

Delphi

A History of the Center of the Ancient World

Michael Scott

“Learned and elegant, Michael Scott’s *Delphi* offers an in-the-round study of the heart of ancient Greece, a focus of religion, art, athletics, intrigue, and treasure so potent that it still gives us an adjective for enigmatic—‘Delphic.’ Scott’s irresistible narrative brings it all back to life.”

—Barry Strauss, author of *Masters of Command*

Cloth \$29.95 978-0-691-15081-9

Before and After Muhammad

The First Millennium Refocused

Garth Fowden

“*Before and After Muhammad* refocuses the chronological and geographical lenses through which historians view developments during the seminal period between ancient and medieval history in the West. Fowden writes clearly and convincingly. His research is thorough and his thesis is compelling.”

—Sidney H. Griffith, Catholic University of America

Cloth \$35.00 978-0-691-15853-2

ANTIQUITY

ARCHAEOLOGICAL PHOTOGRAPHY COMPETITION

Antiquity invites the submission of high-quality archaeological photographs for publication in the journal.

Two photographs will be selected and published each issue. A judging panel will decide the best photograph published each year and a cash prize of £500 will be awarded to the winner.

- Digital images only
- 135mm min width / 180mm max height
- Minimum 300ppi/dpi
- Short caption and technical details

Entries to: assistant@antiquity.ac.uk

See <http://www.antiquity.ac.uk/>
for further details.

MAGNETICS FOR ARCHAEOLOGY

Magnetics are an increasingly fundamental method for archaeology. Main benefits lie in the ability to resolve details non-invasively, the wide range of artifacts and cultural affects that are detectable, and the low-cost of magnetics in comparison to other geophysical methods. **GEM's** magnetometers and gradiometers offer proven methods for environmentally friendly prospecting. They reduce survey costs, deliver high-volume detailed data, and help plan digs for maximum efficiency. **GEM** offers archaeological professionals cost-effective, reliable, light-weight systems with a GPS option to augment field results.

VIEWING THE ANCESTORS

**Perceptions of the Anasazi,
Mokwicz, and Hisatsinom**

By Robert S. McPherson

\$34.95 HARDCOVER • 256 PAGES

21 B&W ILLUS.

Archaeologists have long studied the American Southwest, but as historian Robert McPherson shows in *Viewing the Ancestors*, their findings may not tell the whole story. McPherson maintains that combining archaeology with knowledge derived from the oral traditions of the Navajo, Ute, Paiute, and Hopi peoples yields a more complete history.

Notes for contributors

Antiquity aims to report new archaeological research, method and issues of international significance in plain language to a broad academic and professional readership. The journal is published quarterly in March, June, September and December.

Submissions are invited in the following categories: Research (max. 5000 words), Method and Debate (each max. 3000 words). Word limits include all text, tables, references and figure captions.

Antiquity uses a secure and confidential online submission and peer-review system. Detailed help on how to submit is available both prior to submission and throughout the submission process. To submit a manuscript please visit our website at <http://antiquity.ac.uk/contribute/contribute.html> where you will find a link to the submission site and full **Instructions for authors.**

Wherever possible manuscripts should be submitted as a single Adobe PDF document containing all text, tables and figures but excluding any covering letter. If you cannot submit your manuscript as a PDF, you may submit separate text and graphics files. If your paper is accepted for publication, you will be asked to provide separate high-resolution, publication-quality graphics, in TIFF or EPS format. It is therefore best for the initial submission to create any graphics using applications that are capable of preparing acceptable TIFF or EPS formats. Resolutions must be 300dpi or higher and image dimensions should be either half-page width (65mm) or full-page width (135mm). The maximum acceptable height is 185mm. Maps and plans must include an accurate scale and north point.

As part of the submission process authors will be required to confirm that the substance of

the content presented has not been published previously and is not currently being considered for publication elsewhere.

All papers are published in English, and we therefore prefer to receive submissions in English. If submitting in English is absolutely not possible, we may be able to consider submissions in other languages. In this case please contact the Editor (editor@antiquity.ac.uk) for advice before submitting your paper.

All submissions are considered by the Editor in the first instance. Suitable papers are peer-reviewed by a minimum of two experts. If you are unsure whether a paper is suitable for *Antiquity*, please contact the Editor prior to submission (editor@antiquity.ac.uk).

Project Gallery (<http://journal.antiquity.ac.uk/antplus/>)

The Project Gallery (max. 1000 words + 6 figures) is part of *Antiquity's* online Bulletin and is intended for the announcement, update or preliminary reports about projects and ideas of international status. The Project Gallery also welcomes contributions to archaeological historiography. Please note that the Editor will not accept reports about local or regional surveys, sites or artefacts unless of wider significance; articles of local and regional interest should be properly directed to the national records and journals of the country concerned. Project Gallery articles are not normally peer-reviewed but the Editor may seek external advice.

Books for review

We welcome books for review on archaeology and associated research. Please send books to the Reviews Editor, Dr Robert Witcher, at *Antiquity*, Durham University, South Road, Durham DH1 3LE, UK (email: reviews@antiquity.ac.uk).

Heritage Technology Ltd

Heritage Sector IT Specialists

3D Visualisation

- ✔ Digital visualisation of objects, buildings & landscapes
- ✔ Photo-realistic, high quality historical reconstructions

- ✔ Services for visitor attractions, academia & commercial projects
- ✔ Individually tailored to to fit **all** requirements & budgets
- ✔ Services also include web design & digital archaeological support

Heritage Technology specialises in creating highly realistic 3D visualisations from historical & archaeological data. Digital reconstruction is a proven technique in both academic & commercial archaeology for portraying often complex spatial & temporal data in an accessible and engaging way. Explore the possibilities at:
