

CONTENTS (continued)

Notes 104.26 to 104.41 (continued)

An integral relating π and $\zeta(3)$	<i>Angad Singh</i>	520
Polygons and complex trigonometric identities without complex numbers	<i>Kristian B. Kiradjev</i>	522
The Riemann zeta function as a sum of geometric series	<i>Joakim Munkhammar</i>	527
Bounds for roots of polynomials with increasing coefficients	<i>Rică Zamfir</i>	530
The beauty of mathematics – the connection between the areas of three squares	<i>Moshe Stupel, Idan Tal</i>	533
Proof without Words: A right triangle ABC with altitude $AH = \frac{1}{4}BC$	<i>Victor Oxman, Moshe Stupel</i>	534
Some results on perspective triangles	<i>Thanh Tung Vu, Quoc My Vu</i>	535
An inequality for the tanradii of a triangle	<i>Martin Lukarevski</i>	539
Visualising the star number – centred dodecagonal number isomorphism	<i>Günhan Caglayan</i>	543
Buffon's needle on a square lattice	<i>Yuka Hoshiyama, Toshio Nakata, Asuka Nomura, Yuki Okochi</i>	543
A simple evaluation of the probability integral	<i>Fausto Di Biase</i>	546
A property of the Lagrange interpolation polynomial	<i>Mowaffaq Hajja</i>	548
Teaching Notes		
Surds from Pascal's triangle	<i>Paul Stephenson</i>	552
An unexpected appearance of e in a family of minimisation problems	<i>Nick Lord</i>	553
Feedback		556
Problem Corner	<i>Nick Lord</i>	559
Student Problems	<i>Stan Dolan</i>	564
Reviews		567
Acknowledgements		575

CONTENTS

Articles

Nurturing the next generation of mathematicians: <i>Ems Lord</i> the case for mathematical fluency		386
John Horton Conway FRS	<i>Alex Ryba</i>	395
The geometric unfolding of recurrence relations	<i>Stan Dolan</i>	403
Integrals of functions containing parameters	<i>Robert M. Corless, David J. Jeffrey, David R. Stoutemyer</i>	412
Modelling learning in youth archery	<i>Tyler Skorczewski</i>	427
Concurrent sequences of Bernoulli trials	<i>Stephen Kaczkowski</i>	435
A Catalan constant inspired integral odyssey	<i>Seán M. Stewart</i>	449
Repeated vector products	<i>A. F. Beardon, N. Lord</i>	460
Triangles whose sides form an arithmetic progression	<i>Sadi Abu-Saymeh, Mowaffaq Hajja</i>	469
How close is the approximation by Bernstein polynomials?	<i>G. J. O. Jameson</i>	482
Paying for end of life care in the UK	<i>John Stubbs, Jacob Adetunji</i>	495
Notes 104.26 to 104.41		
Unusual Fibonacci, Lucas and Pell congruence relations	<i>Jawad Sadek, Russell Euler</i>	507
An additive analogue of an unsolved multiplicative problem	<i>B. Sury</i>	510
Extending Cardano's solution of the cubic	<i>Hiroshi Ohyama</i>	511
On the evaluation of a very specific integral	<i>John D. Mahony</i>	518
