

Psychosocial Disturbances in Young People

Challenges for Prevention

MICHAEL RUTTER

Considers what is special about adolescence and what is known about the risk factors for psychosocial problems in this age period, in order to consider possible effective means of prevention. The main focus is on antisocial problems and depressive disorders, which constitute two of the most common and most troublesome types of psychosocial disturbance during adolescence.

The Lifespan Development of Individuals: Behavioral, Neurobiological, and Psychosocial Perspectives

A Synthesis

Edited by D. MAGNUSSON, T. GREITZ, T. HOKFELT, L-G. NILSSON, L. TERENIUS and B. WINBLAD

A full understanding of the developmental process in individuals requires contributions from disciplines including developmental biology and psychology, physiology, neuropsychology, social psychology, sociology and anthropology. This ambitious and wide-ranging book integrates the findings from these and related areas to form a holistic view of human development from conception to death.

Integrated Mental Health Care

A Comprehensive, Community-based Approach

I. R. H. FALLOON and G. FADDEN

Foreword by M. SHEPHERD

'An important and, in many ways, an original book. The model of care is compelling; the goals and strategies enunciate in a kind of pristine form the aspirations of many. There are plenty of ideas which stimulate and challenge ... I gained much from reading this book, and recommend it.'
