

# EESTRSE Notes for Authors

*Earth and Environmental Science Transactions of the Royal Society of Edinburgh* publishes peer-reviewed, original scientific research papers, reviews and short communications on fields across the broad spectrum of **the Earth and its surface environments**. Articles do not need to have a specifically Scottish focus, nor are authors required to be Fellows of the Society. Articles should have relevance to a worldwide audience, even if the study is focused on a single geographic site. Papers should make topical, substantial and scholarly contributions, and the Editors are keen to encourage interdisciplinary papers. Discussions of articles previously published in the *Transactions* and reviews of topics of current interest are also invited. There are no page charges; however, if fold-outs or colour illustrations are envisaged, the Journals Officer should be consulted prior to submission (publications@royalsoced.org.uk). All new submissions are sent to at least two reviewers.

## 1. Submission

Manuscripts should be submitted electronically, with separate Text, Table and Figure files – Text in WORD format; Tables in Excel; Figures as low-res PDFs, preferably at publication size. Any queries regarding submission may be sent to the RSE Journals Officer, as above – publications@royalsoced.org.uk – **but as from 12 May 2016, all new submissions should be uploaded to the EESTRSE ScholarOne site** through the following link: <https://mc.manuscriptcentral.com/tre> **Submissions to *Earth and Environmental Science Transactions of the Royal Society of Edinburgh* must not have been published, or be under consideration, elsewhere.**

## 2. Preparation of papers

### 2.1. Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. A number of third-party services specialising in language editing and/or translation can be found here: <http://journals.cambridge.org/action/stream?pageId=8728&level=2&menu=Authors&pageId=3608>. Please note: the use of any of these services is voluntary, and at the authors' own expense.

### 2.2. Title page

The first page should show: (a) a title that is concise and informative; (b) the name(s) and full address(es) of the author(s); and (c) a running head abbreviation of the title of no more than 50–60 characters. Papers by more than one author should be submitted with statements from all the authors, approving the paper in its entirety and its submission to *EESTRSE*, and naming the author responsible for correspondence.

### 2.3. Abstract and Key Words

The second page should contain an **Abstract** of around 300 words, intelligible without reference to the text or references, and a list of **Key Words** (NB: words not already in the title) of no more than 150 characters, in alphabetical order.

### 2.4. Text

Text should start on the third page. Words to be printed in italics, e.g. names of taxa, should be underlined, unless already in italic typeface. Use capital letters for formal terms only. The metric system should be used throughout. Abbreviate compass points to N, NW, NE, SE etc. Enclose map references in square brackets, e.g. [NM 4437 0293]. In papers on systematic palaeontology, anatomical abbreviations should be included in the relevant Figure captions, rather than listed in a separate section. See a recent issue for general systematics style.

### 2.5. Headings

The introductory section should have no heading. The first headed section after the introduction should be numbered as **1**. Primary headings are numbered consecutively **1, 2, 3**, etc. Secondary headings are **1.1., 1.2., 1.3.**, etc. Both should appear flush left, with their text starting on a separate line below. Tertiary headings (**1.1.1., 1.1.2.**, etc.) should start a new paragraph, with indent, and should be followed by a full stop and the text to which they refer. All headings should be in bold. Cross-references in text should be to a section (e.g., (see section 2.3)), not to a page.

### 2.6. Footnotes

Do not use footnotes in main text.

### 2.7. References

All publications cited in the text, **including those pertaining to the authorship of taxa**, must be included in the Reference list, which is arranged in alphabetical order by author.

**2.7.1. Citation of Figures and References in text.** References to Figures are “Figure 1a” in a sentence, but “(Fig. 1a)”, “(Figs 1, 3a, 5)” in parentheses. References to other authors' figs, etc. take lower case initial to differentiate from references to Figures in current paper: “(Smith 1990, fig. 4; Adams 1993, pl. 2, fig. 3; Fig. 3)”  
When referring to Refs in text: “Smith & Jones (1990)” – for author plus one other; “Smith *et al.* (1992)” – when more than two authors.  
When listing Refs in parentheses: date order, and alphabetical within that; allow ampersands: “(Smith 1990, 1997, 2000; Adams *et al.* 1993; James & Drury 1993; Smith *et al.* 2000; Smith & Jones 2001; James *et al.* 2004)”

**2.7.2. References at end.** Only published or in press items, or unpublished theses with the University clearly specified, are to be included

in the References. Journal and series titles should be written out in full, upper and lower case italics; no comma after; volume numbers in bold; one space between author initials (i.e., Clarkson, E. N. K., not Clarkson, E.N.K.); ampersand (&), not ‘and’ for final author in multi-authored papers (i.e., Smith, Brown & Clark, not Smith, Brown and Clark).

### References at the end should be ordered thus:

- (i) single author – alphabetically by initials, and then by date; e.g., Smith, A. B. 1990; Smith, A. B. 1996; Smith, C. D. 1989; Smith, C. D. 1990.
- (ii) author plus two or more co-authors (*et al.* in text) – by date; e.g., Smith, Jones & Clerk 1993; Smith, Brown & Clerk 1995a (= Smith *et al.* 1995a in text); Smith, Jones & Clerk 1995b (Smith *et al.* 1995b in text); Smith, Clerk, Brown & Jones 1997.
- (iii) author plus one other – alphabetical by 2nd author, and then by date within that; e.g., Smith & Brown 1997; Smith & Jones 1987; Smith & Jones 1996.

### Set out as in examples below:

Copper, P. & Gourvenec, R. 1996. Evolution of the spire-bearing brachiopods, (Ordovician–Jurassic). In Copper, P. & Jin, J. (eds) *Brachiopods*, 81–88. Rotterdam: A. A. Balkema.

Chappell, B. W. & White, A. J. R. 1992. 1- and S-type granites in the Lachlan Fold Belt. *Transactions of the Royal Society of Edinburgh: Earth Sciences* **83**, 1–26.

Jarvik, E. 1980. *Basic structure and evolution of vertebrates*, Vol. 1, 74–98. London: Academic Press.

## 3. Preparation of Tables and Figures

### 3.1. Tables

Tables should be numbered, and cited, consecutively throughout the paper, and provided on separate pages at the end of the MS, **not embedded in the text**. Each Table should have a caption. For layout of analytical data, see tables published in previous issues. Authors should send published analyses of igneous rocks to the UK-IGBA file.

### 3.2. Figures

Illustrations should be numbered, and cited, consecutively throughout the paper. A list of figure captions should be provided on a separate page after the References; **figures and figure captions should not be embedded in the text**. A scale should be shown on the figure (e.g., a bar scale on a photomicrograph), rather than giving magnifications in the caption, in case figures are reduced or enlarged. Large figures can be subdivided for reproduction on facing pages. Fossil illustrations should be illuminated top left. Figures in PDF format are sufficient for submission purposes. Should a paper be accepted for publication, high-quality electronic files will be requested. Detailed guidelines for their production are available on request from the RSE's Journals Officer (publications@royalsoced.org.uk)

### 4. Proofs and offprints

A typeset PDF proof of an accepted paper will be sent to the corresponding author for checking. 25 offprints (with covers) of a published paper are provided gratis and additional offprints may be ordered (in batches of 25) when checked proofs are returned. A PDF of the final published paper (the ‘Publisher's Version’) can be supplied on request to the Journals Officer.

### 5. Copyright/Open Access

The RSE now operates a ‘hybrid’ Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their papers published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication (‘Green’) option, authors will be asked to sign the Journal's standard transfer of copyright form. If authors choose the full (Gold) Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge (APC) of GBP 1,780/USD 2,835 (for papers accepted from August 2015 onwards), the final published Version of Record will be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution. Please note that publication under a fully Open Access agreement is part of the Cambridge Open Option. For more details, please see: <http://journals.cambridge.org/action/displaySpecialPage?pageId=4576>.

**Authors are also asked to ensure that any electronic versions of their papers clearly state *EESTRSE* as the official original place of publication.**

### Transactions available **on-line**:

The journal *Earth and Environmental Science Transactions of the Royal Society of Edinburgh* is available on subscription as both print plus online and online only. (Online ISSN: 1755-6929). See inside front cover for ordering details.

As from 2007 (volume 98), this journal is hosted by the Cambridge Journals Online (CJO) service (now Cambridge **Core**), which can be found at <https://www.cambridge.org/core/journals/earth-and-environmental-science-transactions-of-royal-society-of-edinburgh>

This page on the Cambridge **Core** site also, under ‘All issues’, the complete digitised archive of the journal under its former titles of *Transactions of the Royal Society of Edinburgh: Earth Sciences* (volumes 71–97 (1980–2006)) and *Transactions of the Royal Society of Edinburgh* (volumes 1–70 (1785–1979)).

**Feedback:** All comments are welcome – either regarding the quality and usability of the electronic product or the process of registration on-line. Please send comments to: [publications@these.org.uk](mailto:publications@these.org.uk)

(Issue date 31 March 2018)

**FOSSIL INSECTS, ARTHROPODS AND AMBER – SPECIAL ISSUE**

Andrew J. ROSS Fossil Insects, Arthropods and Amber: Preface	73–78
Pierre GUERIAU, Nicolas RABET and Eva DU TIEN HAT The Strud crustacean fauna (Late Devonian, Belgium): updated review and palaeoecology of an early continental ecosystem	79–90
Neil D. L. CLARK, Randall F. MILLER and Andrew J. ROSS The distribution of <i>Schramocaris</i> (Eumalacostraca, Crustacea) along the northwestern coast of the Rheic Ocean during the Lower Carboniferous	91–98
Jakub PROKOP, Martina PECHAROVÁ, Edmund A. JARZEMBOWSKI and Andrew J. ROSS New palaeodictyopterans from the Late Carboniferous of the UK (Insecta: Palaeodictyoptera)	99–107
Jacek SZWEDO The unity, diversity and conformity of bugs (Hemiptera) through time	109–128
Richard S. KELLY, Andrew J. ROSS and Edmund A. JARZEMBOWSKI Earwigs (Dermaptera) from the Mesozoic of England and Australia, described from isolated tegmina, including the first species to be named from the Triassic	129–143
Agnieszka SOSZYŃSKA-MAJ, Wiesław KRZEMIŃSKI, Katarzyna KOPEĆ and Robert A. CORAM Worcestobiidae – a new Triassic family of Mecoptera, based on species removed from the family Orthophlebiidae	145–149
Wiesław KRZEMIŃSKI, Agnieszka SOSZYŃSKA-MAJ, Katarzyna KOPEĆ and Irena D. SUKATSHEVA The oldest representative of the family Austropanorpidae (Mecoptera) from the Lower Jurassic of Siberia	151–155
Katarzyna KOPEĆ, Wiesław KRZEMIŃSKI, Agnieszka SOSZYŃSKA-MAJ, Yizi CAO and Dong REN A new species of <i>Orthobittacus</i> (Mecoptera, Bittacidae) from the Middle Jurassic of Daohugou, Inner Mongolia (China)	157–162

Katarzyna KOPEĆ, Agnieszka SOSZYŃSKA-MAJ, Alexander GEHLER, Jörg ANSORGE and Wiesław KRZEMIŃSKI Mecoptera and Diptera from the early Toarcian (Early Jurassic) deposits of Wolfsburg – Große Kley (Lower Saxony, Germany)	163–171
Ewa KRZEMIŃSKA and Elena LUKASHEVICH The oldest Trichoceridae (Diptera) from the Lower Jurassic of Kyrgyzstan: implications of the biomechanical properties of their wings	173–176
He WANG, Yan FANG, Qingqing ZHANG, Xiaojie LEI, Bo WANG, Edmund A. JARZEMBOWSKI and Haichun ZHANG New material of <i>Sigmaboilus</i> (Insecta, Orthoptera, Prophalangopsidae) from the Jurassic Daohugou Beds, Inner Mongolia, China	177–183
Daran ZHENG, Haichun ZHANG, Bo WANG and Su-Chin CHANG A new species of damselfly (Odonata: Stenophlebiidae: <i>Cretastenophlebia</i> ) from the Lower Cretaceous of the Jiuquan Basin, northwestern China	185–189
Ed JARZEMBOWSKI and Agnieszka SOSZYŃSKA-MAJ The first orthophlebiid scorpionfly (Insecta: Mecoptera) from the Wealden (Lower Cretaceous) of southern England	191–194
Alexander V. KHRAMOV A new assemblage of Early Cretaceous green lacewings (Chrysopidae: Neuroptera) from Transbaikalia	195–202
Victoria E. McCOY, Carmen SORIANO and Sarah E. GABBOTT A review of preservational variation of fossil inclusions in amber of different chemical groups	203–211
Wilfried WICHARD and Dany AZAR First caddisflies (Trichoptera) in Lower Cretaceous Lebanese amber	213–217
Ryszard SZADZIEWSKI Biting midges (Diptera: Ceratopogonidae) as indicators of biostratigraphy, ecological reconstructions and identification of amber deposits	219–230
Iwona KANIA, Wiesław KRZEMIŃSKI and Antonio ARILLO A new peculiar species of the genus <i>Helius</i> Lepeletier & Serville, 1828 (Diptera, Limoniidae) from Cretaceous Álava amber (Spain)	231–237
Ru D. A. SMITH and Andrew J. ROSS Amberground pholadid bivalve borings and inclusions in Burmese amber: implications for proximity of resin-producing forests to brackish waters, and the age of the amber	239–247
Wolfram MEY, Wilfried WICHARD, Emma ROSS and Andrew ROSS On the systematic position of a highly derived amphimesenopteran insect from Burmese amber (Insecta, Amphimesenoptera)	249–254
Marta ZAKRZEWSKA, Frauke STEBNER, Mateusz PUCHALSKI, Hukam SINGH and Wojciech GIŁKA A peculiar leg structure in the first non-biting midge described from Cambay amber, India (Diptera: Chironomidae)	255–261
Iwona KANIA, Wiesław KRZEMIŃSKI, Frauke STEBNER and Hukam SINGH The first representative of Tipulomorpha (Diptera) from Early Eocene Cambay amber (India)	263–269
Wiesław KRZEMIŃSKI, Iwona KANIA and Maciej WOJTOŃ A new Eocene <i>Dicranomyia</i> Stephens, 1829 (Diptera: Limoniidae) from Baltic amber	271–277
Alicja Magdalena BRYSZ and Jacek SZWEDO The fossil record of the planthopper family Achilidae, with particular reference to those in Baltic amber (Hemiptera: Fulgoromorpha)	279–288

Jiří KOLIBÁČ and Vitalii ALEKSEEV <i>Seidlitzella hoffeinsorum</i> sp. nov., the first representative of the beetle tribe Gymnochilini (Coleoptera: Trogossitidae) from Baltic amber	289–296
Evgeny PERKOVSKY and Piotr WEGIEREK Aphid– <i>Buchnera</i> –Ant symbiosis; or why are aphids rare in the tropics and very rare further south?	297–310
Elina KETTUNEN, Alexander R. SCHMIDT, Paul DIEDERICH, Heinrich GRABENHORST and Jouko RIKKINEN Diversity of lichen-associated filamentous fungi preserved in European Paleogene amber	311–320
Ulla KAASALAINEN, Jochen HEINRICHS, Matthew A. M. RENNER, Lars HEDENÄS, Alfons SCHÄFER-VERWIMP, Gaik Ee LEE, Michael S. IGNATOV, Jouko RIKKINEN and Alexander R. SCHMIDT A Caribbean epiphyte community preserved in Miocene Dominican amber	321–331
