

TABLE OF CONTENTS

Articles

- 99** Influence of alternative and conventional agricultural management on soil microbial processes and nitrogen availability
John W. Doran, Daniel G. Fraser, Martin N. Culik, and William C. Liebhardt
- 107** Self identified research needs of New York organic farmers
Brian P. Baker and Douglas B. Smith
- 114** Riparian forest communities and their role in nutrient conservation in an agricultural watershed
Joseph L. Fail, Jr., Bruce L. Haines, and Robert L. Todd
- 124** Agricultural chemicals in ground water: Preventing contamination by removing barriers against low-input farm management
Malcolm H. Fleming
- 132** Commentary: Establishing the proper role for on-farm research
William Lockeretz

Journal Staff

Editor – *Garth Youngberg*
Technical Editor – *William Lockeretz*
Associate Technical Editor – *Paul B. Marsh*
Book Review Editors – *Thomas C. Edens*
– *James F. Parr*
Contributing Editor – *Sara Ebenreck*
Assistant to the Editor – *Sarah C. Byler*
Circulation Manager/Word Processing –
Susan E. Ward
Art Director – *Randy White*

Subscription Information

The American Journal of Alternative Agriculture (ISSN 0889-1893) is published quarterly by the Institute for Alternative Agriculture, Inc., 9200 Edmonston Road, Suite 117, Greenbelt, MD 20770. The IAA is not responsible for statements and opinions expressed by authors. Subscriptions: Institutions \$40 a year (\$45 foreign); Individuals \$20 a year (\$25 foreign); IAA Members \$15 a year (\$20 foreign); Students \$10 a year (\$15 foreign). Single copies \$6. Second Class postage paid at Greenbelt, MD. Postmaster: Send address changes to American Journal of Alternative Agriculture, 9200 Edmonston Road, Suite 117, Greenbelt, MD 20770.

Institute Information

The Institute for Alternative Agriculture is a nonprofit, tax-exempt research and education organization established in 1983 to encourage and facilitate the adoption of low-cost, resource-conserving and environmentally-sound farming methods. It works closely with producer groups, public research and education institutions, and government agencies in promoting a sustainable agriculture system.

Its programs include providing a national information clearinghouse, serving as a voice for sustainable agriculture in Washington, and developing and implementing research and educational outreach programs. It holds an annual scientific symposium and publishes a monthly newsletter.

The Institute is governed by a 13-member Board of Directors, which includes several commercial-scale organic farmers, and maintains a small professional staff. It is supported by memberships and donations and grants from foundations, corporations, and individuals.

Cover

The cover photo shows a caterpillar hunter belonging to the genus *Calosoma* devouring a corn earworm larva. Ground beetles (Family: Carabidae and Order: Coleoptera) such as this one are members of a large and beneficial family of beetles. As nocturnal generalist predators, these abundant insects are important in the biological control of several important agricultural pests including cutworms and armyworms. It was provided by Professor Garfield J. House, Department of Entomology, North Carolina State University, Raleigh, North Carolina.
