

Disaster Medicine and Public Health Preparedness

Published on behalf of the Society for Disaster Medicine and Public Health, Inc.

Editor-in-Chief

James J. James, *Society for Disaster Medicine and Public Health, Inc, USA*

Disaster Medicine and Public Health Preparedness is the first comprehensive and authoritative journal emphasizing public health preparedness and disaster response for all health care and public health professionals globally. The journal seeks to translate science into practice and integrate medical and public health perspectives. With the events of September 11, the subsequent anthrax attacks, the tsunami in Indonesia, hurricane Katrina, SARS and the H1N1 Influenza Pandemic, all health care and public health professionals must be prepared to respond to emergency situations. In support of these pressing public health needs,

Disaster Medicine and Public Health Preparedness is committed to the medical and public health communities who are the stewards of the health and security of citizens worldwide.

Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

International Journal of Disability Management

Published for the International Forum on Disability Management

Editor-in-Chief

Nicholas Bellamy, *University of Queensland, Australia*

International Journal of Disability Management publishes research findings in areas including prevention of injury and disability, occupational rehabilitation and employment of people with injury and disability. The journal has a particular aim of encouraging and publishing findings from studies conducted in a range of countries that focus on disability management interventions in the workplace.
