

GLACIOLOGICAL LITERATURE

THIS bi-annual list of glaciological literature aims to cover the scientific aspects of snow and ice in all parts of the world. Attention is drawn to the bibliographies in each number of the *Polar Record* (Cambridge), which aim to cover the significant work dealing with expeditions, research, equipment and conditions of living in the Polar regions. Both journals, however, deal with Polar literature having specific glaciological interest and with general matters of a practical nature such as snowcraft.

Readers will greatly assist the Editor by notifying him of their own, or any other, publication of glaciological interest.

- ARAKAWA, K., and HIGUCHI, K. Studies on the freezing of water. (I.) *Journal of the Faculty of Science, Hokkaido University*, Ser. 2, Vol. 4, No. 3, 1952, p. 201-08. [Growth of stellar crystals from disc crystals.]
- AUTY, R. P., and COLE, R. H. Dielectric properties of ice and solid D₂O. *Journal of Chemical Physics*, Vol. 20, No. 8, 1952, p. 1309-14. [Complex dielectric constants measured from melting point to -65° C. (H₂O) and -35° C. (D₂O).]
- AVERY, E. C., and GROSSWEINER, L. I. Thermoluminescence of ice. *Journal of Chemical Physics*, Vol. 21, No. 2, 1953, p. 372-73. [Ice, irradiated with X-rays at -183° C., glows when subsequently warmed.]
- BADER, H., and others. Preliminary investigations of some physical properties of snow, by H. Bader, B. L. Hansen, J. A. Joseph, M. A. Sandgren. U.S. S[now], I[ce and] P[ermafrost] R[esearch] E[stablishment]. Report 7, 1951, viii, 48 p. [+14 sheets diagrs.] [Mechanics of snow compaction; description of instruments for its investigation.]
- BARRÈRE, P. Équilibre glaciaire actuel et quaternaire dans l'ouest des Pyrénées centrales. *Revue Géographique des Pyrénées et du Sud-Ouest*, Tome 24, Fasc. 2, 1953, p. 116-34.
- BERG, H. Temperaturmessungen in der schneenahen Luftschicht. *Wetter und Leben*, Jahrg. 5, Ht. 1/2, 1953, p. 34-35. [Temperature of air layer above snow.]
- BERGER, C., and SAFFER, C. M., jr. The existence of "beta" ice. *Science*, Vol. 118, No. 3070, 1953, p. 521-22. [Seljakov's report of rhombohedral ice formed by freezing supercooled water at ordinary pressure almost certainly fallacious.]
- BIAYS, P. Les îles de glace arctiques. *Annales de Géographie*, 62 An., No. 333, 1953, p. 377-80. [Form, origin, movement.]
- BIGG, E. K. The supercooling of water. *Proceedings of the Physical Society of London*, Series B, Vol. 66, No. 404, 1953, p. 688-94. [Drops suspended at the interface of two insoluble liquids were used to find dependence of supercooling on volume and cooling rate.]
- BLUE, R. W. The librational heat capacity of ice and of heavy ice. *Journal of Chemical Physics*, Vol. 22, No. 2, 1954, p. 280-83. [Heat capacity of ice can be split into translational and rotational parts by studying the difference in heavy ice.]
- BOSSOLASCO, M. Sulla micrometeorologia del manto nevoso. *Geofisica e Meteorologia*, Vol. 2, No. 1/2, 1954, p. 1-2. [Micro-climate of the snow cover.]
- BOUT, P. *Études de géomorphologie dynamique en Islande*. Paris, Hermann, 1953, 219 p. (Actualités scientifiques et industrielles, 1197. Expéditions Polaires Françaises [travaux], III.) [Includes chapters on soil polygons and periglacial erosion.]
- BRUNNER, T. Einige Beobachtungen über das Haften von Eis an Oberflächen. *Zeitschrift für angewandte Mathematik und Physik*, Vol. 3, Fasc. 6, 1952, p. 460-66. [Shear tests on adhesion of ice to clean and greased surfaces.]
- CAILLEUX, A., and TAYLOR, G. *Cryopédologie: étude des sols gelés*. Paris, Hermann, 1954, 220 p. (Actualités scientifiques et industrielles, 1203. Expéditions Polaires Françaises [travaux], IV.) [Physical mechanisms; true soils; superficial formations; practical applications. Bibliography.]
