

AGORAPHOBIA

Nature and Treatment

Andrew M. Mathews, Michael G. Gelder, and Derek W. Johnston

This book is the outcome of more than a decade of intensive clinical research into a single problem: agoraphobia. The authors summarize their own findings and review the current state of knowledge about the origins and treatment of this distressing condition. In the latter half of the book they attempt to give professional readers a means of helping their agoraphobic clients by providing a complete description of a self-help method. This method they show to be effective.

TAVISTOCK

CONTROLLED DRINKING

Nick Heather and Ian Robertson

Controlled Drinking is the first comprehensive review of the literature on a controversial but increasingly popular approach to treatment. The authors scrupulously attend to all the pertinent questions that are raised by controlled drinking as a treatment goal, starting with the need to examine the prevailing 'disease conceptions' of alcoholism.

THE ASSOCIATION FOR BEHAVIOURAL APPROACHES WITH CHILDREN

**A.B.A.C. (formerly The Association
for Behaviour Modification with
Children)**

A multidisciplinary association providing support services to all those either already using or interested in using behavioural techniques to help children with problems. It should appeal to clinical and educational psychologists, social workers, care staff, therapists etc, as well as to lecturers, researchers, psychiatrists, and teachers.

Members receive, at no cost, 4 issues of the journal 'Behavioural Approaches with Children', a resource directory and a copy of a booklet on child management skills for parents and care staff. Other A.B.A.C. activities include regional and national conferences. First year membership is £2.50 (£7.50 for subsequent years).

For further details and application form contact:

Josh Schwieso (A.B.A.C.2.),
Bulmershe College of H. Ed.,
Woodlands Avenue,
Earley, Reading.

Academic Press publishes books and journals in many areas of the biological, medical, and biomedical sciences including:

How To Comply With The New Copyright Law

Participation in the Copyright Clearance Center (CCC) assures you of legal photocopying at the moment of need. You can:

Fill requests for multiple copies, interlibrary loan (beyond the CONTU guidelines), and reserve desk without fear of copyright infringement.

Supply copies simply and easily from registered publications. The CCC's flexible reporting system accepts photocopying reports and returns an itemized invoice. You need not keep any records, our computer will do it for you.

The Copyright Clearance Center is your one-stop place for on-the-spot clearance to photocopy for internal use. You will never have to decline a photocopy request or wonder about compliance with the law for any publication registered with the CCC.

For more information, just contact:

Instructions to Authors

1. **Submission.** Articles, written in English and not submitted for publication elsewhere, may be sent to any one of the following editors: *Dr Ray Hodgson, Addiction Research Unit, Institute of Psychiatry, Denmark Hill, London SE5 8AF, U.K.*; *Dr William Yule, Psychology Department, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, U.K.*; *Dr G. Terence Wilson, Graduate School of Applied and Professional Psychology, Rutgers University, Busch Campus, P.O. Box 819, Piscataway, New Jersey 08854, U.S.A.*

Manuscripts will be sent out for review exactly as submitted. Authors who want a blind review should mark two copies of their article "review copy" omitting from these copies details of authorship.

2. **Manuscript preparation.** Articles must be typed double-spaced throughout on standard sized paper (preferably A4) allowing good margins all round. Three copies must be submitted, and the author should retain a further copy. Original figures must be supplied at the time of submission.

Abbreviations where used must be standard. The Systeme Internationale (SI) should be used for all units, where metric units are used the SI equivalent must also be given. Probability values and power statistics should be given with statistic values and degrees of freedom [e.g. $F(1,34) = 123.07, P < 0.001$], but such information should preferably be included in tables rather than the main text.

Spelling must be consistent within an article, either using British usage (*The Shorter Oxford English Dictionary*), or American usage (*Webster's New Collegiate Dictionary*). However, spelling in the list of references must be literal to each original publication.

Details of style not specified here may be determined by reference to the *Publication Manual of the American Psychological Association* or the *Style Manual for Biological Journals*.

Articles should conform to the following scheme:

(a) *Title page.* The title should phrase concisely the major issues. Author(s) to be given with departmental affiliations and addresses, grouped appropriately. A running head of no more than 40 characters should be indicated.

(b) *Summary.* This should summarize the article in no more than 200 words.

(c) *Text.* This should begin with an introduction, succinctly introducing the point of the paper to those interested in the general area of the journal. References within the text should be given in the form Jones and Smith (1973). Three or more authors should be given as Williams *et al.* (1973). Authors of the same surname should be distinguished by their initials. The approximate positions of tables and figures should be indicated in the text. Footnotes should be avoided where possible.

(d) *Reference note(s).* A list of all cited unpublished or limited circulation material, numbered in order of appearance in the text, giving as much information as possible about extant manuscripts.

(e) *References.* All citations in the text should be listed in strict alphabetical order according to surnames. Multiple references to the same author should be listed chronologically, using *a, b, etc.*, for entries within the same year. Formats for journal articles, books and chapters should follow these examples:

BECKER, M. R. and GREEN, L. W. (1975). A family approach to compliance with medical treatment: A selective review of the literature. *International Journal of Health Education* 18, 173–182.

THORP, R. G. and WETZEL, R. J. (1969). *Behaviour Modification in the Natural Environment*, New York: Academic Press.

ROSKIES, E. and LAZARUS, R. S. (1980). Coping theory and the teaching of coping skills. In *Behavioural Medicine: Changing Health Lifestyles*, P. O. Davidson and S. M. Davidson (Eds), New York: Brunner/Mazel.

(f) *Footnotes.* The first, and preferably only, footnote will appear at the foot of the first page of each article, and subsequently may acknowledge previous unpublished presentation (e.g. dissertation, meeting paper), financial support, scholarly or technical assistance, or a change in affiliation. Its concluding (or only) paragraph must be the name and full mailing address of the author to whom reprint requests or other inquiries should be sent.

(g) *Tables.* Tables should be numbered and given explanatory titles.

(h) *Figure captions.* Numbered captions should be typed on a separate page.

(i) *Figures.* Original drawings or prints must be submitted for each line or half-tone illustration. Figures should be clearly labelled.

3. **Proofs, Reprints and Copyright.** Proofs of accepted articles will be sent to authors for the correction of printers' errors; author's alterations may be charged. Authors submitting a manuscript do so on the understanding that if it is accepted for publication exclusive copyright in the paper shall be assigned to the Society. In consideration of the assignment of copyright, 25 copies of each paper will be supplied. Further reprints may be ordered at extra cost; the copyright assignment form and the reprint order form will be sent with the proofs. The publishers will not put any limitation on the personal freedom of the author to use material contained in the paper in other works.
