

**NAGOYA  
MATHEMATICAL JOURNAL**

**VOL. 70**

July 1978

**PUBLISHED BY  
DEPARTMENT OF MATHEMATICS, FACULTY OF SCIENCE  
NAGOYA UNIVERSITY**

Correspondences concerning subscription, and back issues  
of the journal should be addressed to

KINOKUNIYA BOOK-STORE CO., LTD.  
17-7 Shinjuku 3-chome, Shinjuku-ku  
TOKYO 160-91 JAPAN

or

KINOKUNIYA BOOK STORES  
OF AMERICA CO., LTD.  
West Bldg., Japanese Cultural and  
Trade Center  
1581 Webster St.,  
San Francisco, CALIFORNIA 94115,  
U.S.A.

The annual subscription price for 1978 is about \$ 83.00

NAGOYA  
MATHEMATICAL JOURNAL

VOL. 70

July 1978

Edited by

TAKEYUKI HIDA, NOBORU ITO, TOMIO KUBOTA (Managing Editor),  
HIDEYUKI MATSUMURA, HISASI MORIKAWA, AKIHIKO MORIMOTO,  
KATUZI ONO, YOSHIHIRO SHIKATA, KÔSAKU YOSIDA

PUBLISHED BY  
DEPARTMENT OF MATHEMATICS, FACULTY OF SCIENCE  
NAGOYA UNIVERSITY

Nagoya Mathematical Journal is, in principle, the official organ of the Department of Mathematics, Nagoya University, designed solely for the publication of research papers. However, some invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German with sufficient space between lines, and special letters such as bold-face, German, Greek, and script should be clearly marked. All single letters used in formulas will appear in italic, and mathematical symbols will appear in the standard style usual for mathematical literature. Therefore, it is not required to mark such letters and symbols. Instructions which conflict with the general printing rules of the journal will not be accepted. For example, each paragraph title should appear in bold-face. Good reproductions of a typewritten manuscript are acceptable.

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Each author, as well as each co-author, will have 100 reprints, while only one set of proof will be prepared per paper for proof-reading by the author(s). Therefore, a joint paper must carry instructions as to whom the proof should be sent. Attached to the proof, an order form will be sent to the author for the additional reprints which are available at approximately 3¢ per page.

The actual business of the Nagoya Mathematical Journal is performed by the managing editor with the cooperation of editors residing in Nagoya.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Department of Mathematics, Faculty of Science, Nagoya University, Chikusa-ku, Nagoya, 464, Japan.

## CONTENTS

---

On global cluster sets for functions meromorphic on some Riemann surfaces . . . . .	S. SEGAWA	1
Picard principle for finite densities . . . . .	M. NAKAI	7
An example on canonical isomorphism . . . . .	M. NAKAI	25
Functions meromorphic on some Riemann surfaces . . . . .	S. SEGAWA	41
On singular sets of flat holomorphic mappings with isolated singularities . . . . .	H. OMOTO	47
Innovation processes associated with stationary Gaussian processes with application to the problem of prediction . . . . .	Y. OKABE	81
Examples of bad noetherian local rings . . . . .	M. G. MARINARI	105
Periodic solutions of certain nonlinear parabolic differential equations in domains with periodically moving boundaries . . . . .	Y. YAMADA	111
On eigenvalues in the continuum of 2-body or many-body Schrödinger operators . . .	K. MOCHIZUKI and J. UCHIYAMA	125
Some properties of ordinal diagrams . . . . .	M. YASUGI	143
On the existence of condenser potentials . . . . .	C. BERG	157
A note on some ordered ring . . . . .	M. YASUMOTO	167

On the maximal abelian $\ell$ -extension of a finite algebraic number field with given ramification .....	H. MIKI	183
