COSMIC MASERS: PROPER MOTION TOWARD  
THE NEXT-GENERATION LARGE PROJECTS

IAU SYMPOSIUM 380

*COVER PICTURE:* The Sakura-jima volcano viewed from Kagoshima-city.

The Sakura-jima mountain is one of the most active volcanos in Japan, whose altitude is 1117 m. It is located ~10 km east of the downtown Kagoshima-city on the opposite side across the Kinko-wan Bay. Although it was quiescent during the IAU Symposium 380 held in Kagoshima-city from March 20 to 24, 2023, one can usually see a variety of interesting phenomena analogous to astrophysical maser activities: Intermittent eruptive events are observed frequently at the southern peak of Sakura-jima. In some cases, a large amount of volcanic dust and smoke are ejected from the crater up to a few 1000 m above the top of the mountain, and obscure the surrounding regions. Thanks to its activity, there are a number of hot springs in/around Sakura-jima including the central part of Kagoshima-city. As such, Sakura-jima is recognized as a symbolic landmark of Kagoshima-city.

The photograph was taken by Hiroshi Imai.

## Table of Contents

Preface . . . . .	xiv
The Organizing Committee . . . . .	xvi
Participants . . . . .	xvii

### Chapter 1: Cosmic Distance Scale and the Hubble Constant

Megamaser Cosmology Project II : The prospects for measuring a 1% $H_0$ and distances to high-z galaxies . . . . .	3 <i>Cheng-Yu Kuo, Dominic Pesce, Violetta Impellizzeri, James Braatz and Mark Reid</i>
Distance of the Seyfert 2 galaxy IC2560 and the Hubble constant . . . . .	12 <i>Naomasa Nakai, Aya Yamauchi, Madoka Yamazaki and Reo Harada</i>
The Past, Present, and Groundbreaking Future of OH Megamaser Discoveries . . . . .	16 <i>Hayley Roberts and Jeremy Darling</i>

### Chapter 2: Black Hole Masses and the M-sigma Relation

Supermassive black hole mass growth in infrared-luminous gas-rich galaxy mergers and potential power of (sub)millimeter $H_2O$ megamaser observations . . . . .	23 <i>Masatoshi Imanishi</i>
A 4000 $M_\odot$ supermassive star as a possible source for the W1 kilomaser . . . . .	36 <i>Katarzyna Nowak and Martin G. H. Krause</i>
OH megamaser emission in the outflow of the luminous infrared galaxy Zw049.057 . . . . .	40 <i>Susanne Aalto, Boy Lankhaar, Clare Wethers, Javier Moldon and Robert Beswick</i>
IC 485: A candidate for a new disk-maser galaxy . . . . .	45 <i>Elisabetta Ladu, Andrea Tarchi, Paola Castangia, Gabriele Surcis, James A. Braatz, Francesca Panessa and Dominic Pesce</i>
What's behind the corner: Maser emission in nearby and distant galaxies with the new radio facilities . . . . .	50 <i>Andrea Tarchi, Paola Castangia, Gabriele Surcis, Elisabetta Ladu and Elena Yu Bannikova</i>
Water megamaser emission in hard X-ray selected, highly obscured AGNs . . . . .	54 <i>Paola Castangia, Andrea Tarchi, Roberto Della Ceca, Alessandro Caccianiga, Paola Severgnini, Gabriele Surcis, Andrea Melis, Francesca Panessa, Angela Malizia and Loredana Bassani</i>

A Holistic Search for Megamaser Disks and their Role in Feeding Supermassive Black Holes . . . . .	57
<i>Anca Constantin, Cameron Kelahan, C. Y. Kuo and J. A. Braatz</i>	
Study of Active Galactic Nuclei using the Water Vapour Masers . . . . .	60
<i>Deepshikha, Nakai Naomasa, Yamazaki Madoka and Yamauchi Aya</i>	
Water masers associated with AGN in radio galaxies . . . . .	63
<i>Satoko Sawada-Satoh</i>	
<b>Chapter 3: Structure of the Milky Way</b>	
Galactic Astrometry with VLBI . . . . .	69
<i>Kazi L. J. Rygl</i>	
Galactic Maser Astrometry with VERA . . . . .	82
<i>Mareki Honma, Tomoya Hirota, Kazuya Hachisuka, Hiroshi Imai, Hideyuki Kobayashi, Takaaki Jike, Akiharu Nakagawa, Tomoaki Oyama, Kazuyoshi Sunada, Daisuke Sakai, Nobuyuki Sakai and Aya Yamauchi</i>	
Galactic astrometry with Gaia . . . . .	88
<i>Carme Jordi</i>	
The origin of the Perseus-arm gap revealed with VLBI astrometry . . . . .	97
<i>Nobuyuki Sakai, Hiroyuki Nakanishi, Kohei Kurahara, Daisuke Sakai, Kazuya Hachisuka, Jeong-Sook Kim and Osamu Kameya</i>	
Kinematics in the Galactic Center with SiO masers . . . . .	101
<i>Jennie Paine and Jeremy Darling</i>	
Trigonometric parallax, proper motion, and structure of three southern hemisphere methanol masers . . . . .	106
<i>Lucas J. Hyland, Simon P. Ellingsen, Mark J. Reid, Jayender Kumar and Gabor Orosz</i>	
Mapping the Far Side of the Milky Way . . . . .	111
<i>Mark J. Reid</i>	
Estimating distances to AGB stars using IR data . . . . .	116
<i>Rajorshi Bhattacharya, Ylva M Pihlström and Loránt O Sjouwerman</i>	
Astrometry of Water Maser sources in the Outer Galaxy with VERA . . . . .	119
<i>Hiroyuki Nakanishi, Nobuyuki Sakai, Kohei Kurahara and VERA Outer Rotation Curve project members</i>	
Astrometric observations of water maser sources toward the Galactic Center with VLBI . . . . .	122
<i>Daisuke Sakai, Tomoaki Oyama, Hideyuki Kobayashi and Mareki Honma</i>	
Water Masers in the Galactic Center . . . . .	125
<i>Dylan Ward, Jürgen Ott and David S. Meier</i>	
Searching masers from the Sagittarius stellar stream . . . . .	128
<i>Yuanwei Wu, Bo Zhang, Yan Gong, Wenjin Yang and Nicolas Mauron</i>	

## Chapter 4: Dynamics of Formation of Massive Stars

Evolutionary Trends in Star Formation . . . . .	135
<i>J. S. Urquhart</i>	
Masers in accretion burst sources . . . . .	152
<i>Olga Bayandina and the M2O collaboration: Agnieszka Kobak, Alessio Caratti o Garatti, Alexander Tolmachev, Alexandr Volvach, Alexei Alakoz, Alwyn Wootten, Anastasia Bisyarina, Andrews Dzodzomenyo, Andrey Sobolev, Anna Bartkiewicz, Artis Aberfelds, Bringfried Stecklum, Busaba Kramer, Callum Macdonald, Claudia Cyganowski, Francisco Colomer, Cristina Garcia Miro, Crystal Brogan, Dalei Li, Derck Smits, Dieter Engels, Dmitry Ladeyschikov, Doug Johnstone, Elena Popova, Emmanuel Proven-Adzri, Fanie van den Heever, Gabor Orosz, Gabriele Surcis, Gang Wu, Gordon MacLeod, Hendrik Linz, Hiroshi Imai, Huib van Langevelde, Irina Val'tts, Ivar Shmild, James O. Chibueze, Jan Brand, Jayender Kumar, Jimi Green, Job Vorster, Jochen Eisloffel, Jungha Kim, Koichiro Sugiyama, Karl Menten, Katharina Immer, Kazi Rygl, Kazuyoshi Sunada, Kee-Tae Kim, Larisa Volvach, Luca Moscadelli, Lucas Jordan, Lucero Uscanga, Malcolm Gray, Marian Szymczak, Mateusz Olech, Melvin Hoare, Michał Durjasz, Mizuho Uchiyama, Nadya Shakhorostova, Paweł Wolak, Sergei Gulyaev, Sergey Khaibrakhmanov, Shari Breen, Sharmila Goedhart, Silvia Casu, Simon Ellingsen, Stan Kurtz, Stuart Weston, Tanabe Yoshihiro, Tim Natusc, Todd Hunter, Tomoya Hirota, Willem Baan, Wouter Vlemmings, Xi Chen, Yan Gong, Yoshinori Yonekura, Zsófia Marianna Szabó, Zulema Abraham</i>	
Maser Tracers of Gas Dynamics near Young Stars New Perspectives . . . . .	159
<i>Alberto Sanna and Luca Moscadelli</i>	
Snapshot of a magnetohydrodynamic disk wind traced with water masers . . . . .	167
<i>Luca Moscadelli, Alberto Sanna, Henrik Beuther, André Oliva and Rolf Kuiper</i>	
The water and methanol masers in the face-on accretion system around the high-mass protostar G353.273+0.641 . . . . .	172
<i>Kazuhito Motogi, Tomoya Hirota, Masahiro N. Machida, Kei E. I. Tanaka and Yoshinori Yonekura</i>	
Monitoring of the polarized H <sub>2</sub> O maser emission around the massive protostars W75N(B)-VLA 1 and W75N(B)-VLA 2 . . . . .	177
<i>Gabriele Surcis, Wouter H. T. Vlemmings, Ciriaco Goddi and José-María Torrelles</i>	
Simultaneous observations of excited OH and methanol maser - coincidence and magnetic field . . . . .	182
<i>Agnieszka Kobak</i>	
High resolution VLBI observations of 6.7GHz periodic methanol masers . . . . .	186
<i>Mateusz Olech</i>	
Detection of the longest periodic variability in 6.7 GHz methanol masers with iMet . . . . .	189
<i>Yoshihiro Tanabe and Yoshinori Yonekura</i>	

Maser Activity of Large Molecules toward Sgr B2 North . . . . .	194
<i>Ci Xue, Anthony Remijan, Alexandre Faure and Brett McGuire</i>	
Feature prospects of IRAS 20126+4104 maser studies . . . . .	199
<i>Artis Aberfelds, Anna Bartkiewicz, Jānis Šteinbergs and Ivar Shmeliņš</i>	
The Dynamics of the Outflow Structure in W49N . . . . .	202
<i>Kitiyanee Asanok, M. D. Gray, T. Hirota, K. Sugiyama, M. Phetra, B. H. Kramer, T. Liu, K. T. Kim and B. Pimpanuwat</i>	
ALMA observations of the environments of G301.1364-00.2249A . . . . .	204
<i>Zh. Assembay, T. Komesh, G. Garay, A. Omar, J. Esimbek, N. Alimgazinova, M. Kyzgarina and Sh. Murat</i>	
Methanol and excited OH masers in W49N as observed using EVN . . . . .	207
<i>Anna Bartkiewicz, Marian Szymczak, Agnieszka Kobak and Mirosława Aramowicz</i>	
Catching unusual phenomena with extensive maser monitoring . . . . .	210
<i>Michał Durjasz</i>	
Water maser flare and potential accretion burst in NGC 2071-IR . . . . .	213
<i>Andrews Dzodzomenyo, James O. Chibueze and Stefanus van den Heever</i>	
Discovery of circular polarization of the 6.7 GHz methanol maser in G33.641-0.228 . . . . .	216
<i>Kenta Fujisawa</i>	
Jet and Outflows in Massive Star Forming Region: G10.34–0.14 . . . . .	218
<i>Jihyun Kang, Mikyoung Kim, Kee-Tae Kim, Hirota Tomoya and KaVA SF team</i>	
Multiple scales of view for outflow driven by a high-mass young stellar object, G25.82-W1 . . . . .	221
<i>Jungha Kim, Mikyoung Kim, Tomoya Hirota, Minho Choi, Miju Kang, Kee-Tae Kim and KaVA working group for star formation</i>	
A Multiwavelength study towards Galactic HII region G10.32-0.26 . . . . .	224
<i>Mi Kyoung Kim, Tomoya Hirota, Kee-Tae Kim and KaVA SFR sub Working Group</i>	
Yamaguchi interferometer survey of protostellar outflows embedded in 70- $\mu$ m dark infrared dark cloud . . . . .	227

Author Index . . . . .	511

## Preface

The International Astronomical Union (IAU) Symposium 380 entitled *Cosmic Masers: Proper Motion toward the Next-Generation Large Projects* (IAUS 380) was held from March 20 (Mon) 2023 to March 24 (Fri) 2023 in Kagoshima, Japan. Kagoshima-city is located in the south-western region of Japan, and provides grand views of an active volcano, Sakura-jima, which was the location of the IAUS 380 excursion. At the local Kagoshima University, there is an active and large astronomy community which is involved in many aspects of maser research. Staff members and students from this community contributed to the IAUS 380 by serving on the LOC and as symposium volunteers.

Considering the unexpected situation due to the world-wide COVID-19 pandemic, the IAUS 380 was planned as a hybrid conference. At the time of the registration in late 2022, both in-person and online participants were accepted. Finally, because the COVID-19 situation eased in Japan in early 2023, in total 102 people participated in-person in Kagoshima and 70 participated online. In total 28 countries were represented. Among the 172 registered participants, 43 (25%) were at an early career stage before having received their PhD degrees.

Since the discovery of the strong molecular lines of OH and H<sub>2</sub>O in 1960s, cosmic masers have been employed as unique probes of various astronomical objects, ranging from newly born stars and evolved stars, the interstellar medium to active galactic nuclei. The maser scientific community is diverse and multidisciplinary but has long been tied together through the common background physics and observational techniques. To connect and build new collaborations, international meetings focusing on masers have been organized regularly since 1992 in US, including the past IAU symposia 206 in Brazil (2001), 242 in Australia (2007), 287 in South Africa (2012), and 336 in Italy (2017). The IAUS 380 is the 6th big international maser conference and the first one in Asia. It took place about 5.5 years after the last meeting and thus filled in the final gap in global coverage and time.

In the science sessions we discussed seven major themes of maser research, from maser theory, cosmology, galaxies, the Milky Way Galaxy, star-formation, evolved stars, to future projects. In order to allow online speakers from outside of Japan to join the meeting during their convenient time zones, we divided each science topic into 2 or more sessions at time ranges. There were 8 review talks including a summary talk of the IAUS 380, 19 invited talks, 37 contributed talks, and 55 poster presentations including 1-minute flash talk for every poster.

As explicitly defined in the sub-title, we organized intensive discussion sessions for currently on-going and future projects related to most of the maser science topics. Taking the opportunity of the IAUS framework, several informal satellite meetings were held during lunch breaks to discuss international collaborations for future studies. An emphasis was on time-domain studies from daily to decadal monitoring of maser sources that were reported using a variety of telescopes from many different research teams in all regions of the world. Furthermore, multi-wavelength studies of maser sources thrived over the last decade exploiting synergies with large facilities such as ALMA, JVLA, Gaia and various VLBI networks.

It is a great pleasure to acknowledge the financial support of all the sponsors listed on the next page of these Proceedings. We would like to thank the active support of the LOC and SOC members to prepare and realize the IAUS 380 under the difficult conditions of

the COVID-19 pandemic. In particular, we are grateful to volunteer members of the IAUS 380, and local staff members related the conference venue with organizing the logistics, excursion, coffee/tea breaks, and banquet during the meeting.

*Tomoya Hirota, Hiroshi Imai, Karl Menten, & Ylva Pihlström*

# The Organizing Committee

## Scientific

A. Bartkiewicz (Poland)  
C. L. Brogan (USA)  
J. O. Chibueze (South Africa)  
C. J. Cyganowski (UK)  
G. Garay (Chile)  
Y. Hagiwara (Japan)  
T. Hirota (co-chair, Japan)  
K. Immer (The Netherlands)

J. -h. Kang (Republic of Korea)  
S. Leurini (Italy)  
K. M. Menten (co-chair, Germany)  
Y. M. Pihlström (co-chair, USA)  
M. J. Reid (USA)  
M. Rioja (Australia)  
B. Zhang (China)

## Local

R. A. Burns  
T. Handa  
M. Honma  
H. Imai (co-chair)  
A. Imakado

A. Nakagawa (co-chair)  
H. Nakanishi  
H. Shinnaga  
S. Takakuwa  
Y. Tsukamoto

## Acknowledgements

The symposium is sponsored and supported by the IAU Divisions H (Interstellar Matter and Local Universe), B (Facilities, Technologies and Data Science), G (Stars and Stellar Physics), and J (Galaxies and Cosmology).

Funding and support by the  
International Astronomical Union,  
Amanogawa Galaxy Astronomy Research Center, Kagoshima University,  
National Astronomical Observatory of Japan,  
KAKENHI, Grants-in-Aid for Scientific Research,  
Foundation for Promotion of Astronomy,  
Inoue Foundation for Science,  
Kajima Foundation,  
and  
Kagoshima Convention & Visitors Bureau,  
are gratefully acknowledged.

## Participants

Susanne **Aalto**, Chalmers University of Technology, Sweden  
Artis **Aberfelds**, Ventspils University of Applied Sciences, Latvia  
Zulema **Abraham**, University of Sao Paulo, Brazil  
Takuya **Akahori**, National Astronomical Observatory of Japan, Japan  
Kei **Amada**, Kagoshima University, Japan  
Kitiyanee **Asanok**, National Astronomical Research Institute of Thailand, Thailand  
Anna **Bartkiewicz**, Torun Institute of Astronomy, Poland  
Alain **Baudry**, University Bordeaux, L.A.B., France  
Olga **Bayandina**, INAF - Osservatorio Astrofisico di Arcetri, Italy  
Rajarshi **Bhattacharya**, University of New Mexico, USA  
Shuaibo **Bian**, Purple Mountain Observatory, China  
James **Braatz**, National Radio Astronomy Observatory, USA  
Jan **Brand**, INAF - Istituto di Radioastronomia, Italy  
Shari L. **Breen**, SKA Observatory, UK  
Crystal L. **Brogan**, National Radio Astronomy Observatory, USA  
Andreas **Brunthaler**, Max-Planck-Institut fur Radioastronomie, Germany  
Ross Alexander **Burns**, National Astronomical Observatory of Japan, Japan  
Roldán A. **Cala**, Instituto de Astrofísica de Andalucía (IAA-CSIC), Spain  
Paola **Castangia**, INAF - Osservatorio Astronomico di Cagliari, Italy  
Priscila **Chacón**, Universidad de Guanajuato, Mexico  
James Okwe **Chibueze**, North-West University, South Africa  
Se-Hyung **Cho**, Seoul National University, Republic of Korea  
Mark J. **Clausen**, National Radio Astronomy Observatory, USA  
Anca **Constantin**, James Madison University, USA  
Claudia J. **Cyganiowski**, University of St Andrews, UK  
Joanne R. **Dawson**, Macquarie University / CSIRO Space & Astronomy, Australia  
Deepshikha **Deepshikha**, Deepshikha, Japan  
Jean-Francois **DESMURS**, Observatorio Astronomico Nacional, Spain  
Philip **Diamond**, SKA Observatory, UK  
Richard **Dodson**, ICRAR/UWA, Australia  
Tânia Pereira **Dominici**, National Institute for Space Research (INPE/MCTI), Brazil  
Le Thong **Duc**, Institute for Computational Science, Vietnam  
Michał Tomasz **Durjasz**, Nicolaus Copernicus University, Poland  
Andrews Mawuli, Kodzo **Dzodzomenyo**, North-West University, South Africa  
Simon **Ellingsen**, University of Tasmania, Australia  
Dieter **Engels**, Hamburger Sternwarte, Universitat Hamburg, Germany  
Sandra **Etoka**, Jodrell Bank Centre for Astrophysics, University of Manchester, UK  
Kenta **Fujisawa**, Yamaguchi Univeristy, Japan  
Marcin **Glowacki**, CIRA (Curtin Institute of Radio Astronomy), Australia  
Sharmila **Goedhart**, South African Radio Astronomy Observatory, South Africa  
José-Francisco **Gómez**, Instituto de Astrofísica de Andalucía (IAA-CSIC), Spain  
Mark Daniel **Gorski**, Chalmers University of Technology, Sweden  
Malcolm David **Gray**, National Astronomical Research Institute of Thailand, Thailand  
Jimi A. **Green**, SKA Observatory, UK  
Yoshiaki **Hagiwara**, Toyo University, Japan  
Chaojie **Hao**, Purple Mountain Observatory, China  
Tomoya **Hirota**, National Astronomical Observatory of Japan, Japan  
Peter **Hofner**, New Mexico Tech & NRAO, USA  
Mareki **Honma**, National Astronomical Observatory of Japan, Japan  
Martin **Houde**, University of Western Ontario, Canada  
Elizabeth **Humphreys**, ESO / ALMA, Chile

- Todd **Hunter**, National Radio Astronomy Observatory, USA  
Lucas Jordan **Hyland**, University of Tasmania, Australia  
Nao **Ikeda**, Kagoshima University, Japan  
Hiroshi **Imai**, Kagoshima University, Japan  
Masatoshi **Imanishi**, National Astronomical Observatory of Japan, Japan  
Katharina **Immer**, Leiden University / ESO, The Netherlands  
Violette **Impellizzeri**, Leiden Observatory, The Netherlands  
Carme **Jordi**, University of Barcelona (ICCUB-IEEC), Spain  
Jihyun **Kang**, Korea Astronomy and Space Science Institute, Republic of Korea  
Rina **Kasai**, Kagoshima University, Japan  
Kaito **Kawakami**, Kagoshima University, Japan  
Dongjin **Kim**, MIT Haystack Observatory, USA  
Jungha **Kim**, Korea Astronomy and Space Science Institute, Republic of Korea  
Kee-Tae **Kim**, Korea Astronomy and Space Science Institute, Republic of Korea  
Mikyoung **Kim**, Otsuma Women's University, Japan  
Soon-Wook **Kim**, Korea Astronomy and Space Science Institute, Republic of Korea  
Keita **Kitaguchi**, Yamaguchi University, Japan  
Agnieszka **Kobak**, Nicolaus Copernicus University in Torun, Poland  
Hideyuki **Kobayashi**, National Astronomical Observatory of Japan, Japan  
Toktarkhan **Komesh**, Nazarbayev University, Kazakhstan  
Busaba **Kramer**, Max Planck Institute for Radio Astronomy, Germany  
Martin Gustav Heinrich **Krause**, University of Hertfordshire, UK  
Jayender **Kumar**, University of Tasmania, Australia  
Cheng-Yu **Kuo**, National Sun Yat-Sen University, Taiwan  
Tomoharu **Kurayama**, Teikyo University of Science, Japan  
Dmitry A. **Ladeyschikov**, Ural Federal University, Russia  
Elisabetta **Latu**, Universita degli studi di Cagliari - Osservatorio Astronomico di Cagliari - INAF, Italy  
Boy **Lankhaar**, Chalmers University of Technology, Sweden  
Megan Olivia **Lewis**, Nicolaus Copernicus Astronomical Center, Polish Academy of Sciences, Poland  
Jingjing **Li**, Purple Mountain Observatory, China  
Yingjie **Li**, Purple Mountain Observatory, China  
Zehao **Lin**, Purple Mountain Observatory, China  
Dejian **Liu**, Purple Mountain Observatory, China  
Michael **Logue**, University of St Andrews, UK  
Xiaofeng **Mai**, Shanghai Astronomical Observatory, China  
Lynn D. **Matthews**, MIT Haystack Observatory, USA  
Karl M. **Menten**, Max Planck Institute for Radio Astronomy, Germany  
Ryo **Miyamoto**, Gifu University, Japan  
Hafieduddin **Mohammad**, ITB, Indonesia  
James Michael **Moran**, Center for Astrophysics — Harvard & Smithsonian, USA
