

Glasgow Mathematical Journal

Formerly Proceedings of the Glasgow Mathematical Association

CONTENTS

Julian Weissglass , Radicals of semigroup rings	85
Dennis A. Hejhal , On the loci $ f(z) = R$, $f(z)$ entire	94
S. O. Iyahen , Semiconvex spaces II	103
A. W. Mason , Lattice subgroups of free congruence groups	106
James S. W. Wong , Remarks on the asymptotic behaviour of perturbed linear systems	116
C. J. Tranter , Some triple trigonometrical series	121
Ian Anderson , A variance method in combinatorial number theory	126
M. J. Tomkinson , \mathfrak{F} -injectors of locally soluble FC -groups	130
J. Riddell , Sets of integers containing no n terms in geometric progression	137
Eutiquio C. Young , Riemann's method and the characteristic value and Cauchy problems for the damped wave equation	147
D. A. Brannan and W. E. Kirwan , A covering theorem for typically real functions	153
Ian N. Sneddon , The inversion of Hankel transforms of order zero and unity	156
W. N. Everitt , An elementary inequality in function theory	162
John Tweed , A note on the thermoelastic problem for a penny-shaped crack	169

GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 160 pages.

The prepaid subscription for each Volume is Fifty Shillings (U.S.A. \$7.00), post free. Single parts may be supplied at a cost of Twenty Five Shillings each (U.S.A. \$3.50), net.

Copies may be ordered direct from the publishers or from any bookseller.

Information for Contributors

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:
