THE JOURNAL

The Journal of the Australian Mathematical Society began publication in 1959, and from 1975 appears in two series. Series A (Pure Mathematics) and Series B (Applied Mathematics). Information about Series A may be found on the inside back cover.

SERIES B APPLIED MATHEMATICS

This series will be published in volumes, comprising four parts, starting with volume XIX Part I in 1975. Initially two parts will be published annually. Subscriptions may be arranged through the Business Manager (see inside back cover). The annual cost for 1978 is \$20.

It is the editorial policy of Series B to accept papers in any field of applied mathematics and related mathematical sciences, excluding statistics. Novel applications of mathematics in real situations are welcomed. Authors are encouraged to write an introduction accessible to the whole applied mathematical community. Every effort will be made to publish suitable material with a minimum of delay.

Manuscripts (two copies) for publication should be sent to the editor or to an appropriate associate editor at the address given above. Such action is a representation by the author that the manuscript has not been copyrighted or published, and that it is not being considered for publication elsewhere.

Authors are asked to read the section "Preparation of Manuscripts" on the outside cover.

Authors receive 50 free offprints of their papers; additional offprints may be ordered at cost. Excessive costs incurred by the Society through corrections to or withdrawal of articles may be charged to the authors concerned.
