AUTHOR INDEX FOR VOLUME 90

ABDOLLAHI, A. and GHORAISHI, S. M.; On noninner 2-automorphisms of finite 2-groups 227
ALI, Z. M.; see MAJID, R. N. 160
AYALA, J.; Connectedness and minimal length elements in spaces of bounded curvature paths 174
BAHLEKEH, A.; (Strongly) Gorenstein flat modules over group rings 57
BALLESTER-BOLINCHES, A., BEIDLEMAN, J. C., ESTEBAN-ROMERO, R. and RAGLAND, M. F.; On a class of supersoluble groups 220
BANARU, M. B.; Special Hermitian manifolds and the 1-cosymplectic hypersurfaces axiom 504
BEER, G. and GARRIDO, M. I.; Bornologies and locally Lipschitz functions 257
BEIDLEMAN, J. C.; see BALLESTER-BOLINCHES, A. 220
BÉKOLLÉ, D., ISHI, H. and NANA, C.; Korányi's lemma for homogeneous Siegel domains of type II. Applications and extended results 77
BELL, J. P., COONS, M. and HARE, K. G.; The minimal growth of a k-regular sequence 195
BHATT, S. J., DABHI, P. A. and DEDANIA, H. V.; The multiplier algebra of a Beurling algebra 113
CASTILLO, C., COULTER, R. S. and SMITH, S.; A note on interpolation of permutations of a subset of a finite field 213
CHANG, M.-C. and SHPARLINSKI, I. E.; Double character sums over subgroups and intervals 376
CHEN, J. X., CHEN, Z. L. and JI, G. X.; Domination by positive weak* Dunford–Pettis operators on Banach lattices 311
CHEN, M. and GAO, P.; A new unique continuation property for the Korteweg–de Vries equation 90
CHEN, Z. L.; see CHEN, J. X. 311
CHIODO, M.; Finitely annihilated groups 404
COONS, M.; see BELL, J. P. 195
COULTER, R. S.; see CASTILLO, C. 213
CURTIN, B. and POURGHOLI, G. R.; A group sum inequality and its application to power graphs 418
DABHI, P. A.; see BHATT, S. J. 113
DEDANIA, H. V.; see BHATT, S. J. 113
DONG, X.-T., LIU, C. and ZHOU, Z.-H.; Quasihomogeneous Toeplitz operators with integrable symbols on the harmonic Bergman space 494
DONSIG, A. P. and MILAN, D.; Joins and covers in inverse semigroups and tight C^*-algebras 121
DOUBTSOV, E.; Characterisations of Hardy growth spaces with doubling weights 275

INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website www.austms.org.au/Bulletin. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in LaTeX using $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-LaTeX packages and submitted as a PDF file via our journal management system, at www.austms.org.au/Publications/Submissions/BAustMS. This permits authors to track their papers through the editorial process. Recent versions of TeX are able to produce PDF files directly. A LaTeX class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at editor@bulletin.austms.org.au.

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification and Key Words. Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at www.ams.org/msc.

4. Abstracts of PhD Theses. The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

Table of Contents

Pentavalent symmetric graphs of order 30*p*
Ling, B., Wu, C. X. & Lou, B. G. **353**

On dynamic monopolies of graphs with probabilistic thresholds
Soltani, H. & Zaker, M. **363**

Double character sums over subgroups and intervals
Chang, M.-C. & Shparlinski, I. E. **376**

The total distance for totally positive algebraic integers
Flammang, V. **391**

Finitely annihilated groups
Chiodo, M. **404**

A group sum inequality and its application to power graphs
Curtin, B. & Pourgholi, G. R. **418**

Remarks on value sharing of certain differential polynomials of meromorphic functions
Li, X.-M. & Yi, H.-X. **427**

The Tumura–Clunie theorem in several complex variables
Hu, P.-C. & Yang, C.-C. **444**

Dependence of eigenvalues of sixth-order boundary value problems on the boundary
Ge, S., Wang, W. & Yang, Q. **457**

A positive solution for a nonlocal Schrödinger equation
Zhang, Y. & Zhu, G. **469**

Regularity of boundary points in the Dirichlet problem for the heat equation
Watson, N. A. **476**

Hypergroup algebras as topological algebras
Maghsoudi, S. & Seoane-Sepúlveda, J. B. **486**

Quasihomogeneous Toeplitz operators with integrable symbols on the harmonic Bergman space
Dong, X.-T., Liu, C. & Zhou, Z.-H. **494**

Special Hermitian manifolds and the 1-cosymplectic hypersurfaces axiom
Banaru, M. B. **504**

Warped products in Riemannian manifolds
Park, K.-S. **510**

A note on spaces with a rank 3-diagonal
Xuan, W.-F. & Shi, W.-X. **521**

Author Index for Volume 90 **525**
