

Ergodic theory and dynamical systems

VOLUME 15 PART 3 JUNE 1995

EXECUTIVE EDITORS

W. Parry, Mathematics Institute, University of Warwick,
Coventry CV4 7AL, England.

Ya. B. Pesin, Department of Mathematics,
The Pennsylvania State University, University Park, Pennsylvania 16802, USA.
(e-mail: pesin@math.psu.edu)

M. Pollicott, Mathematics Institute, University of Warwick,
Coventry CV4 7AL, England.
(e-mail: mp@maths.warwick.ac.uk)

J.-P. Thouvenot, Laboratoire de Probabilités,
Université Paris 6, Tour 56, 4 Place Jussieu,
F-75252 Paris Cedex 05, France.

SURVEY EDITORS

M. R. Herman, Centre de Mathématiques, Ecole Polytechnique,
F-91128 Palaiseau, Cedex, France.

A. B. Katok, Department of Mathematics, The Pennsylvania State University,
University Park, Pennsylvania 16802, USA.

Ergodic theory and dynamical systems

St. Petersburg)
P. Walters (University of Warwick)
L.-S. Young (University of California,
Los Angeles)

Ergodic Theory and Dynamical Systems provides a focus for this important and rapidly developing area of mathematics and an opportunity to bring together many major contributors in the field which are, at the moment, scattered over a large number of non-specialist periodicals.

Dynamical methods have proved to be a powerful unifying force in mathematics in recent decades, and they are now beginning to be felt in allied subjects such as physics and biology. *Ergodic Theory and Dynamical Systems* acts as a forum for central problems of differential geometry, number theory, operator algebras, topological, differential and symbolic dynamics, and celestial and statistical mechanics.

Expository survey articles and conference proceedings will be included from time to time and reviews of relevant books will also be published.
