

ERRATUM

Employer-provided childcare across the 50 United States: the normative importance of public childcare and female leadership – ERRATUM

Rosa Daiger von Gleichen

DOI: <https://doi.org/10.1017/S0047279423000491>. Published by Cambridge University Press, 23 October 2023.

The above article was published with errors in four tables and one error in the text. In the second paragraph of page 2, “more generous public family policy” should read “more generous employer family policy”. The correct tables are available below. The Publisher and author apologise for the errors.

Table 3. Average marginal effects based on logistic regression models

| | FSAs | Non-FSAs | | |
|--|--------|----------|--------|-------|
| Public childcare without income cap (ref: cap or no program) | -.02 | (.03) | .05* | (.02) |
| High-general skills industry (ref: non-HGS industry) | .13*** | (.03) | .02 | (.03) |
| Prevalence of female executives (ref: no female executives) | | | | |
| Women on some executive levels | .12** | (.05) | .06* | (.03) |
| Women on all executive levels | .16* | (.07) | .19*** | (.05) |
| Pseudo R ² | .06 | | .06 | |
| N | 880 | | 878 | |

Note: Original calculations. Models control for number of employees, presence of unionized employees; as well as state-level gdp per capita, female labor force participation and gendered breadwinner/carer preferences. Full models presented in table A6 of the appendix. *p < 0.05, **p < 0.01, ***p < 0.001.

Table A3. Descriptive statistics of control variables for each model

| | FSAs | Non-FSAs | |
|---|------|----------|---------|
| Difficulty filling vacancies | | | |
| No difficulty filling vacancies | 156 | 18% | 156 |
| Difficulty: entry-level/hourly positions | 43 | 5% | 42 |
| Difficulty: highly skilled positions | 403 | 46% | 402 |
| Difficulty: both types of positions | 278 | 32% | 278 |
| Percent of female employees in 10% increments | | | |
| Mean | | 4.64% | 4.63% |
| SD | | 2.39% | 2.39% |
| Min | | 0.10% | 0.10% |
| Max | | 9.90% | 9.90% |
| Size by number of employees | | | |
| 50 - 249 employees | 577 | 66% | 576 |
| 250+ employees | 303 | 34% | 302 |
| Percent of unionized employees | | | |
| less than 1 % | 707 | 80% | 704 |
| At least 1 % | 173 | 20% | 174 |
| State GDP: Per state per capita in 2016 USD | | | |
| Mean | | 54,771 | 54,776 |
| SD | | 11,040 | 11,049 |
| Min | | 33,684 | 33,684 |
| Max | | 174,150 | 174,150 |
| Female labor force participation: Rate by state | | | |
| Mean | | 73% | 73% |
| SD | | 4% | 4% |
| Min | | 62% | 63% |
| Max | | 81% | 81% |
| Percent of people in state who prefer male breadwinner/female caregiver | | | |
| Mean | | 31% | 31% |
| SD | | 8% | 8% |
| Min | | 0% | 0% |
| Max | | 57% | 57% |
| N | 880 | 100% | 878 |
| | | | 100% |

Table A5. Average marginal effects based on multinomial logistic regression model

| | Neither | Only FSAs | Only Non-FSAs | Both |
|-------------------------------------|------------------|---------------|---------------|-----------------|
| Public childcare without income cap | -.02 (.03) | -.03 (.04) | .03* (.02) | .02 (.02) |
| Prevalence of female executives | | | | |
| Women on some executive levels | -.13** (.04) | .06 (.05) | -.00 (.02) | .07*** (.02) |
| Women on all executive levels | -.23*** (.06) | -.03 (.07) | -.07 (.04) | .12** (.04) |
| High-general skills industry | -.11** (.03) | .09* (.04) | -.01 (.02) | .03 (.02) |
| Pseudo R ² = 0.08 | | | | |
| N = 876 | | | | |

Note: Original calculations. The table shows associations with different outcome values of a single dependent variable. Model controls for number of employees, presence of unionized employees; as well as state-level gdp per capita, female labor force participation and gendered breadwinner/carer preferences. Full model available upon request. *p < 0.05, **p < 0.01, ***p < 0.001.

Table A6. Average marginal effects based on logistic regression (full models)

| | FSAs | Non-FSAs | |
|---|-----------------|-----------------|--|
| Public childcare without income cap | -.02 (.03) | .05* (.02) | |
| High-general skills industry | .13*** (.03) | .02 (.03) | |
| Prevalence of female executives (ref: no female executives) | | | |
| Women on some executive levels | .12** (.05) | .06* (.03) | |
| Women on all executive levels | .16* (.07) | .19*** (.05) | |
| Percent of female employees | .01 (.01) | .01* (.01) | |
| Difficulty filling vacancies (ref: no difficulty filling vacancies) | | | |
| Difficulty: entry-level/hourly positions | -.20* (.08) | .02 (.05) | |
| Difficulty: highly skilled positions | .09* (.04) | .02 (.03) | |
| Difficulty: both types of positions | -.05 (.05) | .04 (.03) | |
| Employer size | .09* (.04) | .02 (.03) | |
| Unionized employees | .07 (.04) | .07* (.03) | |
| GDP per state | .00 (.00) | .00 (.00) | |
| female labor force participation | .01** (.01) | .00 (.00) | |
| State population preferring MBFC model | .01 (.00) | .00 (.00) | |
| Pseudo R ² | .06 | .06 | |
| N | 880 | 878 | |

Note: Original calculations. *p < 0.05, **p < 0.01, ***p < 0.001.
