Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 17, 2014 (12 issues):
Internet/print package: £1063/\$2040 Americas only/€1704 EU only
Internet only: £790/\$1497 Americas only/€1256 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

- Sugar: moving from evidence to action
M Tseng and A Hodge 2147

Commentaries

- Sugars and health – risk assessment to risk management
AS Anderson 2148
- Global sugar guidelines: an opportunity to strengthen nutrition policy
AM Thow and C Hawkes 2151

HOT TOPIC – Sugar

- Energy drinks and other dietary supplement use among adolescents attending secondary schools in Trinidad and Tobago
TJ Babwah, RG Maharaj and P Nunes 2156
- Current patterns of water and beverage consumption among Mexican children and adolescents aged 1–18 years: analysis of the Mexican National Health and Nutrition Survey 2012
C Piernas, S Barquera and BM Popkin 2166
- A new understanding of the relationship between sugars, dental caries and fluoride use: implications for limits on sugars consumption
A Sheiham and WPT James 2176
- Sugar-sweetened carbonated beverage consumption and childhood/adolescent obesity: a case–control study
N Martin-Calvo, M-A Martínez-González, M Bes-Rastrollo, A Gea, MC Ochoa, A Marti and GENOI Members 2185
- Local food environments are associated with girls' energy, sugar-sweetened beverage and snack-food intakes
AL Deierlein, MP Galvez, IH Yen, SM Pinney, FM Biro, LH Kushi, S Teitelbaum and MS Wolff 2194
- The association of soda sales tax and school nutrition laws: a concordance of policies
KL Greathouse, J Chriqui, RP Moser, T Agurs-Collins and FM Perna 2201
- Monitoring and surveillance**
- Trends in thinness prevalence among adolescents in ten European countries and the USA (1998–2006): a cross-sectional survey
G Lazzeri, S Rossi, C Kelly, C Vereecken, N Ahluwalia and MV Giacchi 2207
- BMI and sociodemographic correlates of body image perception and attitudes in school-aged children
O Duchin, M Mora-Plazas, C Marin, CM de Leon, JM Lee, A Baylin and E Villamor 2216

- Association of breakfast consumption with objectively measured and self-reported physical activity, sedentary time and physical fitness in European adolescents: the HELENA (Healthy Lifestyle in Europe by Nutrition in Adolescence) Study
M Cuenca-García, JR Ruiz, FB Ortega, I Labayen, M González-Gross, LA Moreno, S Gomez-Martinez, D Ciarapica, L Hallström, A Wästlund, D Molnar, F Gottrand, Y Manios, K Widhalm, A Kafatos, S De Henauw, M Sjöström and MJ Castillo on behalf of the HELENA Study Group 2226

Assessment and methodology

- Reproducibility and validity of a quantitative FFQ designed for patients with type 2 diabetes mellitus from southern Brazil
RA Sarmiento, JP Antonio, BP Riboldi, KR Montenegro, R Friedman, MJ de Azevedo and JC de Almeida 2237
- Waist:height ratio: a superior index in estimating cardiovascular risks in Turkish adults
R Meseri, R Ucku and B Unal 2246
- A frequency questionnaire to estimate free-living physical activity among Tunisian preadolescent and adolescent children
HB Gharbia, A Gartner, P Traissac, F Delpuech, B Maire and J El Ati 2253

Epidemiology

- Nutritional quality of food items on fast-food 'kids' menus: comparisons across countries and companies
E Hobin, C White, Y Li, M Chiu, MF O'Brien and D Hammond 2263
- Eating out is associated with self-reported food poisoning: a Western Australia population perspective, 1998 to 2009
CM Pollard, X Meng, S Williamson, J Dodds and CW Binns 2270
- Vegetable and fruit consumption, education and plasma vitamin C concentration in Russian and Finnish Karelia, 1992–2002
L Paalanen, R Prättälä, G Alftan, I Salminen and T Laatikainen 2278
- Anthropometry and physical activity level in the prediction of metabolic syndrome in children
ACR Andaki, ALA Tinôco, EL Mendes, RA Júnior, AP Hills and PRS Amorim 2287
- Physical activity and sedentary behaviour in European children: the IDEFICS study
AM Santaliestra-Pasías, T Mouratidou, V Verbestel, K Bammann, D Molnar, S Sieri, A Siani, T Veidebaum, S Mårild, L Lissner, C Hadjigeorgiou, L Reisch, I De Bourdeaudhuij and LA Moreno, on behalf of the IDEFICS Consortium 2295

- Family structure and childhood obesity: results of the IDEFICS Project
A Formisano, M Hunsberger, K Bammann, B Vanaelst, D Molnar, LA Moreno, M Tornaritis, T Veidebaum, L Lissner, G Barba and A Siani 2307
- Association of regional body fat with metabolic risks in Chinese women
X Fu, A Song, Y Zhou, X Ma, J Jiao, M Yang and S Zhu 2316

Nutrition and health

- The influence of vitamin A status on iron-deficiency anaemia in anaemic adolescent schoolgirls in Myanmar
MK Htet, U Fahmida, D Dillon, A Akib, B Utomo and DI Thurnham 2325
- Legumes and meat analogues consumption are associated with hip fracture risk independently of meat intake among Caucasian men and women: the Adventist Health Study-2
V Lousuebsakul-Matthews, DL Thorpe, R Knutsen, WL Beeson, GE Fraser and SF Knutsen 2333

Interventions

- Factors associated with not using folic acid supplements preconceptionally
J Manniën, A de Jonge, MC Cornel, E Spelten and EK Hutton 2344
- Nutritional and eating education improves knowledge and practice of patients with type 2 diabetes concerning dietary intake and blood glucose control in an outlying city of China
H Wang, Z Song, Y Ba, L Zhu and Y Wen 2351

Marketing and communication

- Temporality in British young women's magazines: food, cooking and weight loss
RJ Spencer, JM Russell and ME Barker 2359
- Characteristics of fast-food/takeaway-food and restaurant/café-food consumers among New Zealand adults
C Smith, AR Gray, EA Fleming and WR Parnell 2368

Special groups

- Waist-to-height ratio, inflammation and CVD risk in obese children
J Olza, CM Aguilera, M Gil-Campos, R Leis, G Bueno, M Valle, R Cañete, R Tojo, LA Moreno and A Gil 2378
