

GLACIOLOGICAL LITERATURE

This is a selected list of glaciological literature on the scientific study of snow and ice and of their effects on the earth; for the literature on polar expeditions, and also on the "applied" aspects of glaciology, such as snow ploughs, readers should consult the bibliographies in each issue of the *Polar Record*. For Russian material the system of transliteration used is that agreed by the U.S. Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use in 1947. Readers can greatly assist by sending reprints of their publications to the Society, or by informing Dr J. W. Glen of publications of glaciological interest. It should be noted that the Society does not necessarily hold copies of the items in this list, and also that the Society does not possess facilities for microfilming or photocopying.

CONFERENCES

- SCHRAM, K., and THAMS, J. C., ed. 9. Internationale Tagung für alpine Meteorologie in Brig und Zermatt 14.-17. Sept. 1966. *Veröffentlichungen der Schweizerischen Meteorologischen Zentralanstalt*, Nr. 4, 1967. v, 366 p. [Proceedings of conference which included as one theme the relation between Alpine meteorology and glaciology. For relevant papers see elsewhere in this list.]
- [UNION GÉODÉSIQUE ET GÉOPHYSIQUE INTERNATIONALE.] *Union de Géodésie et Géophysique Internationale. Association Internationale d'Hydrologie Scientifique. Assemblée générale de Berne, 25 sept.-7 oct. 1967.* [Commission de Neiges et Glaces.] *Rapports et discussions*. Gentbrugge, Association Internationale d'Hydrologie Scientifique, 1968. 461 p. (Publication No. 79 de l'Association Internationale d'Hydrologie Scientifique.) Bel. fr. 500. [For details of papers see elsewhere in this list.]

GENERAL GLACIOLOGY

- AVSYUK, G. A., and KRENKE, A. N. The beginning of the Soviet glaciological investigations in the IHD programme. *Union de Géodésie . . . Berne, 1967.* [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 292-99. [Report of progress in forming programme for International Hydrological Decade, and some early results.]
- BENDER, J. A. Snow and ice. *Transactions. American Geophysical Union*, Vol. 48, No. 2, 1967, p. 724-29. [Review of recent work.]
- BOSTOCK, H. S. A catalogue of selected airphotographs. *Canada. Geological Survey. Paper 67-48*, 1968, iii, 163 p., map. [Description of aerial photographs of geomorphological phenomena in Canada. Includes many glaciological and glacial geological items.]
- HAEFELI, R. Research on snow, avalanches, ice and glaciers. (*In Thams, J. C., ed. The development of geodesy and geophysics in Switzerland . . . Zurich, Berichthaus, 1967*, p. 72-83.) [General account of early and recent Swiss research.]
- HANSEN, J. E., and CHEYNEY, H. Comments on the paper by D. G. Rea and B. T. O'Leary, "On the composition of the Venus clouds". *Journal of Geophysical Research*, Vol. 73, No. 18, 1968, p. 6136-37. [Criticism of conclusion of paper, ibid., Vol. 73, No. 2, 1968, p. 665-75, that ice crystals, if they exist, must be submicron in diameter.]
- HOINKS, H. C. Glaciology in the International Hydrological Decade. *Union de Géodésie . . . Berne, 1967.* [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 7-16. [Presidential address to Commission de Neiges et Glaces. Survey of glaciological programme of I.H.D.]
- MOKHNACH, D. O. O vozmozhnosti otseki razmerov i mass ledyanogo yadra komety [Possible evaluation of the dimensions and masses of the ice nucleus of a comet]. *Doklady Akademii Nauk SSSR*, Tom 180, No. 5, 1968, p. 1067-70. [Discussion of interpretation of optical observations in terms of photodissociation of molecules.]
- OWEN, T. Ice on Venus: can it exist? *Science*, Vol. 161, No. 3844, 1968, p. 915-16. [Arguments against existence of ice sheets on Venus and discussion of anomalous water content of Venus compared with Earth.]
- POLLACK, J. B., and SAGAN, C. The case for ice clouds on Venus. *Journal of Geophysical Research*, Vol. 73, No. 18, 1968, p. 5943-49. [Discussion of experimental evidence on reflectivity.]
- REA, D. G., and O'LEARY, B. T. On the composition of the Venus clouds. *Journal of Geophysical Research*, Vol. 73, No. 2, 1968, p. 665-75. [Spectroscopic evidence that ice crystals can only be present if they are submicron in size, which is not likely.]

GLACIOLOGICAL INSTRUMENTS AND METHODS

- ADAMS, W. P. A note on the pressure pillow method of snow measurement. *McGill Sub-Arctic Research Laboratory. Research Paper No. 23*, 1967, p. 94-97. [Describes method of use.]
- AMBACH, W., and others. Investigations of fission products in the accumulation area of an alpine glacier (Kesselwandferner, Oetztal Alps), [by] W. Ambach, H. Eisner and F. A. Prantl. *Union de Géodésie . . . Berne, 1967.* [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 117-25. [Studies show that ^{137}Cs from nuclear tests remains within a firn layer and so can be used for dating.]
- AMBACH, W., and others. Tritium content in the firn layers of an alpine glacier, [by] W. Ambach, H. Eisner and L. L. Thatcher. *Union de Géodésie . . . Berne, 1967.* [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 126-34. [Study of tritium from thermonuclear tests in Kesselwandferner, Austria. Results show that despite changes due to melt water, layers retain high tritium content. Use as tracer in run-off studies.]

- JACCARD, C. Apparatus for growing large monocrystals of ice with radial refining. *Zeitschrift für angewandte Mathematik und Physik*, Vol. 18, Fasc. 5, 1967, p. 758-60. [Method of producing pure ice crystals or ice crystals doped with HF but otherwise pure.]
- JACCARD, C. Automatic thin section analysis with the tomograph. *Union de Géodésie . . . Berne*, 1967. [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 345-51. [Description of apparatus which identifies optically the crystallographic orientation of ice at any point in a thin section, and by scanning can determine crystallite boundaries.]
- LORIUS, C., and others. Détermination des épaisseurs de glace par une méthode gravimétrique simplifiée, Terre Adélie, campagnes d'été 1964-65 et 1965-66, par C. Lorius, G. Rouillon, F. Helly. *Expéditions Polaires Françaises, Missions Paul-Émile Victor*, Publication No. 295, 1967, 35 p. [Description of simplified gravimetric method used to determine ice thickness and verified by direct boring. English and Russian summaries.]
- OESCHGER, H., and others. Radiocarbon dating of ice, by H. Oeschger, B. Alder, H. Loosli, C. C. Langway, Jr., and A. Renaud. *Earth and Planetary Science Letters*, Vol. 1, No. 2, 1966, p. 49-54. [Development of special counter to allow dating with 20-100 mg of carbon.]
- UEDA, H. T., and GARFIELD, D. E. Deep-core drilling program at Byrd station (1967-1968). *Antarctic Journal of the United States*, Vol. 3, No. 4, 1968, p. 111-12. [Report of drilling operations that penetrated Antarctic ice sheet.]
- WALKER, J. W., and others. Airborne radar soundings of the Greenland ice cap: flight 1, [by] J. W. Walker, D. C. Pearce, A. H. Zanella. *Geological Society of America Bulletin*, Vol. 79, No. 11, 1968, p. 1639-46. [Feasibility of airborne radar for ice thickness measurements studied on basis of flight over Greenland.]

PHYSICS OF ICE

- BARNES, P., and TABOR, D. Plastic flow and pressure melting in the deformation of ice I. *Union de Géodésie . . . Berne*, 1967. [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 303-15. [Marked drop in hardness of ice very close to melting point attributed to pressure melting along grain boundaries. Experiments confirm this view and explain large grain size and loss of bubbles of such ice. Discussion, by E. R. LaChapelle, R. Haefeli, N. S. Stehle, P. V. Hobbs and J. F. Nye, p. 313-15.]
- BARTLETT, J. T., and READINGS, C. J. Some optical effects in deformed single crystals of ice. *Union de Géodésie . . . Berne*, 1967. [Commission de Neiges et Glaces.] *Rapports et discussions*, 1968, p. 316-25. [Observation of stress-optical effects in crystals which have asymmetry, also of interference bands parallel to traces of basal planes, interpreted as evidence for non-basal glide.]
- BERTIE, J. E., and others. Far-infrared spectra of ice II, V and IX, by J. E. Bertie, H. J. Labbé and E. Whalley. *Journal of Chemical Physics*, Vol. 49, No. 2, 1968, p. 775-80. [Spectra obtained in range 360-20 cm⁻¹. In ice II and IX the bands are sharp while in ice V they are broad confirming the disorder of ice V and order of ice II and IX.]
- BERTIE, J. E., and others. Infrared spectrum of ice VI in the range 4000-50 cm⁻¹, [by] J. E. Bertie, H. J. Labbé and E. Whalley. *Journal of Chemical Physics*, Vol. 49, No. 5, 1968, p. 2141-44. [Spectrum showing that ice VI recovered at liquid-nitrogen temperature is orientationally disordered.]
- BULLEMER, B., and others. Conductivity of ice by a guarded potential probe method, [by] B. Bullemer, I. Eisele, H. Engelhardt, N. Riehl and P. Seige. *Solid State Communications*, Vol. 6, No. 9, 1968, p. 663-64. [Determination of bulk conductivity and activation energy.]
- COLOMBINO, P., and others. Positronium annihilation in water and ice down to -144°C by angular correlation measurements, [by] P. Colombino, B. Fiscella and L. Trossi. (*In Stewart, A. T., and Roelling, L. O., ed. Positron annihilation. Proceedings of the conference held at Wayne State University on July 27-29, 1965*, New York, London, Academic Press, 1967, p. 353-56.) [Explanation of differences in terms of changes in number of hydrogen bonds in ice.]
- CROSS, J. D. Thermoelectrets. (*In Stickland, A. C., ed. Static electrification. Proceedings of the conference organized by the Institute of Physics and the Physical Society, Static Electrification Group, London, May 1967*. London, Institute of Physics and Physical Society, 1967, p. 22-28. (*Institute of Physics and Physical Society Conference Series, No. 4*)) [Results of measurements at -78°C on, among other things, ice. Effect attributed to impurities. Discussion by J. Hart, M. Block, W. G. Lawson and J. Latham, p. 27-28.]
- DANTL, G. Die elastischen Moduln von Eis-Einkristallen. *Physik der kondensierten Materie*, Bd. 7, Ht. 5, 1968, p. 390-97. [Measurement of velocity of sound in ice single crystals from 0° to -140°C and deduction of elastic constants.]
- DEFRAIN, A., and others. Sur les changements de phase dans les dépôts de glace, d'acétamide, d'ortho-crésol et de phénol, obtenus par condensation de vapeur sur un support maintenu à basse température, par A. Defrain, N. T. Linh et J. Pouille. *Journal de Chimie Physique et Physicochimie Biologique*, Tom. 65, No. 9, 1968, p. 1510-18.
