BRITISH JOURNAL for the HISTORY OF PHILOSOPHY

The first issue of the *British Journal for the History of Philosophy* was published in February 1993 and has filled a long-standing gap in the range of British Philosophy journals. Appearing twice a year, it includes articles and reviews on the history of philosophy and related intellectual history from the ancient world through to the early decades of the twentieth century, with particular emphasis on the period from the Renaissance to the 1940s. The journal's primary objective is to foster understanding of the history of philosophy through a deeper appreciation of the argument of past philosophers by a study of their texts, and through a proper awareness of the context - intellectual, political, and social - in which the text was created. Although full attention is given to the recognized classics of philosophy, due consideration is also given to the less major figures and to issues in disciplines other than philosophy as currently conceived - theology, the natural sciences, and the social sciences for instance - in so far as they throw light on the history of philosophy. The *British Journal for the History of Philosophy* is the official journal of the *British Society for the History of Philosophy*. The editor is Dr. G.A.J. Rogers (University of Keele).

CONTENTS OF VOLUME 1, NO. 2 September 1993

Articles

Descartes and Eustachius a Sancto Paulo:
Unravelling the Mind-Body Problem
LESLIE ARMOUR

Grades of Cartesian Innateness
KENNETH P. WINKLER

Clarke, Independence and Necessity
ROBIN ATTFIELD

The Homoletical Context of Butler's
Moral Philosophy
ALAN BRINTON

Spinoza and British Idealism:
The Case of H. H. Joachim
G. H. R. PARKINSON

Discussion

Journal for General Philosophy of Science

Zeitschrift für allgemeine Wissenschaftstheorie

Editors:

Lutz Geldsetzer, *Philosophisches Institut der Universität Dusseldorf, Germany*; **Gert König**, *Institut für Philosophie der Ruhr-Universität Bochum, Bochum, Germany*

The *Journal for General Philosophy of Science*/Zeitschrift für allgemeine Wissenschaftstheorie is a forum for the discussion of a variety of attitudes concerning the philosophy of science. It has as its subject matter the philosophical, especially methodological, ontological, epistemological, anthropological, and ethical foundations of the individual sciences. Particular emphasis is laid on bringing both the natural, the cultural, and the technical sciences into a philosophical context, within which the historical presuppositions and conditions of the current problems of the philosophy of science are also included in the discussion.

The *Journal for General Philosophy of Science*/Zeitschrift für allgemeine Wissenschaftstheorie has already been in existence for over two decades. It has been successful in its attempt to serve as a forum that bridges the gap between the different sciences, especially the natural, cultural, and social sciences. One of its purposes is to discuss and contrast the common as well as the different specific methodological and philosophical foundations of the individual sciences, taking into account all currently relevant positions of the philosophy of science.

In recent years considerable insight has been gained into the problems of current philosophy of science by considering the historical dimension of the sciences. This is why more intensive efforts will be made in the future towards the integration of historical and systematic considerations.

The journal contains:

- articles
- discussions
- reports on the state of the philosophy of science in individual countries
- reviews
- a bibliography of the major journals in the field of the history and philosophy of science.

The journal is of interest to philosophers, especially philosophers, of science, as well as to scholars from the fields of the natural, cultural, social and technical sciences who are interested in becoming aware of the philosophical implications of their disciplines and in being stimulated by the transfer of methods, leading ideas, concepts and theories from other fields.

Journal for General Philosophy of Science is indexed/abstracted in *INSPEC, Philosopher's Index, Information*.

PERSPECTIVES ON SCIENCE

Historical, Philosophical, Social

Perspectives on Science is devoted to studies on the sciences that integrate historical, philosophical, and sociological perspectives. Its interdisciplinary approach is intended to foster a more comprehensive understanding of the sciences and the contexts in which they develop.

Articles appearing in *Perspectives on Science* will consist of case studies and theoretical essays of a meta-historical and meta-philosophical character, featuring historiographical works combining social and institutional analyses of science, as well as analyses of experiments, practices, concepts and theories. Book reviews will appear in each issue.

Perspectives on Science will be published quarterly, beginning in Spring 1993, with about 130 pages per issue. One issue per year will usually be devoted to a single topic (with a guest editor). All contributions will be reviewed as well as evaluated by the editor and associate editors.

Manuscripts may be submitted to Joseph C. Pitt, Editor, *Perspectives on Science*, Department of Philosophy, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0126. Fax (703) 231-6367. Please submit two copies of all manuscripts and, if possible, a copy on computer diskette. A copy of the *POS* style sheet is available from the editorial office at the address above.

THE COLLECTED PAPERS OF ALBERT EINSTEIN

Volume 5

The Swiss Years: Correspondence, 1902-1914

Edited by Martin J. Klein, A. J. Kox, and Robert Schulmann

The great majority of the more than 500 letters from and to Einstein presented here have never been published before. They give us a much richer picture of Einstein in his twenties and early thirties than we have ever had.

Most significant, however, is the way the letters document crucial aspects of Einstein's scientific activity: his concentration for years on the problems of quanta and radiation, his extensive knowledge of experimental physics, his many interactions with experimentalists, and finally his long struggle to generalize the 1905 theory of relativity to include gravitation and accelerated frames of reference.

ROBERT MAYER AND THE CONSERVATION OF ENERGY

Kenneth L. Caneva

The principle of the conservation of energy was among the most important developments of nineteenth-century physics, and Robert Mayer was one of its codiscoverers. Kenneth Caneva provides a rich historical context for the problems and issues that concerned Mayer and for the ways in which he came to understand what became known as the conservation of energy.

"This book will be of fundamental importance for the history of nineteenth-century science. Caneva has a wonderful grasp of the intellectual context, and he presents a convincing reconstruction of Mayer's development and a new thesis about Mayer's work."—Richard Kremer, Dartmouth College

Cloth: \$49.50 ISBN 0-691-08758-X

New in paperback

CONCEPTUAL REVOLUTIONS

Paul Thagard

In this path-breaking work, Paul Thagard draws on the history and philosophy of science, cognitive psychology, and the field of artificial intelligence to develop a theory of conceptual change capable of accounting for all major scientific revolutions.

"Thomas Kuhn's *The Structure of Scientific Revolutions* (1962) familiarised a wide public with the idea of revolutions as the inevitable result of the development of 'normal science.' It also made them seem irrational, the outcome of processes which were compared to Gestalt-switches and religious conversions. Thagard seeks to reinstall reason at the core of science."—*P. M. Rattansi, The Times Higher Education Supplement*

STUDIES IN HISTORY AND PHILOSOPHY OF SCIENCE

Joint Editors: **NICHOLAS JARDINE**, *Department of History and Philosophy of Science, University of Cambridge, Free School Lane, Cambridge CB2 3RH, UK*
and **ANDREW CUNNINGHAM**, *Department of History and Philosophy of Science, University of Cambridge, Cambridge CB2 3RH, UK*
Senior Consulting Editor: **GERD BUCHDAHL**, *Department of History and Philosophy of Science, University of Cambridge, Cambridge, UK*

"... no journal other than *Studies* accepts articles across the full range of interests in interdisciplinary history and philosophy of science. Historians of science... would thus be well advised to scan its contents on a regular basis."

Rachel Laudan in *Isis*, Volume 81, Number 2, 1990

Studies in History and Philosophy of Science is essential reading for students and teachers concerned with the historical, social and intellectual contexts of the sciences and with their methodology and epistemology. The journal particularly encourages studies which integrate philosophical, historical and sociological considerations. Its orientation is international, with contributions from a wide range of cultural perspectives. Papers published are of the highest scholarly quality. Since the journal's inception it has proved an invaluable source both for reflective scientists and for workers in the history, philosophy and sociology of science. In 1993 *Studies* will be launching a new section entitled *Studies in History and Philosophy of Modern Physics* to be edited by Michael Redhead and Peter Galison. This section will cover the history, philosophy and sociology of physics from the mid nineteenth century to the present.

PROBLEMS OF RELATIVE GROWTH

Julian S. Huxley

*with an introduction by Frederick B. Churchill
and an essay by Richard E. Strauss*

Sir Julian Huxley was the first to put the concept of relative growth—or allometry—upon a firm mathematical foundation, and since publication of this book in 1932, his work has been found to have greater implications than even he imagined.

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Membership of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1993 is £22.00 (\$45.00) or £11.00 (\$25.00) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £17.00 (\$35.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below. Other sterling rates may apply to overseas members.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, but includes a three-day summer meeting, usually held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The British Journal for the History of Science is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Professor J. H. Brooke, Department of History, University of Lancaster, Lancaster LA1 4YG, England. Books for review should be sent to the Reviews Editor, Dr John Henry, Science Studies Unit, University of Edinburgh, 21 Buccleuch Place, Edinburgh EH8 9LN.

Advertising: Contact the Journals Advertising Manager, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr P. Weindling, Wellcome Unit for the History of Medicine, 45–47 Banbury Road, Oxford OX2 6PE, England. Monographs are available to members at a special price, post-free from the Society's Executive Secretary. Non-members may obtain them through bookshops, or post-free from the Executive Secretary. Titles are as follows:

2. *The Letters of Georges Cuvier: A Summary Calendar*. Ed. by Dorinda Outram. 1980. £4.50/\$10.00 (£3.50/\$8.00 to members).
3. *Rationality and Ritual: The Windscale Inquiry and Nuclear Decisions in Britain*. By Brian Wynne. 1982. £7.00/\$15.00 (£5.00/\$11.00 to members).
4. *The Royal Society and Its Fellows 1660–1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. Reprint with additional material (expected mid 1993).
5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).
6. *Archives of the British Chemical Industry, 1750–1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).
7. *Index to the Scientific Correspondence of John William Dawson*. By Susan Sheets-Pyenson. 1992. £20.00/\$44.00 (£12.00/\$26.00 to members).

Each year, the Society publishes a *List of Theses in History of Science* in British universities. This is available free to members, and at £3.00 (\$6.00) to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Frank A. J. L. James, RICHST, The Royal Institution, 21 Albemarle Street, London W1X 4BS, appears in January, May and September each year. It is free to members, £6.00 (\$12.00) for institutions and non-members. The Society's Education Section also has a regular *Newsletter, Education Forum*, edited by Peter Ellis, 12 Belvedere Street, Ryde, Isle of Wight, PO33 2JW.

Administrative business of the Society is handled by The Executive Secretary, Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH. The Society is registered in England as a Limited Company (No. 562208) and is a Registered Charity (No. 258854).

Copying: This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, MA 01970. Organizations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-0874/93 \$5.00+.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Back volumes are obtainable as follows: Volumes 1–23: Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxon SN7 8LH. For volume 24 onwards, apply to Cambridge University Press.
