ASSOCIATE EDITORS / RÉDACTEURS ASSOCIÉS

Fabrizio Andreatta
Università degli Studi di Milano

Hans Boden
McMaster University

Kathrin Bringmann
University of Cologne

Lia Bronsard
McMaster University

Lucy Campbell
Carleton University

Guillaume Chapuy
Université Paris-Diderot

Jingyi Chen
Univesity of British Columbia

Benoît Collins
Kyoto University

Octav Cornea
Université de Montréal

Shaun Fallat
University of Regina

Ilijas Farah
York University

Ailana Fraser
University of British Columbia

Philippe Gille
CNRS & Université
Claude-Bernard-Lyon-1

Alex Iosevich
University of Rochester

Dmitry Jakobson
McGill University

Joel Kamnitzer
University of Toronto

Matilde Lalin
Université de Montréal

Erwin Lutwak
Courant Institute

Rahim Moosa
University of Waterloo

Robert Osburn
University College Dublin

Julia Plavnik
Indiana University - Bloomington

Malabika Pramanik
University of British Columbia

Frédéric Rochon
Université du Québec à Montréal

William Ross
University of Richmond

Alistair Savage
University of Ottawa

Valentino Tosatti
McGill University

Shawn XianFu Wang
University of British Columbia

Daniel Wise
McGill University

Jianhong Wu
York University

The geometric figure on the cover, a four-dimensional polytope, was redrawn from the inside cover page of the celebrated book 'Regular Polytopes' by Harold Scott MacDonald Coxeter (1907–2003), one of the greatest geometers of the 20th century. Coxeter, a Fellow of the Royal Society of Canada and a Fellow of the Royal Society (London), joined the University of Toronto in 1936 and worked there enthusiastically for 60 years. Since 1978, the Canadian Mathematical Society has awarded the Coxeter-James Prize in his honor.

La figure géométrique sur la couverture, un polytope en dimension quatre, a été reprise du plat intérieur du célèbre ouvrage Regular Polytopes de Harold Scott MacDonald Coxeter (1907–2003), l'un des plus grands géomètres du XXe siècle. Membre de la Société royale du Canada et de la Royal Society (Londres), H.M.S. Coxeter s'est joint au corps professoral de l'Université de Toronto en 1936, où il a travaillé avec enthousiasme pendant 60 ans. Depuis 1978, la Société mathématique du Canada décerne le prix Coxeter-James en son honneur.

2023, 66/2

359	The intersection theory of the moduli stack of vector bundles on $\mathbb{P}^1$	*Hannah K. Larson*
380	Arithmetically equivalent fields in a Galois extension with Frobenius Galois group of 2-power degree	*Masanari Kida*
395	Sampling and interpolation for the discrete Hilbert and Kak–Hilbert transforms	*Isaac Z. Pesenson*
411	Spectrum of weak model sets with Borel windows	*Gerhard Keller, Christoph Richard, and Nicolae Strungaru*
428	On Hardy kernels as reproducing kernels	*Jesús Oliva-Maza*
443	Groups whose Chermak–Delgado lattice is a subgroup lattice of an abelian group	*Lijian An*
450	Equivariant cobordisms between freely periodic knots	*Keegan Boyle and Jeffrey Musyt*
458	Torsion codimension 2 cycles on supersingular abelian varieties	*Oliver Gregory*
467	Zeros in the character tables of symmetric groups with an ℓ-core index	*Eleanor McSpirit and Ken Ono*
477	A conjecture strengthening the Zariski dense orbit problem for birational maps of dynamical degree one	*Jason Bell and Dragos Ghioca*
492	Operator noncommutative functions	*Meric Augat and John E. McCarthy*
509	Volterra-type operators on the minimal Möbius-invariant space	*Huayou Xie, Junming Liu, and Saminathan Ponnusamy*
525	A note on Lagrangian submanifolds in symplectic $4m$-manifolds	*Yuguang Zhang*
532	Zero and uniqueness sets for Fock spaces	*D. Aadi and Y. Omari*
544	A note on the relative growth of products of multiple partial quotients in the plane	*Adam Brown-Sarre and Mumtaz Hussain*
553	Group actions on local moduli space of holomorphic vector bundles	*An-Khuong Doan*
568	Modular forms and some cases of the Inverse Galois Problem	*David Zywina*
587	On generation of the coefficient field of a primitive Hilbert modular form by a single Fourier coefficient	*Narasimha Kumar and Satyabrat Sahoo*
599	The shape of cyclic number fields	*Wilmar Bolaños and Guillermo Mantilla-Soler*
610	A dichotomy for topological full groups	*Eduardo Scarparo*
617	On the greatest common divisor of n and the nth Fibonacci number, II	*Abhishek Jha and Carlo Sanna*
