

CAMBRIDGE

New Title in AI by Nils Nilsson!

The Quest for Artificial Intelligence A History of Ideas and Achievements

NILS J. NILSSON

“With the investigatory skill of a historian for the earliest work, personal recollections and reflections of early work, and unprecedented access to current researchers; and with the wit of a skilled author and teacher and the insight of a founding father, Nils Nilsson is uniquely qualified to present this lucid, comprehensive, entertaining and balanced history of AI.”

—Peter Norvig, *Director of Research, Google Inc.*

“Nilsson’s new book is a fascinating chronology of artificial intelligence, written by one of the doyens of the field. It should appeal to a broad audience with its sweeping coverage of topics ranging from game playing to computer vision and natural language processing.”

—Prabhakar Raghavan, *Head of Yahoo! Labs*

“Nils’s book is a tour de force that serves as a valuable hiker’s guide through the twists and turns of the historical trails of the first several decades of the quest for artificial intelligence.”

—Eric Horvitz, *Microsoft Research and President of the AAAI*

\$120.00: Hardback: 978-0-521-11639-8: 578 pp.

Fantastic Titles in AI from Cambridge!

Forthcoming...

**Artificial Intelligence
Foundations of
Computational Agents**
DAVID L. POOLE
ALAN K. MACKWORTH

"If you want to learn this subject and are willing to explore the technical foundations of Artificial Intelligence in depth, I can think of no better introduction. If you plan to teach a course in Artificial Intelligence at the upper-division undergraduate level or beyond, you must give serious consideration to this thoroughly enjoyable book."

—Professor Marco Valtorta,
University of South Carolina

\$85.00: Hardback: 978-0-521-51900-7:
712 pp.

Forthcoming...

**The Quest for
Artificial Intelligence**
A History of
Ideas and Achievements
NILS J. NILSSON

"Nils Nilsson has written the definitive intellectual history of Artificial Intelligence research; something that he himself has been a key player in for over forty of its 53 years. In this book he not only explains all of the major ideas and fashions in AI, but he traces how the ideas arose, where they arose and why. This well mannered book explains AI. All of it."

—Rodney Brooks,
MIT Computer Science and
Artificial Intelligence Laboratory

INSTRUCTIONS FOR AUTHORS

AIMS AND SCOPE

AIEDAM: Artificial Intelligence for Engineering Design, Analysis and Manufacturing is a journal intended to reach two audiences: *engineers and designers* who see AI technologies as powerful means for solving difficult engineering problems; and *researchers in AI and Computer Science* who are interested in applications of AI and in the theoretical issues that arise from such applications. The journal publishes significant, original articles about AI theory and applications based on the most up to date research in all branches and phases of engineering. Suitable topics include analysis and evaluation, selection, configuration and design, manufacturing and assembly, and concurrent engineering. Specific subareas include cognitive modeling; creativity; learning; qualitative reasoning; spatial reasoning; graphics and modeling; constraints and preferences; style and brands; human-computer interaction; multimodal interaction; computational linguistics; design and process planning; scheduling; simulation; optimization; distributed teams and systems; multiagent applications; design rationale and histories; functional, behavioral, and structural reasoning; knowledge management; and ontologies. **AIEDAM** is also interested in original, major applications of state-of-the-art AI techniques to important engineering problems (practicum papers). In addition to the rapid publication and dissemination of unsolicited research papers, **AIEDAM** is committed to producing special issues on important, timely topics. **AIEDAM** is indexed in Compendex Plus, SciSearch, Research Alert, and CompuMath Citation Index.

ORIGINALITY AND COPYRIGHT

To be considered for publication in **AIEDAM** a manuscript cannot have been published previously, nor can it be under review for publication elsewhere. Papers with multiple authors are reviewed with the assumption that all authors have approved the submitted manuscript and concur in its submission to **AIEDAM**. A Transfer of Copyright Agreement must be executed before an article can be published. Government authors whose articles were created in the course of their employment must so certify in lieu of copyright transfer. Authors are responsible for obtaining written permission from the copyright owners to reprint any previously published material included in their article.

MANUSCRIPT SUBMISSION AND REVIEW

Three high-quality copies of articles, in English, should be submitted to the Editor.

Prof. David C. Brown, Editor
AIEDAM
Computer Science Department
Worcester Polytechnic Institute
100 Institute Road
Worcester, MA 01609, USA
Phone: (508) 831-5618
Fax: (508) 831-5776
E-mail: aiedam@cs.wpi.edu

Photocopies of typescripts will not be accepted. For refereeing purposes only, good photocopies may be submitted. Upon acceptance of the manuscript submit the top copy and the original illustrations for publication. You are strongly encouraged to submit your manuscript electronically. Please send it as an e-mail attachment to the Editor, with "AI EDAM Submission" as the Subject heading. Accepted manuscripts must be in Word or WordPerfect. LaTeX should only be used when there are numerous mathematical equations. However, Word, PDF, and Postscript are strongly preferred for initial submission. Please include in the text message a description of what was sent and its format to guide extracting the manuscript from the e-mail.

MANUSCRIPT PREPARATION AND STYLE

Paper should be typed in *double* spacing throughout, including tables, footnotes, references, and legends to tables and figures. One side of the paper, only, should be used and there should be a margin of at least 2.5 cm all around. The position of tables and

figures should be clearly indicated, in sequence, in the text. Tables, footnotes, and legends to figures should be typed separately. Where it is essential for clear cross-referencing, particularly in mathematically orientated material, paragraphs and subparagraphs may be numbered, and the decimal system should be used (i.e., 1.1.1., 1.1.2., etc.). A short running title of not more than 40 characters (including spaces) should be indicated if the full title is longer than this. The name of the laboratory where the work has been carried out should be indicated on the title page and the full postal address for the despatch of proofs and offprints should be included on a separate page. Minor corrections to the manuscript may be typed or neatly printed in ink; retyping is required for significant changes. Numbers should be spelled out when they occur at the beginning of a sentence; use Arabic numerals elsewhere.

MANUSCRIPT ELEMENTS AND ORDER

Unless there are obvious and compelling reasons for variation (e.g. review articles, short communications), manuscripts should be organized as follows:

Title page. This is page 1. The title should be concise, informative, and free of abbreviations, chemical formulae, technical jargon, and esoteric terms. This page should include (a) the article's full title, (b) names and affiliations of all authors, (c) the name, mailing address, and telephone number of the corresponding author, (d) the address for reprint requests if different from that of the corresponding author, (e) a short title of 50 characters or less, and (f) a list of the number of manuscript pages, number of tables, and number of figures.

Abstract and keywords page. This is page 2 and should include (a) the article's full title, (b) an abstract of no more than 300 words, and (c) up to 5 keywords or phrases that reflect the content and major thrust of the article. The abstract should give a succinct account of the objective, methods, results, and significance of the subject matter.

Introduction. This section begins on page 3 and should clearly state the objective of the research in the context of previous work bearing directly on the subject. An extensive review of the literature is not usually appropriate.

Citations in text. Customary abbreviations will be accepted and the authors are recommended to employ *Système Internationale (SI/metric)* units. Special and unusual symbols should be clearly identified, especially if handwritten. Spell out acronyms at first use, but use only acronyms thereafter. All equipment supplies and products stated in the article should have the manufacturer name and location identified at first mention.

Tables. Tables should be numbered consecutively with Arabic numerals and each should be typed double-spaced on a separate sheet. All tables are to be grouped together after the references. A short explanatory title and column headings should make the table intelligible without reference to the text. All tables must be cited and their approximate positions indicated in the text.

Figures and legends. The number of figures should be the minimum necessary to make the essential points of the paper. Figures should be supplied no larger than 8×10 " (approx. 200×250 mm) and must be camera-ready. Photographs will be accepted only if the information cannot be presented easily in any other form. Explanation and keys should, as far as possible, be placed in the legends. Photographs for halftone reproduction must be on white glossy paper. Figures should be composed to occupy a single column (8.3 cm) or two columns (17 cm) after reduction. Diagrams and illustrations must have a professional appearance and be typed or drawn with sharp, black lettering to permit reduction. To assure legibility, letters, numbers, and symbols on figures should all be the same size and have a minimum height of 2 mm (i.e., 6 points on the pica scale) when reduced. Figures should be separate and not incorporated into the text copy.

Artwork should normally be in black and white; if authors have color figures, the publisher will provide a price quotation for the additional production costs. However, color figures can appear online free of cost. All figures must be identified on the back with the short title of the paper, figure number, and figure

orientation (top or bottom). Preferably, figures should be mounted on heavy sheets of the same size as the manuscript. Three complete sets of figures should be carefully packaged in protective envelopes, one to accompany each copy of the manuscript. Each figure must be cited and its approximate position clearly indicated within the text.

Figures must be numbered consecutively with Arabic numerals and be accompanied by a descriptive caption typed double-spaced on a separate sheet. The captions, collected at the end of the manuscript, should concisely describe the figure and identify any symbols and/or calibration bars.

References. Entries should be listed alphabetically by lead author at the end of the paper. All authors' names should be included, followed by the year of publication, the full title of the journal, volume, issue number, and inclusive page numbers. For books, the full title should be given, followed by the editors, volume number (if any), page numbers, publisher, and place of publication. Citations in the text should read Brown and Smith (1973) or (Brown & Smith, 1973). Where there are more than two authors the citation should read: Brown et al. (1973). The conventional Brown (1973a), Brown (1973b) should be used where more than one paper by the author(s) has appeared in the same year.

Journal or Magazine article

Schank, R.C. (1991). Where's the AI? *AI Magazine* 12(4), 38–49.

Chapter in an edited book

Nierstrasz, O. (1993). Composing active objects. In *Research Directions in Concurrent Object-Oriented Programming* (Agha, G., Wegner, P., & Yonezawa, A., Eds.), pp. 151–171. Cambridge, MA: MIT Press.

Proceedings

Craw, S., & Sleeman, D. (1990). Automating the refinement of knowledge based systems. *Proc. Ninth Eur. AI Conf.*, pp. 167–172.

Proceedings with publisher identified

Mittal, S., & Frayman, F. (1989). Towards a generic model of configuration tasks. *Proc. Eleventh Int. Joint Conf. Artificial Intelligence*, pp. 1395–1401. San Francisco, CA: Morgan Kaufmann.

The alphabetical list of references begins a new page and must be typed double-spaced. Each in-text citation must have a corresponding reference and vice versa. List works by different authors who are cited within the same parentheses in chronological order, beginning with the earlier work. Journal titles should not be abbreviated. Only published articles and articles in press should appear in this list. The responsibility for the accuracy of references cited lies with the authors.

Author biographies. Brief author biographies will be printed at the end of each paper; they should not exceed 100 words for each author.

COPYEDITING AND PAGE PROOFS

The publisher reserves the right to copyedit manuscripts to conform to the style of **AIEDAM**. The corresponding author will receive page proofs for final proofreading. No rewriting of the final accepted manuscript is permitted at the proof stage, and substantial changes may be charged to the authors.

OFFPRINTS

A free high-quality PDF of the article will be sent to the corresponding author only. Please note that coauthors must send in separate order forms if they wish to purchase offprints or issue copies. A form will accompany the page proofs allowing orders for complete copies of the issue and for the purchase of offprints. The offprint requirements of all coauthors should be included on this form. Orders received after issue printing will be subject to a 50% reprint surcharge.
