

PHILADELPHIA'S PHILOSOPHER MECHANICS

A History of the Franklin Institute 1824—1865

Bruce Sinclair

This year Philadelphia's Franklin Institute is celebrating the 150th anniversary of its founding of promote technological research and industrial advancement. During the years covered by this comprehensive history, the Institute established itself as a major force in American technological development, becoming the most important organization in the field.

Philadelphia's Philosopher Mechanics presents the role of technology in nineteenth-century America in terms of the nature of progress, government controls or the lack thereof, the public welfare, economic independence, and the rise of specialization. The author explores the careers of major figures in that period of American science and argues that by the 1840's the solitary inventor had already been replaced in some fields by organized research efforts.

Illustrated with four self-contained photo essays, this book will be a worthy addition to the strong Johns Hopkins list of books on the history of American technology, the most recent of which, *Elmer Sperry: Inventor and Engineer*, by Thomas Parke Hughes, received three awards, including the Dexter Prize of the Society for the History of Technology.

The British Society for the History of Science

THE objects of the Society are to further the study of the history of science by holding meetings for the reading and discussion of papers and by facilitating the publication of relevant material. *The British Journal for the History of Science* is published by the Society as its official organ.

There will generally be a summer meeting, a winter meeting, and an Easter meeting of the Society. Additional meetings are arranged for specific occasions such as important anniversaries.

Membership, which includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription is £5.00 (\$15.00) or, for Students, £3.00 (\$9.00).

Membership: Applications for membership should be made on a form that is available from The Assistant Secretary, The British Society for the History of Science, 47 Belgrave Square, London SW1X 8QX.

THE BRITISH JOURNAL FOR THE HISTORY OF SCIENCE

THE *Journal* is published three times a year, in March, July, and November, and the three parts published in any one year constitute a volume.

Editorial matters: Papers for inclusion in the *Journal* should be submitted to the Hon. Editor, Dr Robert Fox, Department of History, University of Lancaster, Bailrigg, Lancaster LA1 4YG, from whom instructions may be obtained concerning the presentation and documentation of papers. All communications on editorial matters, and books for review, should be addressed to the Hon. Editor.

Advertising: Particulars about advertising in the *Journal* may be obtained from The Advertisement Manager, The Institute of Physics, 1 Lowther Gardens, Prince Consort Road, London SW7 2AB.

Orders and back issues: Orders for the *Journal* and inquiries about back issues should be addressed to Headley Brothers Ltd, Ashford, Kent TN24 8HH, who will also supply information about binding costs. Claims for missing copies should be made to Headley Brothers within six months of publication.
