How could we
call ourselves the
Operating Room
Division without
Convertors/
Custom Sterile?

Frankly, we couldn't. Convertors@ offers the broadest line of disposable products in the industry. Covering a complete range of surgical specialties. But there's more to Convertors than drapes, sheets, gowns, head and shoe covers and packs. Or even towels, sponges and basin sets.

There's more to Custom Sterile, despite the fact we provide complete sterile procedure packs for an entire spectrum of surgical specialties. Each assembled per the specification of your O.R.

Today, there has to be more. That's why we use Optima: a fabric that provides superior bacterial protection and fluid repellency, and Iso•Bac®, an active non-woven fabric that reduces bacterial growth. It's why we designed our drapes with fluid collection pouches. It's why we developed our Quality Assurance program. And it's why we developed Convertors®Plus procedure

packs, an effective cost management tool.

But perhaps the greatest plus Convertors/Custom Sterile offers is its association with two other well-known names. V. Mueller@ and Pharmaseal® Surgical. Together as the Operating Room Division, we're uniquely qualified to help you with both the clinical and business issues you face. The result will help you make your O.R. as efficient and productive as possible, while maintaining a high standard of quality care for the patient.

The bottom line? Your operation wouldn't be the same without Convertors/Custom Sterile. And neither would ours.

For more information, write Baxter Healthcare Corporation, Operating Room Division, 1500 Waukegan Road, McGaw Park, IL 60085.

Operating Room Division

Baxter

Which hand is more open to infection?

It's a toss up. The hand on the **left** may have **just** as good a chance of becoming infected or passing on infection as the hand with the obvious wound. Because irritation caused by constant handwashing may well mean open, inapparent lesions in the skin. If your skin is red, dry or itching, it's probably broken. In dozens of places too small to see.

Healthy, intact skin is the best protection against infection. That's why Huntington Laboratories created the Intact Skin Care group of products.

Formulas that are easy on your hands, tough on germs.

Intact Skin Care products actually help make your hands feel softer and better with each use.

Some Intact Skin Care products have been formulated to kill pathogenic organisms and cleanse the skin without contributing to dryness or irritation, using proven **antibacterials** like alcohol and **Triclosan**. Emollients like aloe vera and lanolin to help skin retain its moisture. Humectants like glycerine to draw moisture from the air to the skin. Protein conditioners like keratin to help the skin repair its epidermal layer.

One for **every** room in the hospital.

The Intact Skin Care line includes **O/R Scrub** for the demands of the surgical suite and other high risk areas. **Bacti-Stat**, an extraordinarily mild healthcare personnel hand wash. **Derma Soft**, our finest general purpose hand wash. **Cida Rinse**, a convenient, go-anywhere alcohol antiseptic handrinse. **Accent Plus cremes** and lotions. And a complete educational program on the importance of intact skin. Although your staff won't need much encouragement to use Intact Skin Care products.

For more information and trial samples, call your Huntington representative or call us toll-free:
