JOURNAL of HELMINTHOLOGY

Aims and Scope

Journal of Helminthology provides an international vehicle for the publication of original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts including plant and insect parasites will also be welcome. Taxonomic contributions will be acceptable if they contribute to the systematics of a group and particularly if they employ biochemical or molecular biological techniques.

Journal of Helminthology is published quarterly by Cambridge University Press and is available on the internet at journals.cambridge.org/jhl
