# Mandingo Kingdoms of the Senegambia

Charlotte A Quinn

Dr. Quinn examines the structure of the Mandingo state system through the synthesis of a wide range of African and European documentary sources as well as oral traditions of the Senegambia. The complex interrelations of Africans with Europeans and with each other during the pre-colonial period provide a fascinating case study of contacts between differing cultures and philosophies, and this study will be especially welcome at a time when there has been a great resurgence of interest in Mandingo history.

# History of the Bemba

A D Roberts

In this study Dr. Roberts describes and analyses the internal social and political trends which have influenced the history of this Central African people, and considers the impact—economic and political—of trade and other external forces. Making extensive use of both oral tradition and written sources, he reconstructs the Bemba polity and describes the conflicts and political pressures which affected its development, from the earliest legends about Bemba origins to their relations with the imperial government. He also examines the origins, development and institutions of the Bemba Chieftainship in a book which will prove a major contribution to the study of Central African History.

# A Grand Illusion

Donald Denoon

At the end of the Boer War in 1902 every state in Southern Africa was either a Crown Colony or governed by a Ministry well disposed towards the imperial connection. It seemed that imperial influence would be restored. The loss of the Transvaal, however, decisively diminished imperial power in the subcontinent and Dr. Denoon seeks to establish why this power declined from its apparently dominant position of 1902 to its parlous state in 1905. This book is an examination of the aftermath of the War, the period of reconstruction, during which the imperial authorities suffered a series of political reverses which proved to be of crucial importance for the future course of South African history.
