

## PREFACE

We have in this volume, compiled a connected account of the proceedings of the Symposium on Wolf-Rayet and High-Temperature Stars held at Buenos Aires. The Organizing Committee had assigned broad areas of topical interest to be reviewed by invited speakers. Each of these presentations was followed by lengthy discussions that were tape recorded and transcribed later. These discussions have been edited only to a limited extent. We have shortened them and rearranged them to bring about a greater coherence. We have, however, attempted to retain the tenor of the discussions, the flavour of impromptu remarks and the continuity of an argument. Much of the success of such a venture depends on the contributors to the discussions. To be able to make these thoughts available to a larger audience has been the task of those responsible for the elaborate tape recording of the proceedings. We thank those at the Instituto de Astronomía y Física del Espacio for the efficient way in which this responsibility has been discharged. Many at Buenos Aires and Kodaikanal have contributed efficient assistance to the preparation of this volume and we are deeply indebted for their help. In particular, two amongst these, Nora Martinez and A. M. Batcha have contributed overwhelmingly both to the organization of the symposium and the final preparation of the symposium volume.

Financial support for this symposium came from the International Astronomical Union and the Argentine National Research Council. The Faculty of Exact and Natural Sciences of the University of Buenos Aires also sponsored the Symposium. We are grateful to all these for the support they have provided us.
