

Index of Subjects

- Acetaldehyde, blood, relation to nutrient balance and alcohol consumption, rat 103
- Aflatoxin, relation between dietary carbohydrate and aflatoxin B₁ metabolism, rat 393
- Albumin, serum levels, effect of dietary, cultural and socio-economic changes, healthy adult Nigerian population 439
- Alcohol, effect on oxygen consumption, relation to food intake, women 293
- Alkaline ribonuclease, index of nitrogen balance, comparative study of N balance techniques, low-birth-weight infants 459
- Amino acid(s) *see* Cystine, Lysine, Methionine
- 2-Aminoethylphosphonic acid, indicator of *Tetrahymena pyriformis* W growth, protein-quality evaluation assay 83
- Amino acid analogues, effect on protein synthesis and degradation in rat reticulocytes and Reuber H35 hepatoma 275
- Amylase, activity in digestive tract, effect of dietary trypsin inhibitors, chicks 235
- Behavioural responses, effects of early undernutrition, relation to brain growth, guinea-pig 543
- Bile composition and secretion, relation to gallstone formation and cholesterol solubility, hypovitaminotic guinea-pigs 317
- Biotin, effect of dietary level on hepatic gluconeogenic capacity, relation to incidence of fatty liver and kidney syndrome, chicks 221
- Body density, prediction from anthropometric equations, man 497
- Caecum, relation between absorption of inorganic ions and volatile fatty acid absorption, ion-replacement experiments, rabbit 509
- Calcium, absorption, effect of water-soluble oxalates in *Amaranthus* spp. leaves, man 591
- Calcium, metabolism, effect of dietary protein intake on Ca retention Ca kinetic study 505
- Calcium, metabolism, effect of high-Ca infusion, Ca-deficient sheep 17
- Calf 125, 543
- Calf *see also* Cattle
- Carbohydrate, dietary quality, relation between readily-fermentable carbohydrate and branched-chain fatty acids in subcutaneous triacylglycerols, ruminants 29
- Carbohydrate *see also* Gangliosides, Starch
- Cattle 125, 473
- Chick 63, 221, 235, 311
- Copper, rate of accretion during gestation in multiple fetuses, use of Grompertz form equations, sheep 379
- Cystine, dietary requirement, relation to dietary methionine, effect on liver enzyme activity, barley diets, rat 443
- Dehydration, effect of fasting on fluid and electrolyte balance, Sudanese moslems 583
- Dehydration, effect of fasting on serum uric acid and lipid concentrations, Sudanese moslems 573
- Digesta flow, duodenum, effects of bucket-*v.* teat-feeding and warm-*v.* cold-milk feeding, calf 553
- Dihomo- γ -linolenic acid, effect on liver phospholipid fatty acids, essential fatty acid-deficient rat 155
- Energy metabolism, energy requirements for growth, relation between environmental temperature and plane of nutrition, pig 433
- Environmental temperature, effect on energy utilization for growth and maintenance, relation to plane of nutrition, pig 433
- Environmental temperature, effect on energy and nitrogen balances, relation to plane of nutrition, pig 423
- Environmental temperature, effect on heat losses and energy balance, relation to plane of nutrition, pig 413
- Environmental temperature, effect with feeding regimen on growth rate and food intake, broiler 311
- Enzymes *see* Alkaline ribonuclease, Amylase, Lipase, Superoxide dismutase, Tetrahydrofolate dehydrogenase
- Essential fatty acid deficiency, effect of dihomo- γ -linolenic acid on liver phospholipid fatty acids, rat 155
- Ethanol, effect of dietary balance on consumption and elimination, rat 103
- Fat(s) *see also* Dihomo- γ -linolenic acid, Essential fatty acids, Fatty acids, Phospholipids, Phosphatidylethanolamine, Volatile fatty acids
- Fat deposition, subcutaneous, effect of pregnancy, potential as an index of nutritional status, man 485
- Fatty acids, branched-chain, relative proportions in triacylglycerols of subcutaneous adipose tissue, species differences in barley-fed ruminants 29
- Fatty liver and kidney syndrome, relation between dietary biotin level and hepatic gluconeogenic capacity, chicks 221
- Feeding regimen, effect with environmental temperature on growth rate and food intake, broiler 311
- Fibre, adsorption of bile salts, role of saponins, relation to serum cholesterol reduction in man and experimental animals 299
- Fibre, dietary components, metabolism assessment from breath hydrogen and methane 399
- Fibre, dietary source, growth-promoting effect of wheat bran, response of small intestine and caecum, chick 63
- Fluoride, retention, availability from by-products of aluminium smelting, urine faeces and tissue analysis, rat 139

- Folate, serum and erythrocyte levels, relation to dietary habit, vegan 9
- Folic acid, effect of dietary status on maternal tetrahydrofolate dehydrogenase activity and foetal growth, rat 529
- Food allergy, immunological response to cow's milk proteins, hand-reared infant rabbits 289
- Food intake, comparative study, captive non-human primates 55
- Food intake, ruminant relation to distension of the reticulorumen, roughage diets, sheep 323
- Food restriction, effect of fasting on fluid and electrolyte balance, Sudanese moslems 583
- Food restriction, effect of fasting on serum uric acid and lipid concentrations, Sudanese moslems 573
- Forages, voluntary intake and digestion, seasonal effects, sheep and red deer (*Cervus elaphus*) 347
- Gangliosides, brain content and metabolism, effect of undernutrition, rat 403
- Gastric secretion, effect of dry cow's milk, suckling and early-weaned pigs 91
- Growth rate, relation between environmental temperature and plane of nutrition, pig 423
- Guinea-pig 317, 543
- Heat-damaged proteins, effect of 'unavailable peptides' on amino acid absorption, everted-sac technique, rats 185
- Heat loss, relation between environmental temperature and plane of nutrition, pig 413
- 1- α -Hydroxycholecalciferol, effect on calcium and phosphorus metabolism, lactating ewe 387
- Immune response, relation to protein status of irradiated diets, rat 541
- Iron, intestinal absorption, relation to lead absorption, effect of dietary Fe deficiency, rat 253
- Irradiation, relation to dietary protein, effect on immune response, rat 535
- Ketone-body metabolism, liver, relation between blood concentration and hepatic production capacity, developing and pregnant sheep 359
- Lactation, effect of 1- α -hydroxycholecalciferol on calcium and phosphorus metabolism, sheep 387
- Lamb 171, 193
- Lead absorption, small intestine, relation to dietary iron status, rat 253
- Lipase, saliva, effect on fatty acid release from milk fat, abomasum, preruminant calf 125
- Lipid digestion, action of salivary lipase on milk fat, fatty acid release in abomasum, preruminant calf 125
- Lysine, dietary requirement, assessment from plasma amino acid and blood urea levels, lactating sow 369
- Lysine, status in protein concentrates, relation to total lysine content, evaluation study, pig 23
- Magnesium, site of absorption in stomachs, comparative study of measurement techniques, young steer 473
- Man 9, 45, 115, 269, 293, 399, 439, 459, 485, 497, 573, 583, 591
- Markers, analysis of concentration patterns, passage through stomach, effect of concentrate diet, sheep 71
- Megaloblastic anaemia, relation of incidence to dietary habit, vegan 9
- Metabolizable energy, effect of replacing barley by volatile fatty acids, comparative slaughter experiment, growing lambs 171
- Methionine, dietary requirement, relation to dietary cystine, effect on liver enzyme activity, rat 443
- Microbial protein synthesis, rumen, effect of dietary energy source, sheep 35
- Minerals *see* Calcium, Copper, Fluoride, Iron, Lead, Magnesium, Nitrogen, Phosphorus, Selenium, Zinc
- Mineral absorption, net changes occurring in sections of the gut, relation to proportions of dietary roughage and cereal, sheep 491
- ¹⁵N tracer dilution technique, estimation of transfer of plasma-urea-nitrogen to rumen ammonia, sheep 149
- Nitrogen balance, study of measurement techniques, assessment of suitability of serum alkaline ribonuclease status, low-birth-weight infants 459
- Nitrogen metabolism, rumen, effect of dietary energy source on microbial protein synthesis, sheep 35
- Nutrient balance, effect on ethanol consumption and elimination, rat 103
- Nutritional status, pregnant women, evaluation of method involving subcutaneous fat measurement 489
- Nutritive value, dietary fibre, growth-promoting effect of wheat bran, chick 63
- Oxalates, water-soluble content of *Amaranthus* spp. leaves, effect on calcium absorption, man 591
- Pancreatic secretion, effects of bucket-*v.* teat-feeding and warm-*v.* cold-milk feeding, calf 553
- Phosphatidylcholine, synthesis in liver, effects of vitamin B₁₂ deficiency, rat 521
- Phospholipids, brain content and metabolism, effect of under-nutrition, rat 403
- Phosphorus, metabolism, relation to calcium retention, effect of high-Ca infusion, Ca-deficient sheep 17
- Pig 23, 91, 243, 369, 413, 423
- Primates, non-human captives, comparative feeding study 55
- Protein(s) *see* Albumin
- Protein hydrolysis, assessment of its role in heat production associated with protein ingestion, casein-hydrolysate diets, rat 465
- Protein synthesis, effect of time on response to anabolic agent trenbolone acetate, rat 563
- Protein synthetic rate, estimation by constant infusion of labelled amino acids, pig 243
- Protein utilization, role of starch component of cereals and legumes, rats 1
- Proteolytic activity, stomach, effect of dry cow's milk, suckling pigs and early-weaned pigs 91

- Pyridoxine requirement, effect of dietary pyridoxine status on aminotransferase activity and growth rate, turbot 261
- Rabbit 289, 509
- Rat 1, 113, 139, 155, 185, 253, 393, 403, 443, 465, 521, 529, 535, 541, 563
- Red deer (*Cervus elaphus*) 347
- Ruminants, branched-chain fatty acids, adipose tissue triacylglycerols, effect of diets rich in readily-fermentable carbohydrate 29
- Selenium, effect of supplementation by various methods on haematological and blood chemistry, ewes and lambs 193
- Selenium metabolism, quantitative study in New Zealand women 45
- Sheep 17, 35, 71, 171, 193, 205, 323, 339, 347, 359, 377, 387, 491, 505
- Sheep *see also* Lamb
- Silage, effect of time of harvesting on nutritive value, relation to energy metabolism, sheep 205
- Specific dynamic action, study of dietary casein hydrolysates, relation between heat production and protein hydrolysis in gut, rat 465
- Starch, cereals and legumes, effect on protein utilization, rat 1
- Superoxide dismutase, activity in regenerating liver, effect of zinc deficiency, rat 113
- Technique, estimation of proportion of microbial amino acids in total amino acids passing into rumen, sheep 35
- Technique, estimation of protein synthetic rate by constant infusion of labelled amino acids, pig 243
- Technique, protein-quality evaluation, 2-aminoethylphosphonic acid as an indicator of *Tetrahymena pyriformis* W growth 83
- Technique, total lysine estimation as a predictor of lysine status of protein concentrates, pig 23
- Technique, whole-body counting of ⁶⁵Zn to estimate Zn status in rheumatoid arthritis, man 115
- Tetrahydrofolate dehydrogenase, response to dietary folate status in pregnancy, relation to foetal growth, rat 529
- Tetrahymena pyriformis* W, protein-quality evaluation assay, use of 2-aminoethylphosphonic acid 83
- Trenbolone acetate, effect with time on responses of protein synthesis, rat 563
- Trypsin inhibitor, relation between presence in diet and intestinal amylase activity, chick 235
- Turbot (*Scophthalmus maximus*) 261
- Undernutrition, growth retardation in early life, relation between behavioural responses and brain growth, guinea-pig 543
- Undernutrition, effect on brain metabolism of phospholipids and gangliosides, rat 403
- Urea, transfer of plasma urea-nitrogen to rumen ammonia, effect of ammonium chloride and [¹⁵N]-urea infusions, sheep 149
- Urea supplementation, cereal-based diets, estimation of optimum concentration from requirements of host and rumen micro-organisms 337
- Vegan, effect of dietary habit on serum folate, vitamin B₁₂ and erythrocyte folate, man 9
- Vitamin(s) *see also* Biotin, Folate, Folic acid, Pyridoxine, Vitamin B₁₂, Vitamin C, Vitamin E
- Vitamin B₁₂, effect of administration by injection on physical performance capacity of healthy subjects, man 269
- Vitamin B₁₂, serum, relation to dietary habit, incidence of megaloblastic anaemia, vegan 9
- Vitamin B₁₂ deficiency, effect on liver phospholipid metabolism and composition, determination of phosphatylethanolamine methylation, rat 521
- Vitamin C, relation between dietary deficiency and gallstone formation, guinea-pig 317
- Vitamin E, effect of supplementation by various methods on haematological and blood chemistry, ewes and lambs 193
- Volatile fatty acids, metabolizable energy source in concentrate diets, efficiency of utilization determined by comparative slaughter, growing lamb 171
- Zinc, nutritional deficiency, effect on superoxide dismutase activity and lysosomal stability, liver, rat 133
- Zinc, rate of accretion during gestation in multiple foetuses, use of Grompertz form equations, sheep 379
- Zinc, whole-body content and turnover, estimation in rheumatoid osteoarthritis, use of ⁶⁵Zn tracer, man 115
