

STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

Studies in Second Language Acquisition

Volume 46 Number 3 July 2024

RESEARCH ARTICLES

- Research methods for IDs and TBLT: A substantive and methodological review*
Lara Bryfonski, Yunjung (Yunie) Ku, and Alison Mackey 617–643
- Sense-aware connective-based indices of cohesion and their relationship to cohesion ratings of English language learners' written production*
Xiaofei Lu and Renfen Hu 644–662
- Effects of retrieval schedules on the acquisition of explicit, automatized-explicit, and implicit knowledge of L2 collocations*
Nan Fang, Irina Elgort, and Zhuo Chen 663–685
- Processing to learn noncanonical word orders: Exploring linguistic and cognitive predictors of reanalysis in early L2 sentence comprehension*
Holger Hopp, Sarah Schimke, Freya Gastmann, David Öwerdieck, and Gregory J. Poarch 686–709
- Definite and indefinite article accuracy in learner English: A multifactorial analysis*
Kateryna Derkach and Theodora Alexopoulou 710–740
- Unpacking L2 explicit linguistic knowledge and online processing of the English modals may and can: A comparison of acceptability judgments and self-paced reading*
Nadia Mifka-Profozic, David O'Reilly, and Leonarda Lovrovic 741–768

ERRATUM

- Unpacking L2 explicit linguistic knowledge and online processing of the English modals may and can: A comparison of acceptability judgments and self-paced reading — ERRATUM*
Nadia Mifka-Profozic, David O'Reilly, and Leonarda Lovrovic 769–769

RESEARCH ARTICLES

- The effects of distributed practice on second language fluency development*
Joe Kakitani and Judit Kormos 770–794
- Coherence and comprehensibility in second language speakers' academic speaking performance*
Aki Tsunemoto and Pavel Trofimovich 795–817
- How well are primary and secondary meanings of L2 words acquired?*
Beatriz González-Fernández and Stuart Webb 818–840
- L2 language development in oral and written modalities*
Myeongeun Son 841–868
- The interplay of mindsets, aptitude, grit, and language achievement: What role does gender play?*
Yasser Teimouri, Somayeh Tahmouresi, and Farhad Tabandeh 869–892
- Foreign language learning boredom: Refining its measurement and determining its role in language learning*
Chengchen Li, Enhao Feng, Xian Zhao, and Jean-Marc Dewaele 893–920

RESEARCH REPORTS

- Multilingualism and native speakerism in academic journals' language policies: Exploring a potential power of applied linguistics journals in promoting equitable publishing practices*
Leiry K. Warren and Masatoshi Sato 921–932
- Feeling signs: Motor encoding enhances sign language learning in hearing adults*
Laura M. Morett, Mathew Cieřla, Mary E. Bray, and Karen Emmorey 933–945

METHODS FORUM

- A comparison of lab- and web-based elicited imitation: Insights from explicit-implicit L2 grammar knowledge and L2 proficiency*
Kathy Minhye Kim, Xiaoyi Liu, Daniel R. Isbell, and Xiaobin Chen 946–967
-
