# The Journal of Laryngology and Otology

EDITED BY  
G. H. BATEMAN

ASSISTANT EDITOR  
LIONEL TAYLOR

## Contents

• Biophysical considerations of some problems in tympanoplasties . . . . .	E. P. GAUDIN	1135
• A practical alternative to combined approach tympanoplasty . . . . .	G. D. L. SMYTH, A. G. KERR, A. C. DOWE and K. C. KHAJURIA	1143
• Unusual complications of tonsil and adenoid removal . . . . .	ALAN G. GIBB	1159
• Probability of perceptive deafness in obliterative otosclerosis undergoing re-operation . . . . .	V. A. GUKOVICH	1175
• Relation of the otosclerotic focus to the fissula ante-fenestram . . . . .	P. BRETLAU	1185
• Otosclerosis and osteogenesis imperfecta . . . . .	T. P. SRIVASTAVA and O. P. GUPTA	1195
Clinical records—		
• Neonatal nasal septal deformities . . . . .	LINDSAY GRAY	1205
• A case of nasal neurilemmoma . . . . .	PRANAB KUMAR DUTT	1209
• An unusual foreign body in the retro-pharyngeal space . . . . .	RAMESH CHANDRA	1215
• Deafness following acute carbon monoxide poisoning . . . . .	T. M. O. MORRIS	1219
• Adenolymphoma in a laryngocoele . . . . .	R. M. TIWARI and H. I. WILLIAMS	1227

# The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFBNDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR

LIONEL TAYLOR

---

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GRBEN, C, and BROWN, D. (1951) *Journal of Laryngology and Otology*, 65, 33. The titles of all Journals should be given without abbreviation.

It is most important that authors verify personally the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for two years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within two years of the appearance of the article, to HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology and Otology*, c/o HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

7. As from January 1970, the annual subscription is £8 (eight pounds sterling) post free; U.S.A. \$20 post free, and payable in advance.

8. Single copies of current or back numbers (when available) will be on sale at £1 (including postage) each.

9. All business and advertising communications should be sent to the publishers.

# Don't think!

## This knob will do it for you!

We believe at Amplivox that life is difficult enough and that audiometry can become altogether too complicated with the complex tests that are being done today.

We believe that an audiometer should do all the thinking for you. With the Model 103 Clinical Audiometer all audiometric tests can be reached by switching only one knob.

**One knob and you can switch to 18 different functions:**

- Pure Tone Air Conduction
- Pure Tone Bone Conduction
- Narrow Band Masking
- Wide Band (White Noise) Masking
- Alternate Binaural Loudness Balance
- Simultaneous Binaural Loudness Balance
- Speech, Live Voice
- Speech, Recorded
- Speech with Masking
- SISI Test
- Lüscher DL Test
- Audiometer Weber Test
- SAL Test
- Rainville Test
- Shifting Voice
- Stenger Test
- Modified Stenger Test
- Tone Decav Test

Model 103 engineering is functional engineering with the operator in mind. We believe the audiometer should do the thinking and that the operator should have an easy relaxed life.

**PETERS CLINIC AUDIOMETERS AND BÉKÉSY**  
ARE THE IDEAL TOOLS FOR MORE ADVANCED AUDIOMETRY

The Audiometers offer :

- Two continuously variable attenuators accurate to 1 db.
- SISI Test (built-in) and automatic alternate loudness balance switching.
- Maximum attenuation of 120 db for loudness discomfort level tests.
- Narrow band SYNCHRONOUS masking (a new semi-automatic masking technique).
- Full speech test facilities with white noise masking.
- Plug-in circuit boards and operator output checks.
- Conversion to a true BÉKÉSY AUDIOMETER at will.
- Extra features not listed are offered by the AP/6 compared to the AP/5 AUDIOMETER.

eliminate the cross infection risk

**Opulets**  
sterile, single dose  
eye and ear preparations

To overcome the risk of contamination in eye and ear infections, Opulets have been developed as sterile, single dose eye and ear drop tubes and ointment capsules. Each is packed in a film sachet and sterilized by gamma radiation, ensuring effective sterilization, with no loss of activity – the strict criteria of efficacy and safety being met in full.

After each application, these single dose units are discarded, eliminating cross infection risks – each treatment administered by either medical staff or the patient is thus under the most sterile conditions possible in practical medicine.

Opulets provide the lowest unit price available compared with all other preparations of a similar nature. Presentations available at present are:

**Amethocaine Eye Drops**

Amethocaine Hydrochloride  
BP 1.0%, w/v

**Atropine Eye Ointment**

Atropine Sulphate BP 0.5%, w/w

**Chloramphenicol Eye and Ear Drops**

Chloramphenicol BP 0.5%, w/v

**Chloramphenicol Eye and Ear Ointment**

Chloramphenicol BP 1.0%, w/w

**Fluorescein Eye Drops**

Fluorescein Sodium BP 1%, w/v

**Hydrocortisone Neomycin Eye and Ear Ointment**

Hydrocortisone Acetate BP 1.5%, w/w

Neomycin BP 0.5%, w/w

**Physostigmine Eye Drops**

Physostigmine (Eserine) Sulphate  
BPC 0.5%, w/v

**Sulphacetamide Eye Drops**

Sulphacetamide Sodium BP 10%, w/v

**Sulphacetamide Eye Ointment**

# A Product from the Sea for E.N.T. Surgeons

## \*calgitex

Calgitex calcium alginate E.N.T. Gauze is made from highly purified specially processed calcium alginate, derived from seaweed. This product is used extensively by E.N.T. surgeons throughout the world, it has a slow absorption rate, and can be easily removed from the nose without effecting or damaging the tissue.

In the field of aural surgery Calgitex is highly suitable for packing procedures due to its solubility, soft texture, and discouragement of haemorrhage.

Packed in vials containing one metre of ribbon gauze.  
*Obtainable from your usual Surgical or Pharmaceutical Supplier*
