

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

OLIVER & BOYD LTD.
EDINBURGH AND LONDON

FEBRUARY 1963

VOL. 5 PART 1

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Animal Production publishes papers on original research provided that they have not been, and will not be, published elsewhere in whole, or in part, without the Editors' written permission. Contributions may be in the field of animal production, or in any related scientific field. Reports on techniques will also be considered but only as appendices to scientific papers.

Manuscripts should be typewritten in double spacing with wide margins and, preferably, the lines on each page should be numbered. *Two* copies of the typescript (one of illustrations) should be sent to

Dr. Gerald Wiener,
A.R.C. Animal Breeding Research Organisation,
6 South Oswald Road, Edinburgh 9.

Manuscripts are not returned with the proofs; authors should therefore retain copies.

Length of papers should not normally exceed the equivalent of 6,000 words, inclusive of tables, text figures and references.

Illustrations (figures and plates) should be simple and few, otherwise a charge may have to be made to authors. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil. Costs of touching-up diagrams found to be incomplete or unsuitable for line-block reproduction will be charged to authors.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors. Part of their cost may have to be borne by authors.
- (c) Colour plates will not be accepted unless authors bear the cost.

Tables should be as simple and as few as possible; if they are very large or numerous a charge may have to be made to authors. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

THE SEMEN OF ANIMALS AND ARTIFICIAL INSEMINATION

EDITED BY J. P. MAULE

TECHNICAL COMMUNICATION NO. 15 OF THE COMMONWEALTH BUREAU
OF ANIMAL BREEDING AND GENETICS

A comprehensive and up-to-date review of progress in the artificial insemination of farm livestock, poultry, dogs and laboratory animals.

Extracts from recent reviews:—

. . . a book in which the whole subject of artificial insemination is treated systematically in a full, concise and clear manner . . . extremely suitable for study by all who are connected with A.I.—*Tijdschrift voor Diergeneeskunde*.

. . . is likely to be a standard work for some time to come.—*Veterinary Record*.

. . . is well documented. Techniques and procedures are accurately described and vividly illustrated.—*Journal of Animal Science*.

. . . should be in the library of every A.I. organisation and available for all students and research workers in the field.—*A.I. Digest*.

420 pp.

2000 references

33 illustrations

Price 60s.

ANIMAL BEHAVIOUR

Editor Alastair N. Worden (Huntingdon)

- **Animal Behaviour** is the official journal of the *Association for the Study of Animal Behaviour* and of the *Section of Animal Behavior and Sociobiology (Ecological Society of America and the American Society of Zoologists)* and publishes original papers on animal behaviour and related subjects from contributors in many countries, as well as reports of researches, book reviews and reports of the proceedings of the Association and the Section.

In 1962 considerable expansion of **Animal Behaviour** took place. Not only did the journal increase in size but it more than maintained its position as one of the foremost journals in this field. In 1963 further development will occur; starting with Volume XI publication will be three times a year in issues of over 200 pages, an increase of rather more than 50 per cent over 1962. This considerable expansion reflects the increasing importance of the subject and the extent to which **Animal Behaviour** is used by behaviourists and others as one of their major sources of information on the progress of research in this field.

Annual Subscription 100s., U.S.A. and Canada \$17.50

1875

British Veterinary Journal

Editor J. A. LAING Chairman of the Editorial Board Sir JOHN RITCHIE

*The oldest veterinary periodical in the British Commonwealth.
It has always maintained the broadest interest in animal welfare
with regular articles on Breeding and Nutrition. The following
papers appear in the January 1963 issue.*

- Cockrill:** The Future of the Veterinary Profession: International Veterinary Trends.
- Donald:** Modern Trends in Animal Health and Husbandry: Livestock Genetics.
- Dalling:** Veterinary Education: the First Meeting of the FAO/WHO Expert Panel on Veterinary Education.
- Rankin:** Natural Oestrogens associated with Abortion in Cattle in Northern Ireland.
- Nestel/Creek:** Oestrus Synchronization in Hybrid Beef Heifers Following the Oral Use of 6-Methyl-17-Acetoxy Progesterone.
- Gray/Stebbins:** An annotated bibliography of surveys of the incidence of diseases of farm animals and birds in Great Britain, published during 1931-61. Part V. Sheep (Surveys 130-158).

Annual subscription 70s.

JOURNAL OF DAIRY SCIENCE

OFFICIAL PUBLICATION OF THE AMERICAN DAIRY SCIENCE ASSOCIATION

E. O. HERREID, Editor-in-Chief, University of Illinois, Urbana
H. F. JUDKINS, Secretary-Treasurer, White Plains, N.Y.

CONTENTS VOL. 45, No. 11, NOVEMBER 1962 includes:

- ROSE, DYSON. Factors Affecting the Heat Stability of Milk.
CHANDAN, R. C., CARRANCEDO, M. G. and SHAHANI, K. M. Sensitivity of Microbial Lipases to Antibiotics.
LUNDSTEDT, ERIK. Citrated Whey Starters. I. Growth Patterns of Starters and Their Aroma Bacteria When Cultivated in Rennet Whey or Cottage Cheese Whey Citrated with the Addition of Five Per Cent Trisodium Citrate, Pentahydrate.
DILL, C. W., ROBERTS, W. M. and AURAND, L. W. Production of Sulphur Compounds in Skim Milk Heated by Direct Steam Injection.
KING, R. L. and HEMKEN, R. W. Composition of Milk Produced on Pelleted Hay and Heated Corn.
RADER, E. R., LUDWICK, T. M. and RICHARDSON, D. O. Abnormal Mammary Development of the Young Dairy Heifer and Its Association with Future Performance.
SUTTON, J. D., MCGILLIARD, A. D. and JACOBSON, N. L. Technique for Determining the Ability of the Reticulo-Rumen of Young Calves to Absorb Volatile Fatty Acids at Controlled pH.
LEWIS, T. R. and EMERY, R. S. Intermediate Products in the Catabolism of Amino Acids by Rumen Micro-organisms.
SCHMIDT, G. H., CHATTERTON, R. T., JR., and HANSEL, WILLIAM. Histological Changes During Involution of the Mammary Glands of Ovariectomised and Intact Lactating Goats.
FOOTE, R. H., BRATTON, R. W., HENDERSON, C. R., SHANTZ, E. M., and POLLARD, J. K. Survival of Bovine Spermatozoa at Room Temperature in Citrate and Cornell University and Tris Extenders Containing Whole and Fractionated Coconut Milk.
SEGNER, W. P., FRAZIER, W. C. and CALBERT, H. E. Method for the Determination of Rates of Spore Inactivation at Ultra-High Temperatures.

This Journal is published monthly. The annual subscription rate is \$20.00 in the United States and Canada and is \$20.50 in all other countries, post paid. Subscriptions should be sent to the Garrard Press, 510 North Hickory Street, Champaign, Illinois.

Membership dues to the Association are \$12.50 per year, including the *Journal of Dairy Science*. Dues should be sent to Dr H. F. Judkins, Secretary-Treasurer, 32 Ridgeway Circle, White Plains, New York.

THE JOURNAL OF THE AUSTRALIAN INSTITUTE OF AGRICULTURAL SCIENCE

CONTENTS—VOL. 28, No. 3. SEPTEMBER 1962

Articles

- In search of yield, by C. M. DONALD.
Education and training for the dairying industry, by E. MUNCH-PETERSEN.
C.S.I.R.O. Liaison publications link research and extension, by K. LOFTUS HILLS.
Economic guidance of agricultural research in northern Australia, by J. J. BASINSKI,
M. J. T. NORMAN and G. A. STEWART.
Changes in nutrient availability in Australian soils as a result of biological activity,
by C. H. WILLIAMS.
Closer settlement in the 1960's, Report of a study group.

Letters

- Co-ordination of agricultural research.
Haymaking quality as a plant breeding objective, by A. H. BISHOP.
An unbalanced education in the Agricultural Science degree.
Scientific assistants, by D. V. WALTERS.
Errors in references *et al.*, by R. N. SANDIFORD.
Training in Agricultural Engineering, by G. H. VASEY.

THE EMPIRE JOURNAL OF EXPERIMENTAL AGRICULTURE

THIS JOURNAL offers agricultural research workers a medium for disseminating the records and results of their investigations on the feeding and management of livestock, cultivation and manuring of crops, trial of farm machinery, agricultural economics, and experimental technique.

Vol. XXX. No. 120

CONTENTS

October 1962

- L. H. BROWN: Land Consolidation and Better Farming in Kenya.
- R. C. RUSSELL: The Production of Smut-Free Barley Seed as a Community Project.
- H. V. GARNER: Experiments with Farmyard Manure, Sewage Sludges, and Town Refuses on Microplots at Schools, 1940-9.
- J. E. PEAT and K. J. BROWN: The Yield Responses of Rain-Grown Cotton at Ukiriguru in the Lake Province of Tanganyika. II. Land-Resting and other Rotational Treatments Contrasted with the use of Organic Manure and Inorganic Fertilizers.
- R. Q. CRAUFURD: Moisture Changes in Raw and Parboiled Paddy in West Africa and their Influence upon Milling Quality. I. Moisture Changes in the Ripening Crop.
- R. Q. CRAUFURD: Moisture Changes in Raw and Parboiled Paddy in West Africa and their Influence upon Milling Quality. II. Changes During Drying.
- J. McEWEN: Raising Cereal Yields in Northern Ghana.
- J. S. CAMPBELL, V. O. CHUKWUEKE, F. A. TERIBA and H. V. S. HO-A-SHU: Some Physiological Experiments with the White Lisbon Yam (*Dioscorea alata* L.) in Trinidad. III. The Effect of Chemicals on Storage.
- N. R. BROCKINGTON: Fertilizer Trials on some Cultivated Grasses in Northern Rhodesia.

Feeding of Fur-Bearing Animals

BY

F. C. AITKEN, B.Sc.

with a foreword by C. K. GUNN

*Technical Communication No. 23 of the Commonwealth Bureau
of Animal Nutrition*

An interpretative summary of published studies of the nutritive requirements and feeding of foxes, mink, chinchilla and nutria and a review of the little information available on the nutrition of beaver, muskrat, raccoon and ferret. It should be helpful to those research workers and fur farmers to whom the widely scattered literature, much of it in Russian and the Scandinavian languages, is not readily available.
