

# PROCEEDINGS

of the

GLASGOW MATHEMATICAL ASSOCIATION

*Published with the assistance of the University Court of the University of Glasgow*

---

VOLUME II

APRIL 1954

PART I

---

## CONTENTS

- The Representations of Lie Algebras of Prime Characteristic :  
HANS ZASSENHAUS *page 1*
- Simultaneous Extension of Partial Endomorphisms of Groups : C. G.  
CHEHATA *page 57*
- The Asymptotic Distributions of Statistics arising in Certain Non-  
Parametric Tests : SAMUEL D. SILVEY *page 47*
- Integrals involving *E*-Functions and Modified Bessel Functions of the  
Second Kind : F. M. RAGAB *page 52*

OLIVER AND BOYD

EDINBURGH : TWEEDDALE COURT

LONDON : 39A WELBECK STREET, W. 1

## PROCEEDINGS OF THE GLASGOW MATHEMATICAL ASSOCIATION

THE *Proceedings* are published in Parts and issued twice each year, in January and in July. Four Parts will complete a Volume of approximately 200 pages, and the Title Pages and Index will be published in Part 4 of each Volume.

The prepaid subscription for each Volume is Forty Shillings (U.S.A. \$6.00), post free. Single Parts may be supplied at a cost of Ten Shillings and Six Pence each (U.S.A. \$1.50) post free.

Copies may be ordered direct from the publishers or from any bookseller.

### *Information for Contributors*

While the *Proceedings* are intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts should be prepared so as to conform with the practice in current Numbers of the *Proceedings*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered according to the order of reference. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated :

for references to books—*author, title, edition, place of publication, year of publication, page reference* ;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination.*

A proof is supplied once in galley form, together with an Order Form for off-prints. Offprints are supplied free to the number of twenty-five ; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to :

## CONTENTS

	PAGE
<b>Adamson, Iain T.</b> Cohomology theory for non-normal subgroups and non-normal fields . . . . .	66
<b>Bailey, W. N.</b> Hypergeometric functions of the type ${}_3F_2(1)$ . . . . .	62
<b>Chehata, C. G.</b> Simultaneous extension of partial endomorphisms of groups	37
<b>Conolly, B. W.</b> Two integrals involving Bessel functions of the second kind	147
<b>Ellis, D.</b> On infinite series of sets. . . . .	89
<b>González, M. O.</b> Elliptic integrals in terms of Legendre polynomials - -	97
<b>Guinand, A. P.</b> Matrices associated with fractional Hankel and Fourier transformations . . . . .	185
<b>Hunter, J.</b> A generalization of the inequality of the arithmetic-geometric means . . . . .	149
<b>MacRobert, T. M.</b> Integrals involving a modified Bessel function of the second kind and an $E$ -function . . . . .	93
<b>MacRobert, T. M.</b> Integrals involving $E$ -functions and associated Legendre functions . . . . .	127
<b>MacRobert, T. M.</b> Integrals involving products of modified Bessel functions of the second kind . . . . .	129
<b>MacRobert, T. M.</b> Some Bessel function integrals . . . . .	183
<b>Northcott, D. G.</b> On homogeneous ideals . . . . .	105
<b>Northcott, D. G.</b> A general theory of one-dimensional local rings . . . . .	159
<b>Patterson, E. M.</b> Note on three-dimensional Lie groups . . . . .	112
<b>Ragab, F. M.</b> Integrals involving $E$ -functions and modified Bessel functions of the second kind . . . . .	52
<b>Ragab, F. M.</b> Further integrals involving $E$ -functions . . . . .	77
<b>Ragab, F. M.</b> An integral involving a product of two modified Bessel functions of the second kind . . . . .	85
<b>Ragab, F. M.</b> Integrals involving products of Bessel functions . . . . .	180
<b>Rankin, R. A.</b> The closest packing of spherical caps in $n$ dimensions . . . . .	139
<b>Rankin, R. A.</b> On packings of spheres in Hilbert space . . . . .	145

	PAGE
<b>Rathie, C. B.</b> Some results involving hypergeometric and $E$ -functions . . . . .	132
<b>Rathie, C. B.</b> A few infinite integrals involving $E$ -functions . . . . .	170
<b>Rathie, C. B.</b> A theorem in operational calculus and some integrals involving Legendre, Bessel and $E$ -functions . . . . .	173
<b>Sands, A. D.</b> Prime ideals in matrix rings . . . . .	193
<b>Silvey, S. D.</b> The asymptotic distributions of statistics arising in certain non-parametric tests . . . . .	47
<b>Silvey, S. D.</b> A problem associated with a particular Markov chain . . . . .	100
<b>Watson, G. N.</b> A reduction formula . . . . .	57
<b>Yacoub, K. R.</b> General products of two finite cyclic groups . . . . .	116
<b>Zassenhaus, H.</b> The representations of Lie algebras of prime characteristic . . . . .	1
