

- S 549 Normal stress differences, their origin and constitutive relations for a sheared granular fluid
S. Saha & M. Alam
- 581 The motion of a freely floating cylinder in the presence of a wall and the approximation of resonances
P. McIver & R. Porter
- S 611 Experimental observation of hairpin auto-generation events in a turbulent boundary layer
Y. Jodai & G. E. Elsinga
- S 634 Vortex dynamics and new lift enhancement mechanism of wing–body interaction in insect forward flight
G. Liu, H. Dong & C. Li
- 652 Crow instability: nonlinear response to the linear optimal perturbation
H. G. Johnson, V. Brion & L. Jacquin
- S 671 Dynamics of internal jets in the merging of two droplets of unequal sizes
C. Tang, J. Zhao, P. Zhang, C. K. Law & Z. Huang
- 690 Mass flow rate measurement of thermal creep flow from transitional to slip flow regime
H. Yamaguchi, P. Perrier, M. T. Ho, J. G. Méolans, T. Niimi & I. Graur
- 708 Self-sustaining process of minimal attached eddies in turbulent channel flow
Y. Hwang & Y. Bengana
- 739 Force-induced diffusion in suspensions of hydrodynamically interacting colloids
N. J. Hoh & R. N. Zia
- 784 Blowing a liquid curtain
H. Lhuissier, P. Brunet & S. Dorbolo
- 808 Reactive control of isolated unsteady streaks in a laminar boundary layer
K. M. Bade, R. E. Hanson, B. A. Belson, A. M. Naguib, P. Lavoie & C. W. Rowley
- 847 Magneto-gravitational convection in a vertical layer of ferrofluid in a uniform oblique magnetic field
H. Rahman & S. A. Suslov
- 876 Buoyant displacement flows in slightly non-uniform channels
R. Mollaabbasi & S. M. Taghavi
- 914 Balance dynamics in rotating stratified turbulence
H. A. Kafiabad & P. Bartello
- S 950 A model problem for a supersonic gas jet from a moon
H. G. Hornung
- 973 CORRIGENDUM

JFM Rapids (online only)

- R1 Minimal flow perturbations that trigger kinematic dynamo in shear flows
W. Herreman
- R2 Network structure of two-dimensional decaying isotropic turbulence
K. Taira, A. G. Nair & S. L. Brunton
- S R3 Localized travelling waves in the asymptotic suction boundary layer
T. Kreilos, J. F. Gibson & T. M. Schneider

S indicates supplementary data or movies available online.

- 1 Linear stability and energetics of rotating radial horizontal convection
G. J. Sheard, W. K. Hussam & T. Tsai
- 36 Flow and fouling in a pleated membrane filter
P. Sanaei, G. W. Richardson, T. Witelski & L. J. Cummings
- S 60 Vapour-bubble nucleation and dynamics in turbulent Rayleigh–Bénard convection
D. Narezo Guzman, T. Frączek, C. Reetz, C. Sun, D. Lohse & G. Ahlers
- 96 Drop impact on a solid surface: short-time self-similarity
J. Philippi, P.-Y. Lagrée & A. Antkowiak
- S 136 Defining coherent vortices objectively from the vorticity
G. Haller, A. Hadjighasem, M. Farazmand & F. Huhn
- 174 On the coupled time-harmonic motion of a freely floating body and water covered by brash ice
N. Kuznetsov & O. Motygin
- 187 Spatio-temporal stability of the Kármán vortex street and the effect of confinement
S. Mowlavi, C. Arratia & F. Gallaire
- 210 Comparison of turbulent boundary layers over smooth and rough surfaces up to high Reynolds numbers
D. T. Squire, C. Morrill-Winter, N. Hutchins, M. P. Schultz, J. C. Klewicki & I. Marusic
- 241 The admissibility domain of rarefaction shock waves in the near-critical vapour–liquid equilibrium region of pure typical fluids
N. R. Nannan, C. Sirianni, T. Mathijssen, A. Guardone & P. Colonna
- 262 Instability of a boundary layer flow on a vertical wall in a stably stratified fluid
J. Chen, Y. Bai & S. Le Dizès
- 278 An adjoint-based approach for finding invariant solutions of Navier–Stokes equations
