# Nutrition Research Reviews

Volume 28, 2015 ISSN: 0954-4224

## Aims and Scope

*Nutrition Research Reviews* publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

*Nutrition Research Reviews* is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at [www.cambridge.org/nrr](http://www.cambridge.org/nrr)

---

## Editor-in-Chief

J V Woodside, *Belfast, UK*

## Deputy Editor

Jos Houdijk, *Scottish Agricultural College, UK*

## Editorial Board

M Ashwell, *Baldock, UK*  
E Bandera, *New Brunswick, USA*  
D A Bender, *London, UK*  
N Binns, *Drogheda, Ireland*  
J L Black, *Warrimoo, Australia*  
D Dardevet, *Theix, France*  
C Edwards, *Glasgow, UK*  
C Haskell-Ramsey, *Newcastle, UK*  
J M Hibbert, *Atlanta, GA, USA*  
T Hill, *Newcastle-upon-Tyne, UK*  
J K Lodge, *Newcastle-upon-Tyne, UK*  
H C Lukaski, *Grand Forks, ND, USA*  
S McCann, *Buffalo, NY, USA*  
M Pufulete, *Bristol, UK*  
P Rogers, *Bristol, UK*  
S Rutherford, *Palmerston North, NZ*  
N W Solomons, *Guatemala City, Guatemala*  
M Verstegen, *Wageningen, Netherlands*  
C M Weaver, *West Lafayette, IN, USA*  
K M Younger, *Dublin, Ireland*

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: [office@nutsoc.org.uk](mailto:office@nutsoc.org.uk)

Editor-in-Chief

J V Woodside  
Belfast, UK

**CAMBRIDGE**  
UNIVERSITY PRESS

**Nutrition Research Reviews**  
**Volume 28, 2015 ISSN: 0954-4224**

**Publishing, Production, Marketing, and  
Subscription Sales Office:**  
Cambridge University Press  
The Edinburgh Building  
Shaftesbury Road  
Cambridge CB2 8RU, UK

**For Customers in North America:**  
Cambridge University Press  
Journals Fulfillment Department  
100 Brook Hill Drive  
West Nyack  
New York 10994-2133  
USA

**Publisher:** Katy Christomanou

*Nutrition Research Reviews* is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

**Subscription information:**  
Volume 28 2015 (2 issues)  
Internet/print package: £286/\$558 American only/€445 EU only  
Internet only: £193/\$358 Americas only/€290 EU only

**Back volumes** are available. Please contact Cambridge University Press for further information.

**Claims** for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

**US POSTMASTERS:** please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

**Information for Authors:** The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Professor Jayne Woodside  
Centre for Public Health  
Queen's University Belfast  
Institute of Clinical Science B  
Grosvenor Road  
Belfast, BT12 6BJ  
UK  
Tel: 44(0)2890632585  
Fax: 44(0)2890235900  
Email: j.woodside@qub.ac.uk

**Directions to Contributors:** are available from the Editor-in-chief.

**Offprints:** The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

**Copyright:** As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

**Disclaimer:** The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

Subscribers may register for free access to the electronic version of *Nutrition Research Reviews*. For more information visit the website at [journals.cambridge.org](http://journals.cambridge.org)

*Nutrition Research Reviews* is covered by the Science Citation Index<sup>®</sup>, Current Contents<sup>®</sup> / Agriculture, Biology & Environmental Sciences, SciSearch<sup>®</sup>, Research Alert<sup>®</sup>, Index to Scientific Reviews<sup>®</sup>, EMBASE/Excerpta Medica, Chemical Abstracts Services, CINAHL<sup>®</sup> Database, CAB ABSTRACTS<sup>®</sup>, Global Health, BIOSIS<sup>®</sup> Database, SIIC Databases

## Dietary and pharmacological compounds altering intestinal calcium absorption in humans and animals

*Vanessa Areco, María Angélica Rivoira, Valeria Rodriguez, Ana María Marchionatti,  
Agata Carpentieri & Nori Tolosa de Talamoni*

Introduction	83
Transcellular pathway	84
Epithelial calcium channels	84
Calbindins	84
Calcium pump and Na <sup>+</sup> /Ca <sup>2+</sup> exchanger	85
Paracellular pathway	85
Hormonal effects	85
Calcitriol	85
Parathyroid hormone	87
Thyroid hormones	87
Growth hormone and insulin-like growth factor-1	87
Oestrogen	87
Glucocorticoids	87
Nutritional factors affecting intestinal calcium absorption	87
Dietary calcium	87
Other ions	88
Aluminium	88
Phosphate	89
Magnesium	89
Lipids	89
Carbohydrates	89
Prebiotics	90
Probiotics	90
Synbiotics	90
Proteins	90
Black tea	90
Coffee	91
Pharmacological compounds altering intestinal calcium absorption	91
Gene × diet interactions influence intestinal calcium absorption	93
Conclusions	93
Acknowledgements	93
References	93

## Energy restriction and potential energy restriction mimetics

*Sibylle Nikolai, Kathrin Pallauf, Patricia Huebbe & Gerald Rimbach*

Introduction	100
Energy restriction and lifespan in model organisms	100
Physical appearance during energy restriction	101
Blood parameters during energy restriction	102
Cellular processes affected by energy restriction	102
Energy restriction and oxidative status	102
Energy restriction and inflammation	103
Energy restriction and mitochondrial metabolism	103
Energy restriction and autophagic processes	103

## Contents

Molecular targets of energy restriction	104
AMP-activated protein kinase	104
Sirtuins	104
PPAR $\gamma$ coactivator 1 $\alpha$	105
Forkhead box O	105
Insulin-like growth factor 1	105
Mammalian target of rapamycin	105
Limitations and adverse effects of energy restriction	106
Energy restriction mimetics	106
Putative energy restriction mimetic candidate substances	106
Postulated mechanisms and potential limitations of the best-studied and most promising energy restriction mimetics	107
2-Deoxy-D-glucose	107
Metformin	108
Rapamycin	108
Resveratrol	109
Spermidine	110
Lipoic acid	110
Conclusion	112
Acknowledgements	112
References	112
Obesity and diabetes: the link between adipose tissue dysfunction and glucose homeostasis	
<i>Monise Viana Abranches, Fernanda Cristina Esteves de Oliveira, Lisiane Lopes da Conceição &amp; Maria do Carmo Gouveia Peluzio</i>	
Introduction	121
Adipose tissue: a lipid storage organ	122
Origin of adipose tissue	122
Development of adipose tissue via PPAR $\gamma$ : molecular considerations	123
Lipid accumulation and development of type 2 diabetes mellitus	123
Importance of vascularisation in adipose tissue	125
Relationship between adipocyte size and insulin resistance	125
Role of hypoxia in the development of insulin resistance	126
Adipose tissue as an endocrine organ	127
Inflammation, macrophage infiltration and insulin resistance: a continuous cycle	128
Conclusions	130
Acknowledgements	130
References	130
Murine models provide insight to the development of non-alcoholic fatty liver disease	
<i>D. T. Reid &amp; B. Eksteen</i>	
Introduction	133
Pathogenesis of non-alcoholic fatty liver disease	134
Development of non-alcoholic steatohepatitis from obesity and non-alcoholic fatty liver disease	134
Murine models with increased genetic susceptibility to non-alcoholic fatty liver disease	135
LDLr <sup>-/-</sup>	135
Leptin deficient (ob/ob) and leptin receptor deficient (db/db)	136
foz/foz	136
Murine models best for diet-induced non-alcoholic fatty liver disease	136
High-fat diets	136
‘Westernised’ diet	137

## Contents

Carbohydrate-enriched diet	137
Murine models best for diet-induced non-alcoholic steatohepatitis	138
Methionine- and choline-deficient diet	138
Extended duration of high-fat diets	138
High-cholesterol and -cholic acid diets	139
Development of hepatocellular carcinoma during non-alcoholic fatty liver disease	139
Conclusion	139
Acknowledgements	139
References	139
Dietary and lifestyle habits and the associated health risks in shift workers	
<i>Fiona M. Nea, John Kearney, M. Barbara E. Livingstone, L. Kirsty Pourshahidi &amp; Clare A. Corish</i>	
Introduction	143
Methodology	144
Shift work and lifestyle habits	144
Dietary intakes	144
Physical activity	144
Smoking	144
Alcohol	148
Sleep patterns	148
Summary on the effects of shift work on lifestyle habits	148
Shift work and health risks	148
Cancer	150
Obesity	152
Metabolic syndrome	152
Type 2 diabetes mellitus	157
CVD	157
Gastrointestinal disorders	157
Mental health and cognitive function	160
Summary of the impact of shift work on health	160
Improving the lifestyle habits and health of shift workers	160
Barriers to a healthy lifestyle	160
Opportunities for a healthier lifestyle	162
Conclusion	162
Acknowledgements	162
References	162
The role of nutrition on cognition and brain health in ageing: a targeted approach	
<i>Jim M. Monti, Christopher J. Moulton &amp; Neal J. Cohen</i>	
Introduction	167
Population selection	168
Alzheimer's disease	168
Mild cognitive impairment	169
Healthy older adults	169
Conclusion	170
Specific cognitive domains and brain regions	170
Relational memory and the hippocampus	171
Working memory, executive function and the frontoparietal network	171
Processing speed and white matter	172
Conclusion	172
Assessment tools	172

*Contents*

Cognitive measurements	172
Relational memory assessment: behavioural tasks	173
Relational memory assessment: eye tracking	174
Working memory assessment: behavioural tasks	174
Cognitive assessment tools: summary	174
MRI	175
Structural imaging: grey matter volume	175
Structural imaging: white matter integrity	175
Structural imaging: magnetic resonance spectroscopy	176
Functional imaging: arterial spin labelling	176
Functional imaging: blood oxygen level dependent signal	176
Conclusion	177
Acknowledgements	177
References	177
