

GLACIOLOGICAL LITERATURE

THIS is a selected list of glaciological literature on the scientific study of snow and ice and of their effects on the earth; for the literature on polar expeditions, and also on the "applied" aspects of glaciology, such as snow ploughs, readers should consult the bibliographies in each issue of the *Polar Record*. For Russian material the system of transliteration used is that agreed by the U.S. Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use in 1947. Readers can greatly assist by sending reprints of their publications to the Society, or by informing Dr. J. W. Glen of publications of glaciological interest. It should be noted that the Society does not necessarily hold copies of the items in this list, and also that the Society does not possess facilities for microfilming or photocopying.

GENERAL GLACIOLOGY

- BARCLAY, L. W. Sledging and surveying. (*In Brunt, Sir D., ed. The Royal Society International Geophysical Year Antarctic Expedition. Halley Bay, Coats Land, Falkland Islands Dependencies, 1955–59*, Vol. 4. London, Royal Society, 1964, p. 329–38.) [Navigation and surveying, Coats Land and Brunt Ice Shelf.]
- DRAKIN, A. G. Nekotorye itogi rabot sed'moy sovetskoy antarkticheskoy ekspeditsii [Some results of the work of the seventh Soviet Antarctic expedition]. *Problemy Arktiki i Antarktiki* [Problems of the Arctic and Antarctic], Vyp. 46, 1964, p. 35–40. [Summary of scientific results, 1961–63.]
- DUBROVIN, L. I., ed. *Pyataya kontinental'naya ekspeditsiya 1959–1961 gg. Materialy glyatsiologicheskikh issledovaniy na stantsii Lazarev* [Fifth continental expedition, 1959–61. Glaciological studies at "Lazarev" station]. *Trudy Sovetskoy Antarkticheskoy Ekspeditsii* [Transactions of the Soviet Antarctic Expedition], Tom 34, 1964, 89 p. [Snow and firn studies, structure and dynamics of the ice shelf, fast ice.]
- MACDOWALL, J. Glaciological observations. Part I. Glaciological observations at the base. (*In Brunt, Sir D., ed. The Royal Society International Geophysical Year Antarctic Expedition. Halley Bay, Coats Land, Falkland Islands Dependencies, 1955–59*, Vol. 4. London, Royal Society, 1964, p. 269–313.) [Snow accumulation measurements; height and temperature of, and wind profile immediately above, the ice shelf; daily summary of glaciological observations.]
- MACDOWALL, J., and others. Glaciological observations. Part II. Glaciological observations during sledging journeys, by J. MacDowall, L. W. Barclay and J. M. C. Burton. (*In Brunt, Sir D., ed. The Royal Society International Geophysical Year Antarctic Expedition. Halley Bay, Coats Land, Falkland Islands Dependencies, 1955–59*, Vol. 4. London, Royal Society, 1964, p. 314–25.) [Snow accumulation, ice-hill investigations and the surface of the ice shelf.]
- [ODISHAW, H., and others, ed.] Catalogue of data in the World Data Centers for the period of the International Geophysical Year and International Geophysical Cooperation—1959 (1 July 1957–31 December 1959). [Edited by H. Odishaw, P. J. Hart and R. Y. Dow.] *Annals of the International Geophysical Year*, Vol. 36, 1964, 744 p. [Glaciology, p. 295–343. Includes list of stations and titles of reports received.]
- SCHYTT, V. Scientific results of the Swedish glaciological expedition to Nordaustlandet, Spitsbergen, 1957 and 1958. *Geografiska Annaler*, Vol. 46, No. 3, 1964, p. 243–81. [General account of expedition; account of previous work. Detailed account of work done at Ahlmann station, and at Vestfonna, Sørfonna and Austfonna.]
- SHIH YA-FENG. Wu nien lai te Chung-kuo ping-ch'uan-hsüeh, tung-t'u-hsüeh yü kan-han ch'u-shui-wen yen-chiu [Chinese research on glaciology, permafrost and arid land hydrography during the past five years]. *Kexue Tongbao* (K'o-hsüeh T'ung-pao) [Scientia], 1964, No. 3, p. 218–25. [Summary of work done principally in relation to water resources. English translation: Dept. of Commerce, Office of Technical Services, Washington, D.C., JPRS:25,016, 10 June 1964.]
- STEVENSON, C. F., comp. A list of named glaciological features in Canada. *Gazetteer of Canada. Special Supplement* No. 1. Ottawa, Canada. Department of Mines and Technical Surveys. Geographical Branch, 1964. vii, 14 p. [Includes latitude, longitude and map reference.]

GLACIOLOGICAL INSTRUMENTS AND METHODS

- ANDERSEN, B. G. Deuterium variations related to snow pit stratigraphy in the Thiel Mountains, Antarctica. *Polarforschung*, Bd. 5, Jahrg. 33, Ht. 1–2, 1963 [pub. 1964], p. 200–01. [The summer snow has a considerably higher deuterium content than winter snow.]
- BAILEY, J. T., and others. Radio echo sounding of Polar ice sheets, by J. T. Bailey, S. Evans and G. de Q. Robin. *Nature*, Vol. 204, No. 4957, 1964, p. 420–21. [Echoes were obtained through 1,400 m. of ice by new apparatus.]
- BRANDENBERGER, A. J. Aerial triangulation in the Antarctic. *Photogrammetric Engineering*, Vol. 30, No. 2, 1964, p. 197–201. [Description of method used to determine ice flow between "Byrd" station and Whitmore Mountains.]
- CHAILLOU, A., and VALLON, M. Étude de la zone corticale des glaciers tempérés par prospection électrique, avec un potentiomètre d'impédance d'entrée infinie. *Annales de Géophysique*, Tom. 20, No. 2, 1964, p. 201–05. [The electrical examination of the upper layers of a glacier is limited, but the method has considerable applications in spite of this.]
- KUL'BITSIK, V. F. Bur dlya obrazovaniya kernov iz merzlogo grunta [Drill bit for drilling holes in frozen ground]. *Bulleten' Izobreteniya* [Bulletin of Inventions], Tom 40, No. 15, 1963, p. 116.
- LORIUS, C. Isotopes in relation to polar glaciology. *Polar Record*, Vol. 12, No. 77, 1964, p. 211–22. [Survey of use of radioactive isotopes in glaciology.]
- LORIUS, C. L'utilisation des isotopes dans l'étude glaciologique des calottes polaires. *TAAF (Territoire des Terres Australes et Antarctiques Françaises)*, No. 25, 1963, p. 2–19. (Expéditions Polaires Françaises (Missions Paul-Émile Victor), Publication No. 253.) [Age of some ice caps estimated by isotopes corresponds with age determined stratigraphically, but not in every case; further research is necessary.]

- NOTTARP, K. Elektronische Distanzmessung hoher Genauigkeit im Polargebiet. *Polarforschung*, Bd. 5, Jahrg. 33, Ht. 1-2, 1963 [pub. 1964], p. 180-81. [Use of tellurometers in Greenland and Antarctica, and modifications necessary. English abstract.]
- ÖSTREM, G. A method of measuring water discharge in turbulent streams. *Geographical Bulletin* (Ottawa), No. 21, 1964, p. 21-43. [Injection of brine into the river and downstream measurements of changes of electrical conductivity as the salt wave passes; includes a list of the field equipment needed.]
- WALFORD, M. E. R. Radio echo sounding through an ice shelf. *Nature*, Vol. 204, No. 4956, 1964, p. 317-19. [Method used and map of Brunt Ice Shelf with ice thicknesses along the route travelled.]

PHYSICS OF ICE

- EVANS, D. G., and HUTCHINSON, W. C. A. The electrification of freezing water droplets and of colliding ice particles. *Quarterly Journal of the Royal Meteorological Society*, Vol. 89, No. 381, 1963, p. 370-75. [Measurement of charge produced when supercooled droplets freeze.]
- FISCHER, W. H., and PERDUE, C. R. Shock-induced freezing of "activated" supercooled water. *Nature*, Vol. 204, No. 4960, 1964, p. 764-65. [Electromagnetic radiation emitted by mercury droplet in a bulb of neon gas raises temperature at which supercooled water freezes when agitated.]
- GARTEN, V. A., and HEAD, R. B. A theoretical basis of ice nucleation by organic crystals. *Nature*, Vol. 205, No. 4967, 1965, p. 160-62. [Study of possible factors affecting epitaxy of ice on organic crystals.]
- HOBBS, P. V., and MASON, B. J. The sintering and adhesion of ice. *Philosophical Magazine*, Eighth Ser., Vol. 9, No. 98, 1964, p. 181-97. [Experiments on small ice spheres in contact and theoretical interpretation.]
- KUROIWA, D. Netsufushokuhō de kansoku shita kōri no kemmamen no mamō [Surface damage on polished ice crystals revealed by thermal etching]. *Teion-kagaku* [Low Temperature Science], Ser. A, Vol. 22, 1964, p. 25-57. [Study of defects resulting from polishing procedures. English summary.]
- LATHAM, J. Symposium on ice crystals and ice nucleation, Berkeley, California, August 1963. *British Journal of Applied Physics*, Vol. 14, No. 12, 1963, p. 825-26. [Summary of recent work on properties of ice relevant to cloud physics.]
- LATHAM, J., and SAUNDERS, C. P. R. Aggregation of ice crystals in strong electric fields. *Nature*, Vol. 204, No. 4965, 1964, p. 1293-94. [Letter. Experimental investigation of adhesion of ice crystals to ice spheres shows that strong fields greatly assist adhesion.]
- LATHAM, J., and STOW, C. D. Electrification produced by collision between ice crystals and soft hail pellets in a thunderstorm. *Quarterly Journal of the Royal Meteorological Society*, Vol. 91, No. 387, 1965, p. 99-100. [Letter. Brief report on experiments and discussion of their implications for theory of thunderstorm electricity.]
- LLIBOUTRY, L. Nouveau calcul de la variation du point de fusion sous l'effet des contraintes et application au processus de fonte et regel sous-glaciaire. *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* (Paris), Tom. 258, No. 5, 1964, p. 1577-79. [Theory of depression of melting point of ice under a uniaxial stress.]
- MACCREADY, P. B., and PROUDFIT, A. Self-charging of melting ice. *Quarterly Journal of the Royal Meteorological Society*, Vol. 91, No. 387, 1965, p. 54-59. [Laboratory observation of positive charge acquired by water droplets on freezing in an air stream.]
- SAVEL'YEV, V. A., and SOKOLOV, N. D. Raschet udlineniya vodorodnoy svyazi pri izotopicheskem zameshchenii vo l'du [Calculation of the elongation of the hydrogen bond during isotopic substitution in ice]. *Fizika Tverdogo Tela* [Physics of the Solid State], Tom 5, Vyp. 11, 1963, p. 3273-75. [Translation in *Soviet Physics Solid State*, Vol. 5, No. 11, 1964, p. 2393-95.]
- STOTT, D., and HUTCHINSON, W. C. A. The electrification of freezing water drops. *Quarterly Journal of the Royal Meteorological Society*, Vol. 91, No. 387, 1965, p. 80-86. [Evidence for a charge separation across the boundary between freezing water and ice, water being positive and ice negative.]
- WAKAHAMA, G. Kōri no sosei henkei ni tsuite. V. Takesshōhyō no sosei henkei [On the plastic deformation of ice. V. Plastic deformation of polycrystalline ice]. *Teion-kagaku* [Low Temperature Science], Ser. A, Vol. 22, 1964, p. 1-24. [Optical observation of deformations in individual grains in a polycrystalline specimen. English summary.]

English summaries.]

ERRATA (Vol. 5, No. 39)

p. 308

In TABLE I, at point A1 the second value of b_2 in the $\dot{\epsilon}_{45}$ column should read $b_2 = +0.353$, not $+0.357$.

p. 309

In TABLE II the following corrections should be made in the values for the average strain-rates at the points A1 and A2: $\dot{\epsilon}_{xy} = +0.021$, not 0.041 ; $\dot{\epsilon}_2 = -0.26$, not -0.22 ; $\dot{\epsilon}_3 = -0.05$, not -0.09 .
