THE HARLOW-SHAPLEY SYMPOSIUM ON GLOBULAR CLUSTER  
SYSTEMS IN GALAXIES

The cover photo is Schmidt camera view of Halley's comet,  
the galaxy Centaurus-A (with its globular cluster system)  
and the galactic globular Omega Centauri.

It was taken by William Liller, Instituto Isaac Newton,  
Ministerio de Education de Chile, on April 14.513, 1986, as part  
of NASA's International Halley Watch, Large Scale Phenomena  
Section. The telescope was a 20-centimeter f/1.5 Schmidt  
operated by Liller on Easter Island. The combined view of the  
most massive globular in the Galaxy with one of the most  
studied external galaxies and globular cluster systems is a  
fitting reminder of the themes of the IAU 126 Symposium. The  
simultaneous view of Halley's comet records the year of the  
meeting and the centennial year of Harlow Shapley's birth.
