

ADDENDUM

Feature extraction and artificial neural networks for the on-the-fly classification of high-dimensional thermochemical spaces in adaptive-chemistry simulations—ADDENDUM

Giuseppe D'Alessio, Alberto Cuoci and Alessandro Parente

Doi: 10.1017/dce.2021.2 Published online by Cambridge University Press: 12 April 2021.

The editors and publisher of *Data-Centric Engineering* would like to include the Open Data badge in this article D'Alessio G, Cuoci A and Parente A (2021).

Open Data Badge—indicates that data necessary to reproduce the reported results are available in an open access repository, under an open licence, with an accompanying description of the data.

The original article has been updated to include the badge for data transparency. Please refer to the Data Availability Statement to find the identifier linking to the open data or open materials.
