# THE DESTRUCTION OF PINK BOLL WORM IN COTTON SEED

**SIMON'S PATENT HEATERS. 100% Mortality. No damage to seed.**

Extract from *Egyptian Ministry of Agriculture Official Bulletin* :—

“ In running the only requirement is the necessary steam power. No extra labour is involved, the seed being sacked as it comes from the machine instead of as it comes from the gins in the usual way. The machine is therefore cheap as regards both initial cost and running expenses ; it is very compact, simple of construction, easy of management, continuous in action, and entirely devoid of danger ; it is therefore a practical proposition from every point of view.”
