Indexing

Behaviour Change is indexed in the following information systems: Australian Education Index, Multicultural Education Abstracts, Special Educational Needs Abstracts, CABS, EMBASE/Excerpta Medica, Psychological Abstracts, PsycINFO, Sociological Abstracts, Sage Family Study Abstracts, Current Contents/Social and Behavioural Sciences, Social SciSearch, Research Alert, and J-GATE.

Conditions and copyright

Responsibility for the contents of papers rests upon the authors, and not upon the association or the publisher.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organisations that do not permit such assignment.

The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reductions, microfilm or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Subscription rates

Behaviour Change

Instructions to Contributors

1. To be reviewed for possible publication in this journal all authors must follow the instructions below and submit their manuscript to:

Associate Professor Ross G. Menzies
School of Behavioural and Community
Health Sciences, Faculty of Health Sciences
University of Sydney
Sydney NSW 2141, Australia
E-mail: r.menzies@usyd.edu.au

All articles are refereed. Papers submitted to the journal must not previously have been published nor submitted for publication to any other journal.

2. Papers should be submitted via e-mail in Word or RTF format. Authors who wish to submit their paper in hard copy format may do so by arrangement with the editor.
3. Contributions should follow the format and style described in the *Publication Manual of the American Psychological Association* (5th ed.). Spelling and punctuation should conform to *The Macquarie Dictionary* (4th ed.). For matters of style not covered in these two publications the *Style Manual for Authors, Editors and Printers* (6th ed.) should be consulted.
4. Documents should be double-spaced with minimum margins of 20 mm on the left and 35 mm on the right. Uncommon abbreviations and acronyms should be explained. Do not use underlining except to indicate italics. Full stops should not be used in abbreviations or acronyms (e.g., NSW).
5. Use single quotation marks to introduce a word or phrase used as an ironic comment, as slang, or which has been coined. Use quotation marks the first time the word or phrase is used; do not use them again. Do not use quotation marks to introduce a technical or key term. Instead, italicise the term.
6. **Front page:** under the title of the article only the names and affiliations of the authors appear. Qualifications, present appointments, and postal and e-mail addresses should be given in a separate section on the front page labelled 'Address for correspondence'. A word count and suggested running head of no more than 50 characters including spaces should also be provided.
7. Do not use any footnotes. **Endnotes** should be kept to a minimum and listed at the end of the text under the centred heading 'Endnotes'. **Acknowledgments** should be placed at the end of the article with a separate heading.
8. **Tables** should be at the end of the manuscript, not in the main text. Their approximate positions in the text should be indicated by the words, 'Insert Table X here'. Horizontal and vertical lines should be used sparingly.
9. To ensure optimum quality, please follow these guidelines when submitting artwork via e-mail or disk:
 - **Photographs, graphs and figures** should be prepared to the correct size (max. width up to 120 mm) and each one supplied as an individual file, separate to the manuscript Word file. Include placement instructions in the Word document, such as 'Insert Figure 1 here'.
 - Figures created in Microsoft Word or Powerpoint need to be saved as PDFs.
 - Figures created in a drawing program such as Adobe Illustrator, CorelDRAW, Freehand, Microsoft Publisher or similar should be saved as EPS (encapsulated postscript) files.
 - Figures created in Photoshop or with other photographic software should be saved as line art (artwork that has only text and lines, no shades of grey or blocks of colour) with a minimum resolution of 600 dpi and in TIF format. Minimum resolution for scanned graphics is 300 dpi for halftone work (e.g., photographs) and 600 dpi for line art, and these should also be in TIF format.
 - Manuscripts that contain equations created with LaTeX or similar specialist software need to be supplied as a PDF file as well as a Microsoft Word document.
 - Prior to sending artwork, the separate files of figures, graphs, illustrations, etc. should be printed by the author to test that the fonts have been embedded correctly and there is no distortion in the artwork (e.g., lines and fonts reproduce cleanly with no jagged lines or fuzzy edges), as any such faults cannot be corrected by the publisher.
 - Preferred media for delivery: e-mail as attachments, Macintosh or PC floppy disk, Macintosh or PC Zip disk, CD-ROM. If your artwork does not meet these guidelines, it may be returned to you.
10. **References and citations** should follow the format and style described in the *Publication Manual of the American Psychological Association* (5th ed.). Examples of citations are:

The theory was first propounded in 1970 (Larsen, 1971).

Larsen (1971) was the first to propound the theory.

Examples of references are:

Fisse, B. (1989). The proceeds of crime act: The rise of money laundering, offences and the fall of principle. *Criminal Law Journal*, 13, 5–23.

Zelinski, E.M., & Gilewski, M.J. (1988). Memory for prose and aging: A meta-analysis. In M.L. Howe & C.J. Brainerd (Eds.), *Cognitive development in adulthood* (pp. 133–158). New York: Springer-Verlag.
11. Authors are expected to check the accuracy of all references and citations in the manuscript before submission.
