

INFECTION CONTROL & HOSPITAL EPIDEMIOLOGY

30th ANNIVERSARY YEAR

VOLUME 31, NUMBER 3

MARCH 2010

SHEA GUIDELINE

- 203 **SHEA Guideline for Management of Healthcare Workers Who Are Infected with Hepatitis B Virus, Hepatitis C Virus, and/or Human Immunodeficiency Virus** • David K. Henderson, MD; Louise Dembry, MD, MS, MBA; Neil O. Fishman, MD; Christine Grady, RN, PhD; Tammy Lundstrom, MD, JD; Tara N. Palmore, MD; Kent A. Sepkowitz, MD; David J. Weber, MD, MPH; for the Society for Healthcare Epidemiology of America

ORIGINAL ARTICLES

- 233 **Influenza Vaccination among Healthcare Workers: Ten-Year Experience of a Large Healthcare Organization** • M. Cristina Ajenjo, MD; Keith F. Woeltje, MD, PhD; Hilary M. Babcock, MD, MPH; Nancy Gemeinhart, RN, MHA; Marilyn Jones, RN, MPH; Victoria J. Fraser, MD
- 241 **A Quality Improvement Initiative to Reduce Central Line-Associated Bloodstream Infections in a Neonatal Intensive Care Unit** • Matthew J. Bizzarro, MD; Barbara Sabo, APRN; Melanie Noonan, RN; Mary-Pat Bonfiglio, RN; Veronika Northrup, MPH; Karen Diefenbach, MD for the Central Venous Catheter Initiative Committee
- 249 **Factors Associated with Time to Acquisition of Bloodstream Infection in a Pediatric Intensive Care Unit** • Maria Júlia Gonçalves de Mello, MD, PhD; Maria de Fátima Pessoa Militão de Albuquerque, MD, PhD; Ricardo Arraes de Alencar Ximenes, MD, PhD; Heloísa Ramos Lacerda, MD, PhD; Eduardo Jaime Seara Ferraz, MSc; Rita Byington, MSc; Maria Tereza Serrano Barbosa, PhD
- 256 **Optimizing Empirical Antimicrobial Therapy for Infection due to Gram-Negative Pathogens in the Intensive Care Unit: Utility of a Combination AntibioGram** • Jennifer Christoff, MD; Jocelyn Tolentino, MPH; Emily Mawdsley, MD; Scott Matushek, MS; David Pitrak, MD; Stephen G. Weber, MD, MS
- 262 **Multicenter Study of Surveillance for Hospital-Onset *Clostridium difficile* Infection by the Use of ICD-9-CM Diagnosis Codes** • Erik R. Dubberke, MD; Anne M. Butler, MS; Deborah S. Yokoe, MD, MPH; Jeanmarie Mayer, MD; Bala Hota, MD, MPH; Julie E. Mangino, MD; Yosef M. Khan, MD; Kyle J. Popovich, MD; Kurt B. Stevenson, MD, MPH; L. Clifford McDonald, MD; Margaret A. Olsen, PhD, MPH; Victoria J. Fraser, MD; for the Prevention Epicenters Program of the Centers for Disease Control and Prevention
- 269 **An Integrated Approach to Methicillin-Resistant *Staphylococcus aureus* Control in a Rural, Regional-Referral Healthcare Setting** • William A. Bowler, MD, FACP; Jeanine Bresnahan, CIC; Ann Bradfish, RN; Christine Fernandez, RN
- 276 **Attributable Costs of Surgical Site Infection and Endometritis after Low Transverse Cesarean Delivery** • Margaret A. Olsen, PhD, MPH; Anne M. Butler, MS; Denise M. Willers, MD; Gilad A. Gross, MD; Barton H. Hamilton, PhD; Victoria J. Fraser, MD
- 283 **Systematic Review of Studies on Compliance with Hand Hygiene Guidelines in Hospital Care** • Vicki Erasmus, MSc; Thea J. Daha; Hans Brug, PhD; Jan Hendrik Richardus, MD, PhD; Myra D. Behrendt, MSc; Margreet C. Vos, MD, PhD; Ed F. van Beeck, MD, PhD

THE OFFICIAL JOURNAL OF THE SOCIETY FOR HEALTHCARE EPIDEMIOLOGY OF AMERICA

CONTENTS CONTINUED INSIDE

THE UNIVERSITY OF CHICAGO PRESS

Data mining is only the beginning.

BD Protect™ is the **first** infection surveillance and data management system to help fight infections on all levels:

- Patients
- Healthcare Workers
- Community

In the fight against healthcare-associated infections, protecting your patients, employees and community has you digging deep for time, energy and resources.

BD Protect Infection Prevention goes beyond data mining to provide a complete solution to help achieve your infection prevention goals.

Be in control of unfolding events with intelligent alerts and on-demand reports. Review real-time information from surgery, microbiology, rapid diagnostic tests, admissions, pharmacy. Organize your rounds and complete follow-up actions. Determine which data you want to analyze and when. Study outcomes and processes. Benchmark and report to NHSN.

Go beyond data mining.
Turn real-time information
into real-time results.

To learn more, visit us on the web at www.bd.com/ds/informatics, email us at BDProtect@bd.com, or call us at **800.426.8015**.

INFECTION CONTROL & HOSPITAL EPIDEMIOLOGY

VOLUME 31, NUMBER 3

MARCH 2010

CONTENTS CONTINUED FROM COVER

CONCISE COMMUNICATIONS

- 295 **Comparison of the Duration of Antimicrobial Activity of 2 Different Antimicrobial Central Venous Catheters** • Theofilos Matheos, MD; J. Matthias Walz, MD; Janice P. Adams, MS, ACNP; Karen Johnson, RN; Karen Longtine, RN; Jaclyn Longtine, BS; Melissa O'Neill, RN; Stephen O. Heard, MD
- 298 **Risk Factors for Subsequent Diagnosis of Prosthetic Joint Infection** • Saima Aslam, MD, MS; Charles Reitman, MD; Rabih O. Darouiche, MD
- 302 **Is High Consumption of Antibiotics Associated with *Clostridium difficile* Polymerase Chain Reaction–Ribotype 027 Infections in France?** • Gabriel Birgand, PharmD, MPH; Katuska Miliani, MPH; Anne Carbonne, MD; Pascal Astagneau, MD, PhD

RESEARCH BRIEFS

- 306 **Healthcare Worker with “Pertussis”: Consequences of a False-Positive Polymerase Chain Reaction Test Result** • David J. Weber, MD, MPH; Melissa B. Miller, PhD; Rebecca H. Brooks, RN; Vickie M. Brown, RN, MPH; William A. Rutala, PhD, MPH
- 307 **How Accurately Are Starting Times Documented in the Medical Record? Implications for Surgical Infection Prevention Performance Measurement** • Michele R. Bozikis, MPH; Barbara I. Braun, PhD; Stephen B. Kritchevsky, PhD

LETTERS TO THE EDITOR

- 310 **Implementation of an Infection Control Bundle in a School to Reduce Transmission of Influenza-Like Illness during the Novel Influenza A 2009 H1N1 Pandemic** • Anucha Apisarnthanarak, MD; Piyaporn Apisarnthanarak, MD; Boonsri Cheevakumjorn, PhD; Linda M. Mundy, MD, PhD
- 311 **Higher Incidence of Catheter-Related Bacteremia in Jugular Site with Tracheostomy than in Femoral Site** • Leonardo Lorente, MD, PhD; Alejandro Jiménez, PhD; Cayetano Naranjo, MD; Jorge Martínez, MD; José Luis Iribarren, MD, PhD; Juan José Jiménez, MD, PhD; Ruth Santacreu, MD; María M. Martín, MD; María Luisa Mora, MD, PhD
- 313 **Incidence of *Clostridium difficile* Infection in Patients with Acute Leukemia and Lymphoma after Allogeneic Hematopoietic Stem Cell Transplantation** • Sharon Leung, MD; Brian S. Metzger, MD, MPH; Brian P. Currie, MD, MPH
- 315 **Cryptococcus Neoformans as a Rare Cause of Hospital Infection** • Iلسis Miozzo; Valerio R. Aquino, MS; Marcelle Duarte, MD; Rodrigo P. Santos, PhD, MD; Luciano Z. Goldani, PhD, MD
- 317 **Legionella in an Ice Machine May Be a Sentinel for Drinking Water Contamination** • Victor L. Yu, MD; Janet E. Stout, PhD
- 318 **Reply to Yu and Stout** • Audrey N. Schuetz, MD, MPH; Bruce S. Ribner, MD, MPH

Infection Control and Hospital Epidemiology (ISSN 0899-823X) is published monthly by the University of Chicago Press, 1427 E. 60th St., Chicago, IL 60637-2954 (<http://www.journals.uchicago.edu/ICHE/>). The editorial office is in Chicago, Illinois.

Editorial Office

Communications should be addressed to the Editor, *Infection Control and Hospital Epidemiology*, 1427 E. 60th St., Chicago, IL 60637-2954; (e-mail: iche@press.uchicago.edu); telephone: 773-773-2298, fax: 773-753-4247. Contributors should consult the Information for Authors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to Journals Advertising, University of Chicago Press, 1427 E. 60th St., Chicago, IL 60637 (e-mail: cbarhany@press.uchicago.edu); telephone: 773-702-8187; fax: 773-702-0172). Publication of an advertisement in *Infection Control and Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by the University of Chicago. Correspondence regarding advertising should be addressed to the advertising office in Chicago.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>). For all other uses, such as copying for general distribution,

for advertising or promotional purposes, for creating new collective works, or for resale, please contact the Permissions Coordinator, Journals Division, University of Chicago Press, 1427 E. 60th St., Chicago, IL 60637 (e-mail: journalpermissions@press.uchicago.edu; fax: 773-834-3489). Articles in the public domain may be used without permission, but it is customary to contact the author.

Subscriptions

Subscription rates for 2010 are \$180 for individuals and \$413 for institutions. Single-copy rates are \$18 for individuals and \$41 for institutions. Additional rates for non-US subscribers and reduced rates for fellows, residents, and students are available at <http://www.journals.uchicago.edu/ICHE>. Individuals have the option to order directly from the University of Chicago Press. Subscription agent for Japan: Kinokuniya Company, Ltd.

Please direct subscription inquiries, requests for back issues, and address changes to Journals Division, University of Chicago Press, P.O. Box 37005, Chicago, IL 60637 (e-mail: subscriptions@press.uchicago.edu; telephone: 773-753-3347 or toll-free in the United States and Canada 877-705-1878; fax: 773-753-0811 or toll-free 877-705-1879).

Postmaster: Send address changes to *Infection Control and Hospital Epidemiology*, University of Chicago Press, P.O. Box 37005, Chicago, IL 60637-2954.

Periodicals postage paid at Chicago, Illinois, and at an additional mailing office.

We made protecting your environment a measurable science

There's an important link between environmental hygiene and HAIs. That's why we took a proactive approach to hospital-wide cleaning. Our technical experts enlisted customers to help develop a systematic approach to patient room cleaning. The key to success is the right tools, the right level of disinfectant dispensed and applied to surfaces, and the right training to yield desired outcomes. Combine that with the DAZO® fluorescent marking solution for monitoring cleaning effectiveness, and we've developed a system to deliver optimal, measurable outcomes.

ECOLAB®
Everywhere It Matters.

WAS IT PREVENTABLE?

Early identification and treatment of HAIs can help improve patient outcomes.

Timely, accurate and actionable clinical laboratory tests are critical for guiding early and appropriate interventions and therapies. Clinical testing is

integral to evidence-based improvements in health care quality, patient outcomes, efficiency and accountability.*

HAI Diagnosis

Fast and accurate diagnosis of infection enables earlier, more appropriate antibiotic treatment.

BD GeneOhm™ Cdiff – for the rapid detection of *Clostridium difficile* toxin B gene.

BD GeneOhm™ StaphSR – for the rapid detection of *S. aureus* and MRSA in positive blood cultures.

HAI Surveillance

Accurate and timely results enable you to make informed decisions that can help prevent the spread of MRSA, avoid excessive costs and improve patient outcomes.^{1,2}

BD GeneOhm™ MRSA ACP – for the direct detection of nasal colonization with MRSA DNA.

BD BBL™ CHROMagar™ MRSA – for the direct detection of MRSA nasal colonization using chromogenic media.

BD is committed to developing and providing novel products and services aimed at helping to improve patient outcomes by delivering cost-effective solutions for the identification and detection of HAIs.

For more information, please contact your BD HAI Specialist at **888-GENE OHM**, or visit us at **Booth #310** at the Fifth Decennial International Conference on Healthcare-Associated Infections.

BIOQUELL® Healthcare

The BIOQUELL Q-10 Providing a safer patient environment

- State-of-the-art total room sterilization
- Proven reduction in hospital acquired infection rates
- Rapid room and unit turn around times
- Registered as a room sterilant by EPA for hard (non-porous) surfaces and soft (porous) materials

The BIOQUELL Q-10 is a new, cost-effective way of bringing cutting edge room sterilization technology to your hospital. BIOQUELL's hydrogen peroxide vapor technology is the established market leader, combating Healthcare Associated Infection (HAI) since 2003.

- Rapid cycles
- Full 3D surface sterilization
- Proven to reduce infection rates (based on clinical trials performed in conjunction with the Centers for Disease Control and Prevention CDC)

Roche. In it for life.

From HIV to HAI, we are the only company with more than 20 years of experience in molecular diagnostics.

Our expertise in PCR assays and instruments can improve patients' healthcare.

As a pioneer with the COBAS® AmpliPrep/COBAS® TaqMan® System and assays for HCV, HBV, and HIV, Roche has made a significant contribution to infectious disease medicine. You can trust Roche as the only company with more than 20 years of knowledge and experience in molecular diagnostics.

The trusted company with multiple platform technologies to customize your needs.

Because every facility has its own unique demands and constraints, Roche can select the optimal platform, enabling you to better serve your institution and its patients.

Start-to-finish capabilities from research to manufacturing to sales, field service, and technical support.

You can depend on us for product support and technical proficiency. Roche provides in-house expertise with superior convenience and fast, personal customer service.

Now innovating PCR for detection of Healthcare Associated Infections (HAIs).

Make Roche your partner to reduce the prevalence of multidrug-resistant organisms and associated infections in your institution. Look to us for advanced assays to rapidly identify infectious agents so you can treat sooner. Trust Roche to bring its pioneering expertise in PCR assays and instruments to combat HAIs.
