

## **Editorial**

We announced in Volume 6, arrangements for a special issue of Diagnostics in Laser Fusion under the Guest Editorship of Dr. E. M. Campbell (Lawrence Livermore National Laboratory) scheduled for the May 1989 issue. Now, this special issue must be postponed to Volume 8 in early 1990. Thus a few contributed papers may still be considered for acceptance, providing authors can contact Dr. Campbell before July 1989.

The reason for the delay of this issue involves an overload of conference issues and regular manuscripts which make it necessary to reorganize the sequence of future volumes. Thus, the following conference issues are currently scheduled: US–Japan Seminar, August 1988; Beams 88, Karlsruhe July 1988; and ECLIM Madrid, October 1988. An understanding by the readers of the necessity for this decision is kindly requested.
