

*The  
principle  
behind  
Wright's  
Coal Tar  
Soap*

In Liquor Carbonis Detergens the antiseptic and antipruritic agents in Coal Tar were isolated for the first time from the inert residuum of substances lacking therapeutic value, and the preparation has been used and recommended by skin specialists for over 80 years.

It naturally followed that Liquor Carbonis Detergens was included in the basic formula of Wright's Coal Tar Soap. This powerful antiseptic principle gave the soap a character and value exclusively its own without the slightest risk of harshness to the skin. Wright's, in fact, is specially soothing and particularly thorough in its cleansing.
