

*Public Health Nutrition (PHN)* provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

#### Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

**Submission:** PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on [phn.edoffice@cambridge.org](mailto:phn.edoffice@cambridge.org) regarding any other types of submission.

**Refereeing:** Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

**Copyright:** At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

**Preparation of manuscripts:** Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

#### Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

#### Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

**Proofs:** Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

**Offprints:** The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

# Public Health Nutrition

Volume 24, 2021 ISSN: 1368-9800

USA

## **Special sales and supplements**

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

## **Subscription information**

*Public Health Nutrition* is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

## **Annual subscription rates**

Volume 24, 2021 (18 issues):  
Internet/print package: £1390/\$2666 Americas only/€2227 EU only  
Internet only: £1006/\$1909 Americas only/€1599 EU only

**Any supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

**Claims** for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

**Advertising:** The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

**Back volumes** will be available in due course. Please contact Cambridge University Press for further information.

**US POSTMASTERS:** Please send address corrections to Cambridge University Press  
1 Liberty Plaza  
Floor 20, New York  
NY 10006  
USA

**Notes for Authors** are available from the publisher at the given address and can be found inside the back cover.

**Offprints:** The author (or main author) of an accepted paper will receive a free PDF of their paper. Additional offprints are available for a fee and must be ordered at proof stage. **No page charges are levied by this journal.**

**Copyright:** As of 1 January 2001 the copyright of all articles submitted to *Public Health Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Editorial Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London, W6 7NJ, UK.

*Public Health Nutrition* is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS<sup>®</sup>, Global Health, Index Medicus<sup>®</sup> (MEDLINE<sup>®</sup>), EMBASE, Excerpta Medica, BIOSIS<sup>®</sup> Database and CINAHL<sup>®</sup> Database  
*Public Health Nutrition* participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Dietary inflammatory index and pancreatic cancer risk: a systematic review and dose-response meta-analysis  
*Zhangyou Guo, Yuan Hong and Yao Cheng* 6427

Expanding the limits of sex: a systematic review concerning food and nutrition in transgender populations  
*Sávio Marcelino Gomes, Michelle CM Jacob, Cecilia Rocha, Maria FA Medeiros, Clélia O Lyra and Luiz RA Noro* 6436

Prevalence of childhood anaemia in Brazil: still a serious health problem: a systematic review and meta-analysis  
*Carlos Alberto Nogueira-de-Almeida, Fábio da Veiga Ued, Luiz Antonio Del Ciampo, Edson Zangiacomí Martínez, Ivan Savioli Ferraz, Andrea Aparecida Contini, Franciele Carolina Soares da Cruz, Raquel Farias Barreto Silva, Maria Eduarda Nogueira-de-Almeida and Joel Alves Lamounier* 6450

Vitamin A deficiency: experience from a tertiary referral UK hospital; not just a low- and middle-income country issue  
*Alexandra Marley, Samuel CL Smith, Ruhina Ahmed, Peter Nightingale and Sheldon C Cooper* 6466

Association between acculturation and metabolic syndrome in Hispanic adults mediated by fruits intake  
*Jialiang Liu, Kimberly G Fulda and Meng-Hua Tao* 6472

---

**Economics and environment**

Evaluation of the food environment of public hospitals in a Brazilian metropolis  
*Maria Eduarda Ribeiro José, Inês Rugani Ribeiro de Castro and Daniela Silva Canella* 6477

---

**Interventions**

Behavioural change box? Applying the COM-B model to understand behavioural triggers that support consumption of fruits and vegetable among subscribers of a fruit and vegetable box scheme  
*Daniela Craveiro, Sibila Marques, Ruth Bell, Matluba Khan, Cristina Godinho and Filomena Peixeiro* 6488

---

**Public policies**

Implementation of a regulatory food policy to reduce availability of energy-dense foods in Costa Rican high schools  
*Melissa L Jensen, Wendy Gonzalez, Carolina Bolaños-Palmieri, Rafael Monge-Rojas and Edward A Frongillo* 6499

School meals consumption is associated with a better diet quality of Brazilian adolescents: results from the PeNSE 2015 survey  
*Mirena Boklis-Berer, Fernanda Rauber, Catarina Machado Azeredo, Renata Bertazzi Levy and Maria Laura da Costa Louzada* 6512

Implementation of food-based dietary guidelines: conceptual framework and analysis of the Brazilian case  
*Kamila Tiemann Gabe, Cláudia Raulino Tramontt and Patricia Constante Jaime* 6521

Impact of the community eligibility provision program on school meal participation in Texas  
*Kate R Schneider, Jennifer Oslund and Tiffany Liu* 6534

SNAP participation and the health and health care utilisation of low-income adults and children  
*Daniel P Miller and Taryn W Morrissey* 6543

Perceived barriers and facilitators to participating in the North Carolina Healthy Food Small Retailer Program: a mixed-methods examination considering investment effectiveness  
*Kathryn A Boys, Lindsey Haynes-Maslow, Jared T McGuirt, Alice S Ammerman, Erin E Van Fleet, Nevin S Johnson, Casey J Kelley, Victoria E Donadio, Sheila E Fleischhacker, Kimberly P Truesdale, Ronny A Bell and Stephanie B Jilcott Pitts* 6555

---

**Sustainability**

Association between the socio-economic status of households and a more sustainable diet  
*Hassan Eini-Zinab, Nargeskhatoon Shoaibinobarian, Golnaz Ranjbar, Andisheh Norouzian Ostad and Seyed Reza Sobhani* 6566

Cambridge Core For further information about this journal please go to the journal website at: [cambridge.org/pnn](http://cambridge.org/pnn)

**Monitoring and surveillance**

Degree of processing and nutritional value of children's food products  
*Célia Regina Barbosa de Araújo, Karla Danielly da S Ribeiro, Amanda Freitas de Oliveira, Inês Lança de Morais, João Breda, Patrícia Padão and Pedro Moreira* 5977

The food and nutrient intake of 5- to 12-year-old Australian children during school hours: a secondary analysis of the 2011–2012 National Nutrition and Physical Activity Survey  
*Alexandra C Manson, Brittany J Johnson, Dorota Zarnowiecki, Rachel Sutherland and Rebecca K Golley* 5985

**Nutritional status and body composition**

Persistence of anaemia among Samoan preschool age children: a longitudinal study  
*Bohao Wu, Courtney C Choy, Anna C Rivara, Christina Soti-Ulberg, Take Naseri, Muagututia S Reupena, Rachel L Duckham and Nicola L Hawley* 5995

**Behavioural nutrition**

Dietary inflammatory index and healthy eating index-2015 are associated with rheumatoid arthritis  
*Sajedah Jandari, Negin Mosalmanzadeh, Mohammad Reza Shadmand Fomani Moghadam, Davood Soleimani, Nitin Shivappa, James R Hébert, Mohammadhassan Jekar, Mohsen Karamati, Samine Sadat Abedi, Nafiseh Malek and Reza Rezvani* 6007

Proximal and distal influences on dietary change among a diverse group with prediabetes participating in a pragmatic, primary care nurse-led intervention: a qualitative study  
*Sally L Abel, Lisa C Whitehead, David C Tipene-Leach and Kirsten J Coppell* 6015

Food addiction and weight in students with high academic performance  
*Tatyana A Tserne, Mikhail F Borisenkov, Sergey V Popov, Larisa A Bakutova, Lalremruati Jongte, Amit K Trivedi, Anna A Pecherkina, Olga I Dorogina, Ekaterina A Martinson, Valentina I Vetosheva, Denis G Gubin, Svetlana V Solovieva, Lina A Danilova, Elena F Turovinina and Elvira E Symaniuk* 6027

Maternal characteristics influence infant feeding styles in Caribbean women  
*Amika S Wright, Marshall K Tulloch-Reid, Susan M Chang and Susan P Walker* 6034

Effect of a theory-based educational intervention for enhancing nutrition and physical activity among Iranian women: a randomised control trial  
*Mohammad Vahedian Shahroodi, Seyedeh Belin Tavakoly Sary, Zahra Hosseini Khaboshan, Habibollah Esmaeili, Alireza Jafari and Mohammad Tajfard* 6046

Parenting style as a predictor of dietary score change in children from 4 to 14 years of age. Findings from the Longitudinal Study of Australian Children  
*Alissa J Burnett, Karen E Lamb, Alison C Spence, Kathleen E Lacy and Anthony Worsley* 6058

Systematic observation of healthy eating environments in after-school services: a cross-sectional study  
*Ruth K Crowe, Yasmine Probst, R Glenn Weaver, Michael W Beets, Byron Kemp, Rebecca M Stanley and Anthony D Okely* 6067

Associations of dietary patterns with blood pressure and markers of subclinical arterial damage in adults with risk factors for CVD  
*Vicky Tzelefa, Christiana Tsimiriaglou, Antonios Argyris, George Moschonis, George Perogiannakis, Maria Yannakoulia, Petros Sfikakis, Athanase D Protogerou and Kalliopi Karatzi* 6075

Adherence to the dietary approaches to stop hypertension dietary pattern and rheumatoid arthritis in Iranian adults  
*Maryam Ghaseminasabparizi, Mohammad Ali Nazarinia and Masoumeh Akhlaghi* 6085

The role of education and migration background in explaining differences in folic acid supplementation intake in pregnancy: results from a German birth cohort study  
*Céline Miani, Angélique Ludwig, Ina-Merle Doyle, Jürgen Breckenkamp, Chantal Hoeller-Holtrichter, Jacob Spallek and Oliver Razum* 6094

Adiposity and the role of diverse social supports: an observational, gender-sensitive study using the baseline Canadian Longitudinal Study on Aging  
*Zeinab Hosseini, Abdollah Safari, Nadia A Khan, Gerry Veenstra and Annalijn I Conklin* 6103

**Nutritional epidemiology**

Association between Dietary Inflammatory Index and kidney stones in US adults: data from the National Health and Nutrition Examination Survey (NHANES) 2007–2016  
*Chichen Zhang, Shi Qiu, Haiyang Bian, Bowen Tian, Haoyuan Wang, Xiang Tu, Boyu Cai, Kun Jin, Xiaonan Zheng, Lu Yang and Qiang Wei* 6113

Consumption of artificially sweetened soft drinks and risk of gastrointestinal cancer: a meta-analysis of observational studies  
*Alfred Jatho, Jansen Marcos Cambia and Seung-Kwon Myung* 6122

Pre-pregnancy maternal BMI classification is associated with preschool childhood diet quality and childhood obesity in the Avon Longitudinal Study of Parents and Children  
*Paul Hudson, Pauline M Emmett and Caroline M Taylor* 6137

Opportunities for diet quality improvement: the potential role of staple grain foods  
*Mariane de Mello Fontaneli, Angela Martinez Arroyo, Cristiane Hermes Sales, Chris J Seal and Regina Mara Fisberg* 6145

Diet scores and prediction of general and abdominal obesity in the Melbourne collaborative cohort study  
*Allison M Hodge, Md Nazmul Karim, James R Hébert, Nitin Shivappa, Roger L Milne and Barbara de Courten* 6157

Nutritional risk in early childhood and parent-reported school concerns  
*Jessica A Omand, Magdalena Janus, Jonathon L Maguire, Patricia C Parkin, Janis Randall Simpson, Charles DG Keown-Stoneman, Mary Aglipay and Catherine S Birken* 6169

Relationship between dietary macronutrient composition and non-alcoholic fatty liver disease in lean and non-lean populations: a cross-sectional study  
*Bahareh Amirjalali, Mahmoodreza Khoonsari, Masoud Reza Sohrabi, Hossein Ajdarkosh, Nima Motamed, Mansoor Maadi, Hossein Nobakht, Esmaeel Gholzadeh and Farhad Zamani* 6178

Dietary inflammatory index scores are associated with atherogenic risk in Brazilian schoolchildren  
*Lara Gomes Suhett, Sarah A Vieira Ribeiro, Helen Hermans M Hermsdorff, Mariane A Silva, Nitin Shivappa, James R Hébert and Juliana F Novaes* 6191

Associations of spicy food flavour and intake frequency with blood lipid levels and risk of abnormal serum lipid levels in Chinese rural population: a cross-sectional study  
*Xiaokang Dong, Yuqian Li, Kaili Yang, Lulu Zhang, Yuan Xue, Songcheng Yu, Xiaotian Liu, Runqi Tu, Dou Qiao, Zhicheng Luo, Xue Liu, Yan Wang, Wenjie Li and Chongjian Wang* 6201

Assessment of iodine nutrition of schoolchildren in Gonda, India, indicates improvement and effectiveness of salt iodisation  
*Kushagra Gaurav, Subhash Yadav, Sheo Kumar, Anjali Mishra, Madan M Godbole, Uttam Singh and Saroj K Mishra* 6211

Dietary and nutrient intake among participants of a Brazilian health promotion programme: a cross-sectional study  
*Angélica R Silva, Mariana S Lopes, Suellen F Campos, Luana C dos Santos, Patrícia P Freitas and Aline CS Lopes* 6218

Composition and Culture of Eating (CoCu) pregnancy: a new short questionnaire to evaluate diet composition and culture of eating during pregnancy  
*Ulrike Spielau, Mandy Vogel, Antje Körner, Wieland Kiess and Tanja Paulain* 6227

Geographical variation and temporal trend in anemia among children aged 6–59 months in low- and middle-income countries during 2000–2018: forecasting the 2030 SDG target  
*Md. Mehedi Hasan, Ricardo J Soares Magalhaes, Saifuddin Ahmed, Sonia Pervin, Md. Tariqujjaman, Yaqoot Fatima and Abdullah A Mamun* 6236

Associations of the pre-pregnancy weight status with anaemia and the erythropoiesis-related micronutrient status  
*Noor Rohmah Mayasari, Izu-Yu Hu, Jane C-J Chao, Chyi-Huey Bai, Yi Chun Chen, Ya Li Huang, Chun-Chao Chang, Fan-Fen Wang, Hamam Hadi, Esti Nurwanti and Jung-Su Chang* 6247

Ultra-processed food consumption and its correlates among Italian children, adolescents and adults from the Italian Nutrition & Health Survey (IHES) cohort study  
*Emilia Ruggiero, Simona Esposito, Simona Costanzo, Augusto Di Castelnuovo, Chiara Cerletti, Maria Benedetta Donati, Giovanni de Gaetano, Lucia Iacoviello, Marialaura Bonaccio and on behalf of the IHES Study Investigators* 6258

Association between egg intake and blood pressure in the USA: the International study on Macro/micronutrients and blood Pressure (INTERMAP)  
*Thanh-Huyen T Vu, Linda Van Horn, Martha L Daviglus, Queenie Chan, Alan R Dyer, Victor W Zhong, Rachel Gibson, Paul Elliott and Jeremiah Stamler* 6272

Disparities and spatial variations of high salt intake in Iran: a subnational study of districts based on the small area estimation method  
*Sina Azadnajafabad, Narges Ebrahimi, Esmaeil Mohammadi, Erfan Ghasemi, Sahar Saeedi Moghaddam, Aya Aminoroaya, Negar Rezaei, Ali Ghanbari, Masoud Masinaei, Sahar Mohammadi Fateli, Rosa Haghshenas, Fateme Gorgani, Ameneh Chan, Arezou Dilmaghani-Marand and Farshad Farzadfar* 6281

Nut intake and hyperuricemia risk in young adults  
*Chong Wang, Xiao-Fei Guo, Ting Yang, Ting Zhao and Duo Li* 6292

The association between low-carbohydrate diet score and metabolic syndrome among Iranian adults  
*Zohreh Sadat Sangsefidi, Elnaz Lorzadeh, Azadeh Nadjarzadeh, Masoud Mirzaei and Mahdieh Housseinzadeh* 6299

Thinness, overweight and obesity among 6- to 17-year-old Malaysians: secular trends and sociodemographic determinants from 2006 to 2015  
*Maria S Mohamad, Balkish Mahadir Naidu, Riittakerttu Kalliala, Suvu M Virtanen and Susanna Lehtinen-Jacks* 6309

Demographic and socio-economic shifts partly explain the Martinican nutrition transition: an analysis of 10-year health and dietary changes (2003–2013) using decomposition models  
*Zoé Colombet, Michel Simioni, Sophie Drogue, Viola Lamani, Marlène Perignon, Yves Martin-Prevel, Sylvie Merle, Marie-Joséphine Amiot, Nicole Darmon, Louis-Georges Soler and Caroline Méjean* 6323

Associations between the composition of functional tooth units and nutrient intake in older men: the Concord Health and Ageing in Men Project  
*Kate Milledge, Robert G Cumming, Frederick AC Wright, Vasi Naganathan, Fiona M Blyth, David G Le Couteur, Louise M Waite, David J Handelsman and Vasant Hirani* 6335

Impact of elevated BMI and types of comorbid conditions on health-related quality of life in a nationally representative US sample  
*Quang A Le and Dimitri Delevry* 6346

Household-level double burden of malnutrition in Ethiopia: a comparison of Addis Ababa and the rural district of Kersa  
*Lilija Bliznashka, Mia M Blakstad, Yemane Berhane, Amare W Tadesse, Nega Assefa, Goodarz Danaei, Chelsey R Canavan, Elena C Hemler and Wafaie W Fawzi* 6354

Impact of COVID-19 on eating habits, sleeping behaviour and physical activity status of final-year medical students in Ankara, Turkey  
*Tülay Ayşe Bosi Bağcı, Ayşegül Kanadıkırık, Emel Somyürek, Gülce Gerçek, Hamza Berdan Tannıklı, Eray Öntaş and Sarp Uzun* 6369

Does coffee, tea and caffeine consumption reduce the risk of incident breast cancer? A systematic review and network meta-analysis  
*Shu Wang, Xiang Li, Yue Yang, Jingping Xie, Mingyue Liu, Ya Zhang, Yingshi Zhang and Qingchun Zhao* 6377

Dietary patterns associated with obesity outcomes in adults: an umbrella review of systematic reviews  
*Canaan Negash Seifu, Paul P Fahey, Tewodros G Hailemariam, Steven A Frost and Evan Atlantis* 6390

Prevalence of overweight and obesity among Brazilian adolescents over time: a systematic review and meta-analysis  
*Mariana Sbaraini, Felipe Vogt Cureau, Julianna do Amaral Ritter, Daniela Schneid Schiuh, Mariana Migliavacca Madalosso, Gabriella Zanin, Maira Ribas Goulart, Lucia Campos Pellanda and Beatriz D Schaen* 6415
