Annals of Botany, now celebrating its centenary year of publication, is a journal that gives broad coverage to all aspects of botany. It emphasizes current research in growth physiology and plant structure. The journal attracts short communications, research papers and longer articles that are essential reading for the research workers who aim to keep abreast of their own related subjects. Book reviews are also published.

Books on Natural History

Golden Days in the Desert:

Flowers of Saudi Arabia £28

A photographic study by Betty A. Lipscomb Vincent of the still relatively little documented flora of Saudi Arabia with over 120 colour plates illustrating 63 plant species.

Inland Birds of Saudi Arabia £30

Lavishly illustrated with full colour photographs by the author Jill Silsby, this title includes details of migratory and nesting birds together with information on habitat and sightings.

Red Sea Reef Fishes £32

Dr. John E. Randall describes in detail 325 species of Red Sea reef fishes, enhanced by the author's own colour photographs.

Divers' Guide to Red Sea Reef Fishes £20

Waterproof supplementary volume to the above, containing numerous colour photographs, with common and scientific names of each species.

The Red Sea £24

An informative and colourful book in which author, Dr. Peter Vine explores all aspects of the Red Sea with emphasis on its rich marine environment.

Sharks of Arabia £26

Just published, this is the latest addition to our knowledge of Red Sea, Indian Ocean and Arabian Gulf Sharks. Dr. Randall has combined scientific accuracy with a presentation which is of interest to the general reader and scientist alike.

To be published – Autumn 1986

Red Sea Handbook: Guide to Dangerous Animals

In this book the author, Dr. Peter Vine, aims to inform divers of some of the dangers of the Red Sea's marine environment and gives advice on how to avoid accidents, or deal with them should they occur.

Red Sea Invertebrates

In this well-researched book, Dr. Vine provides an up to date description of invertebrate species found in the Red Sea, with comprehensive checklists which will be of use to amateur and professional divers alike.

Ecological notes, over 270 full colour photographs and many detailed line drawings serve to make this an attractive publication for anyone with an interest in marine life.
