
The Coccidia of the World: A Central Clearing House

We are attempting to assemble a complete collection of the world's literature on the coccidia (Family Eimeriidae) of both invertebrate and vertebrate animals on a computer database. Descriptive data on all oocyst and life-cycle stages will be entered and cross-referenced by species, hosts(s), locality, author, and perhaps other parameters. The data will then be compiled by host group in whatever way seems most useful (e.g. invertebrate hosts by Phylum; vertebrate hosts by Family). Once established, the database can be added to and archived in appropriate places (for example, the U.S. National Parasite Collection, Beltsville MD) on a regular basis (perhaps each decade), and it can be made available to workers in the field for the cost of reproducing and mailing computer disks or hard copy. We would appreciate receiving a copy of any and all published papers in your reprint collection in which new species of coccidia are described or redescribed. Of most value are copies of old papers that have appeared in specialty journals or in non-English journals with limited circulations. Please mail reprints to Dr Donald W. Duszynski at the address below. Also, please continue to send copies of new papers as they are forthcoming. Any constructive suggestions you may have in this regard are welcomed. We thank you in advance for your cooperation.

IMMUNOLOGY

— and —

CELL BIOLOGY

ISSN 0818-9641
Published bimonthly
Editor in Chief:
Chris Parish

Immunology and Cell Biology is the official publication of The Australasian Society for Immunology and publishes full papers and brief communications describing original research, methods or concepts in the broad fields of immunology and cell biology. A particular emphasis of the journal is the publication of theoretical articles.

High quality research articles are published in these subject areas:

- immunochemistry
- immunogenetics
- allergy
- transplantation immunology
- cancer immunology
- clinical immunology
- cellular immunology

Immunology and Cell Biology is covered by *Medline*, *Index Medicus*, *CABS*, *Current Contents/Life Sciences*, *University Microfilms*, *EMBASE*, *Immunology Abstracts*, *AIDS Information*, *ADONIS*, *Science Citation Index*, *Scisearch*, *Research Alert* and *AMI*.

The Journal is published bimonthly in February, April, June, August and October. The subscription prices for 1993 are A\$215.00 (Australasia), or UK£144.00/US\$199.00/A\$259.00 (overseas), including surface post within Australia and surface air delivery elsewhere.

Parasitology

Back volumes. Vols. 1–71: Inquiries should be addressed to Wm. Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Vols. 72 onwards: quotations for parts still in print may be obtained from Cambridge or the American Branch of Cambridge University Press.

Copying. This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0031–1820/93 \$5.00 + .00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service. 3051 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Claims for missing issues can only be considered if made immediately after receipt of the subsequent issue.

Advertising. Details of advertising in *Parasitology* may be obtained from the publisher.
