Dewey*

577–592

Tissue localization of threonine oxidation in pigs.

*Nathalie Le Floc'h, Jean-No el Thibault & Bernard S ve*

593–603

### General Nutrition

Effect of dietary fats rich in lauric, myristic, palmitic, oleic or linoleic acid on plasma, hepatic and biliary lipids in cholesterol-fed hamsters.

*Elke A. Trautwein, Angelika Kunath-Rau, Juliane Dietrich, Stephan Drusch & Helmut F. Erbersdobler*

605–620

The effects of feeding suet-enriched chow on site-specific differences in the composition of triacylglycerol fatty acids in adipose tissue and its interactions *in vitro* with lymphoid cells.

*Christine A. Mattacks & Caroline M. Pond*

621–643

Linoleic and  $\alpha$ -linolenic acids differently modify the effects of elaidic acid on polyunsaturated fatty acid metabolism and some immune indices in rats.

*Tamiho Koga, Michiko Nonaka, Jiong Yan Gu & Michihiro Sugano*

645–656

Dietary fat affects lipids and anti-cardiolipin antibody levels in autoimmune-prone NZB/W F1 mice.

*Bi-Fong Lin, Su-Jen Jeng, Bor-Luen Chiang & Chao-Chi Huang*

657–669
